Scientists And Scoundrels A Of Hoaxes:

Scientists and Scoundrels Robert Silverberg, 2007-06-01 As if history and nature had not provided wonders enough through the ages humans themselves have contrived more marvels to deceive one another Sometimes they have concocted evidence when none was available to prove pet theories sometimes their intention has been to impress or defraud sometimes they have acted merely for sport Robert Silverberg tells the stories of a baker's dozen of these scientific hoaxers in a lively good humored book that ranges through time and across continents Here are perpetual motion machines and space rockets men on the moon and serpents in the sea The rogues gallery is a varied one Dr Mesmer who cast his hypnotic spell on eighteenth century Paris Charles Dawson whose Piltdown Man challenged evolution Dr Cook with his tale of discovering the North Pole and many others These are fascinating stories and more than just entertainment The author explains the scientific background against which the hoaxes appeared and the detective work that led to their exposure The schemers teach us to be alert to challenge the evidence and to appreciate the healthy skepticism that characterizes the scientific method

The Pseudoscience Wars Michael D. Gordin, 2024-05-31 Properly analyzed the collective mythological and religious writings of humanity reveal that around 1500 BC a comet swept perilously close to Earth triggering widespread natural disasters and threatening the destruction of all life before settling into solar orbit as Venus our nearest planetary neighbor Sound implausible Well from 1950 until the late 1970s a huge number of people begged to differ as they devoured Immanuel Velikovsky s major best seller Worlds in Collision insisting that perhaps this polymathic thinker held the key to a new science and a new history Scientists on the other hand assaulted Velikovsky s book his followers and his press mercilessly from the get go In The Pseudoscience Wars Michael D Gordin resurrects the largely forgotten figure of Velikovsky and uses his strange career and surprisingly influential writings to explore the changing definitions of the line that separates legitimate scientific inquiry from what is deemed bunk and to show how vital this question remains to us today Drawing on a wealth of previously unpublished material from Velikovsky s personal archives Gordin presents a behind the scenes history of the writer s career from his initial burst of success through his growing influence on the counterculture heated public battles with such luminaries as Carl Sagan and eventual eclipse Along the way he offers fascinating glimpses into the histories and effects of other fringe doctrines including creationism Lysenkoism parapsychology and more all of which have surprising connections to Velikovsky s theories Science today is hardly universally secure and scientists seem themselves beset by critics denialists and those they label pseudoscientists as seen all too clearly in battles over evolution and climate change The Pseudoscience Wars simultaneously reveals the surprising Cold War roots of our contemporary dilemma and points readers to a different approach to drawing the line between knowledge and nonsense **Abominable Science!** Daniel

Loxton, Donald R. Prothero, 2013-08-06 A sharp analysis of the quest for unreal critters cryptids as they are called and the people who pursue them entertaining and thoroughly documented The Wall Street Journal Throughout our history humans have been captivated by mythic beasts and legendary creatures Tales of Bigfoot the Yeti and the Loch Ness monster are part of our collective experience Now comes a book from two dedicated investigators that explores and elucidates the fascinating world of cryptozoology Daniel Loxton and Donald R Prothero have written an entertaining educational and definitive text on cryptids presenting the arguments both for and against their existence and systematically challenging the pseudoscience that perpetuates their myths After examining the nature of science and pseudoscience and their relation to cryptozoology Loxton and Prothero take on Bigfoot the Yeti or Abominable Snowman and its cross cultural incarnations the Loch Ness monster and its highly publicized sightings the evolution of the Great Sea Serpent and Mokele Mbembe or the Congo dinosaur They conclude with an analysis of the psychology behind the persistent belief in paranormal phenomena identifying the major players in cryptozoology discussing the character of its subculture and considering the challenge it poses to clear and critical
