Dress and Identity in Iron Age Britain Elizabeth Marie Foulds, 2017-01-26 Through an analysis of glass beads from four key study regions in Britain the book aims to explore the role that this object played within the networks and relationships that constructed Iron Age society

Fingerprinting the Iron Age: Approaches to identity in the European Iron Age Cătălin Nicolae Popa, Simon Stoddart, 2014-09-30 Archaeology has long dealt with issues of identity and especially with ethnicity with modern approaches emphasising dynamic and fluid social construction The

archaeology of the Iron Age in particular has engendered much debate on the topic of ethnicity fuelled by the first availability of written sources alongside the archaeological evidence which has led many researchers to associate the features they excavate with populations named by Greek or Latin writers. Some archaeological traditions have had their entire structure built around notions of ethnicity around the relationships existing between large groups of people conceived together as forming unitary ethnic units. On the other hand partly influenced by anthropological studies other scholars have written forcefully against Iron Age ethnic constructions such as the Celts. The 24 contributions to this volume focus on the south east Europe where the Iron Age has until recently been populated with numerous ethnic groups with which specific material culture forms have been associated. The first section is devoted to the core geographical area of south east Europe: Bulgaria, Croatia, Romania, Serbia and Slovenia as well as Albania and the Former Yugoslav Republic of Macedonia. The following three sections allow comparison with regions further to the west and the south west with contributions on central and western Europe, the British Isles and the Italian peninsula. The volume concludes with four papers which provide more synthetic statements that cut across geographical boundaries, the final contributions bringing together some of the key themes of the volume. The wide array of approaches to identity presented here reflects the continuing debate on how to integrate material culture protohistoric evidence largely classical authors looking in on first millennium BC societies and the impact of recent nationalistic agendas.

Scotland's Heraldrerie: [the Science of Heraldrerie Treated as a Part of the Civil Law and Law of Nations]. Sir George Mackenzie, 1680

New Directions in Colour Studies Carole Patricia Biggam, 2011 Offers a perspective on the field ranging from studies of individual languages through papers on art, architecture and heraldry to psychological examinations of aspects of colour categorization, perception and preference.

Scotland's Road to Independence Alan W. Ertl, 2013-11 This book surveys elements that have influenced the Scottish people over time and led to the formation of a distinct *sui generis* identity. The modern state is an amalgam of people who inhabit a specific given territory, people whose thinking has been formed by circumstances and events which over time forge a collective identity and establish self-expression and determination. Environmental happenstances, the genetic and intellectual makeup of the people, the overcoming of common challenges and the interpretation of historical events all play a role in the development of this collective thinking forming the modern mental structure of a given population. In the case of the Scots, these elements have created an endemic view of the world that is unique and recognizable. This text identifies these influences and traces their development through time as they formed the self-felt identity of the modern nation which has inherited the territory of Scotland. Reviewed herein are some of the main factors which have provoked a natural and correct desire for an independent state in Europe.

Blackness at the Intersection Kehinde Andrews, Kimberlé Crenshaw, Annabel Wilson, 2024-02-08 A ground-breaking collection applying Crenshaw's concept of intersectionality to the black diasporic experience in Britain. In the 1980s Professor Kimberlé Crenshaw first coined the term intersectionality. Since then the concept

has spread across national and disciplinary boundaries and has had a transformative impact on the way in which we understand identity and the experience of discrimination But outside the US the application of intersectional theory has largely been disconnected from any analysis of Blackness despite intersectionality's origins in critical race theory CRT Curated by Crenshaw Andrews and Wilson as well as several of the leading scholars of CRT this collection bridges that gap and is the first to apply both these concepts to contexts outside the US Focusing on Blackness in Britain the contributors examine how scholars and activists are employing intersectionality to foreground Black British experiences Its essays encompass key issues such as gender and Black womanhood issues of representation within contemporary British culture and the position of Black Britons within institutions such as the family education and health The book also looks to the role intersectionality can play in shaping future political activism and in forging links beyond Blackness to other social movements

Accessibility, Inclusion, and Diversity in Critical Event Studies Rebecca Finkel, Briony Sharp, Majella Sweeney, 2018-09-14 Most early social research into planned events had the effect of broadcasting narratives of dominant cultures and privileged groups More recently however convergences of gender sexualities ethnicities age class religion and intersectional analyses and events studies have started to drive new critical understanding of the impacts of events on non mainstream non majority communities around the globe This timely book addresses current gaps in the literature surrounding issues of accessibility inclusion and diversity in various event landscapes Structured into four parts covering the main types of events the chapters present original topics using innovative methodological approaches Each chapter employs a case study to illustrate the key intertwining issues in these various experiential realms Further the chapters are all cross or interdisciplinary drawing on gender sexualities cultural race ethnicity studies as well as multiple literatures that feed into critical events studies and exploring a variety of global examples This significant book opens the path to further research on the role and importance of accessibility inclusion and diversity in events environments worldwide It will be of interest to academics and researchers of critical event studies as well as a number of related social science disciplines
