Scotlands Environment The Future:

Scotland's Environment George Holmes, Roger Crofts, 2000 Scotland's countryside is one of her most precious assets and today there is more widespread public awareness and concern about its quality and its future management than ever before. Here a group of distinguished speakers look back at changes in the environment and land use over the centuries before looking in the crystal ball to try and forecast where current events and trends are taking us. Their main purpose was to examine and consider what actions might be taken to ameliorate unwelcome trends and promote beneficial ones. The end product is an Agenda for Action recommending the kinds of policies and practices that would be likely to enhance the environmental qualities most valued by society. This book summarises that Agenda and the reasoning underlying it.

Strengthening Scotland's future Great Britain: Scotland Office, 2010-11-30 This paper is issued alongside the Scotland Bill Bill 115 ISBN 9780215557414 and its associated explanatory notes Bill 115 EN ISBN 9780215546548 which implements the changes to legislation recommended in the final report of the Commission on Scottish Devolution chairman Sir Kenneth Calman. Serving Scotland better: Scotland and the United Kingdom in the 21st Century available at http://www.scotlandoffice.gov.uk/scotlandoffice/files/Calman_report.pdf. The Commission's central view was that Scotland should be responsible for raising more of its revenue and the Government proposes a transfer of fiscal power so that the Scottish Parliament will have powers to raise some 35 per cent of its own budget; the current level is 15 per cent. Proposals include a Scottish income tax to replace part of the UK income tax; the devolution of land tax and landfill tax; the power to create or devolve other taxes to the Scottish Parliament; extensive new borrowing powers; a Scottish cash reserve to manage fluctuations around devolved tax receipts; a seat for Scottish ministers on a new UK Scottish tax committee. This paper also outlines the Government's response in other policy areas: strengthening relations between Parliaments and Governments; improving the constitutional framework; administration of elections; policing and justice; health and public safety; business, corporate affairs and academic research; environment and rural affairs; social security and welfare reform; charities; the Scottish Government and technical amendments to the Scotland Act 1998.

Managing Scotland's Environment Charles R. Warren, 2002 This book is illustrated with photographs and maps and diagrams. It is designed for those studying Scotland's environment at undergraduate and graduate level and for those engaged in farming, forestry, conservation, game sports and employment.

Scotland's Future Culture Stuart McHardy, 2017-09-26 The culture of all nations is rooted in past experience, individual and communal. In Scotland's Future History, McHardy looked at the misrepresentation of so much of Scotland's political and social history. In this new volume, he takes a wider look at aspects of Scotland's culture that have been at the heart of how we have developed into who we are in today's world. Topics include literature, religion, history and story: the Radical 1790s; the remarkable Douglas Young; and an introduction to Geomythography, a new way of melding prehistory and history to present a new and refreshing way of seeing our past. Understanding our past is vital to the process of building a new Scotland in the years

ahead As Scotland moves towards reclaiming her status among the nations of the world it is important that we understand just how culturally distinctive we are Being Scottish is no better than having any other nationality but is certainly no worse and as this work hopefully shows it is something worth celebrating

The Future of Scotland Robert Underwood, 2021-10-12 Originally published in 1977 at a time when Scottish affairs were in a state of flux as the debate over political devolution and self government was pursued this book deals with key features of Scottish development It explores the main issues which were then being considered in the planning of Scotland's future The contributors discuss the issues from a global perspective using Scotland as an occasion for detailed focus

Implementing Education Policies Scotland's Curriculum for Excellence Into the Future OECD, 2021-06-21 Students in Scotland United Kingdom engage in learning through Curriculum for Excellence CfE which aims to provide them with a holistic coherent and future oriented approach to learning between the ages of 3 and 18 CfE offers an inspiring and widely supported philosophy of education This report analyses the progress made with CfE since 2015 building upon several months of observations in Scotland the existing literature and experiences from other OECD countries

Managing Scotland's Environment Charles Warren, 2009 This text is designed for those studying Scotland's environment at undergraduate and graduate level and for those engaged in farming forestry conservation game sports and employment This edition also includes a chapter on energy and the environment

Meeting Scotland's Future Energy Needs Great Britain: Parliament: House of Commons: Scottish Affairs Committee, 2006-03-29 This report is a brief description of a visit to Westfield Development Centre where Fife Energy Limited has developed an advanced fuel technology and gasification plant It is able to convert any carbon containing material into a synthetic gas composed primarily of carbon monoxide and hydrogen which can be used in place of natural gas for example to generate electricity The Committee was impressed by the plant and by a number of other energy projects in the Fife area wave generation off shore wind demonstrators battery research and recommends that the Minister for Energy either visits the site or receives a presentation from the Westfield Centre in the course of the consultation period for the energy review which ends on 14 April 2006

Scotland's Future History Stuart McHardy, 2015-04-06 McHardy presents a new approach to history changing our mindset to look at Scotland as the centre of our story Rather than starting from the Mediterranean from the classical Christian bias we have been taught for centuries Rather than being a remote dark land populated by barbaric tribes Perhaps we were the centre of a well organised civilisation around the Orkneys and islands and coasts and rivers with our own priorities community centred locally self sufficient well versed in lore of all kinds Who were we The great centres of ritual in Orkney Lewis and Kilmartin suggest an indigenous population much more sophisticated in terms of social ritual and communal rule than we have been led to believe In whose interest is it that we accept the classical Christian version of history relayed to us by monks These are some of the questions McHardy addresses in a passionate and accessible style Read and become more Alba centric in terms of what we see as important to research study

and understand **Managing Environments for Leisure and Recreation** Richard Broadhurst, 2002-09-26 This book seeks to bring together the different strands of thought that inform the management of settings for leisure and recreation It is highly illustrated with over 50 line drawings and includes many case studies from around the world **Transformation of Scotland** Tom M. Devine, 2019-07-29 This is the first comprehensive history of the Scottish economy over the last three centuries to appear in a generation Written by leading scholars in the field it presents state of the art research in an accessible style to all those interested in understanding the historical context of modern Scotland Fresh interpretations are revealed on such key and controversial issues as the impact of the Union of 1707 the Clearances the rise and fall of Scottish heavy industry and the recent transformation of the modern economy The distinctive features of the Scottish economic system are stressed but these are also analysed within a British and international context The focus of the volume is both broad and detailed with full treatment of agriculture finance industry and the service sector as well as the impact of momentous economic changes on the lives of the people and the massive new role in the twentieth century of the state in economic affairs At a time of intense debate on the present and future condition of Scotland under a devolved parliament and executive this book provides the essential background and the long run perspectives on the challenges and opportunities facing the nation **Lairds, Land and Sustainability** Jayne Glass, 2013-07-22 Scotland is at the heart of modern sustainable upland management Large estates cover vast areas of the uplands with a long complex and emotive history of ownership and use In recent decades the Scottish uplands have increasingly been the arena for passionate debates over large scale land management issues Crucially what kinds of ownership and management will best deliver sustainable futures for upland environments and communities Although the globally unique dominance of private ownership remains a distinctive characteristic of Scotland's uplands increasing numbers of estates are now owned by environmental NGOs and local communities especially since the Land Reform Scotland Act of 2003 A decade after the passage of this landmark Act this book synthesises research carried out on a diverse range of upland estates by the Centre for Mountain Studies at Perth College University of the Highlands and Islands The findings from privately owned estates as well as those owned by communities charities and conservation groups will prove enlightening and relevant to upland managers policy makers and researchers across Britain and Europe With the Scottish Government promoting a vision of environmental sustainability and with the new diversity of ownerships and management now appearing this timely and topical book investigates the implications of these different types of land ownership for sustainable upland management **Innovations for Sustainable Building Design and Refurbishment in Scotland** Branka Dimitrijević, 2013-11-08 This book presents innovations for sustainable building design and refurbishment developed and tested through feasibility studies undertaken by researchers at Scottish universities in collaboration with small to medium size enterprises in Scotland during the CIC Start Online project that ran from September 2009 to February 2013 The project was led by Glasgow Caledonian University in collaboration with

Edinburgh Napier University Glasgow School of Art Heriot Watt University the Robert Gordon University University of Edinburgh and the University of Strathclyde Glasgow The book includes chapters on Context and Policies Planning Building Design Technologies Construction Refurbishment and Performance The contents of each chapter are based on 63 completed studies that were initiated by businesses operating in the construction sector or providing services to the sector indicating the scope of research required to assist the industry to develop more sustainable products and processes The book informs the reader about the range of innovations that were tested and highlight potential future research areas Readers can find in depth information by accessing the project website www.cicstart.org where full reports on most studies and the video recordings of interactive online seminars that presented the outcomes of the studies are available Along with the new knowledge on how innovations for sustainable building design and refurbishment can be applied in practice the book demonstrates how joint projects of several universities can be successfully managed and how an immediate knowledge transfer can be organized by using web tools to reach over 2 200 current members nationally and internationally in UK and 53 other countries **Future Flooding and Coastal Erosion Risks** Colin R Thorne,Edward Evans,E.

Penning-Rowsell,2007-01-10 Over 200 billion worth of assets are at risk around British rivers and coasts and those risks are likely to increase over the next 100 years due to changes in climate and in society Sir David King Government Chief Scientific Adviser This book presents a comprehensive insight into the flooding system spanning multiple disciplines across different sectors of the flood and flood management professions It forecasts the manner in which flooding and coastal erosion risks may increase during the 21st century due to climate change [The Future for Health Promotion](#) Colin Palfrey,2018-05-02

Does health promotion have a lasting and positive effect on people With mounting pressure to reduce costs to the NHS and increasing scepticism of the so called nanny state health promotion initiatives are increasingly being criticised as costly and ineffective with many arguing that health inequalities can only be reduced through radical political and economic change This book examines the methods used to evaluate the value of health promotion projects and determines whether attempts to change people s lifestyles have proved successful Taking into account the practical and ethical issues involved in deciding the appropriate approach to take in efforts to reduce health inequalities the book assesses what might be the best path forward for health promotion *Urban Rivers* G. Petts,J. Heathcote,D. Martin,2002-03-31 The history of urban development is associated with the degradation of rivers the deterioration of water quality increased flooding and the loss of ecological resources The story of urban streams and rivers is as much a social history as it is a technological one The control of nature and exploitation of natural resources was at the heart of the industrialisation process and of advances in the co ordination and effective administration of water and land management schemes Today new approaches to the management of urban water are a response to advances in scientific knowledge and technology and of a new concern for quality of life

Environmental improvement and ecological restoration demonstrate confidence in an area which can enhance economic

competitiveness Along with improvements in air quality building stock and transport networks the restoration of stream and river corridors can make a major contribution to the success of urban regeneration schemes Urban Rivers provides an illustrated overview of the effects of urbanisation on the aquatic environment potential solutions to the resulting problems and new opportunities for the regeneration of urban streams and rivers and of land along their corridors and of adjacent urban areas The book is written to be accessible to a broad audience and should provide a stimulating and informative introduction to the subject for all those concerned with the urban river environment

Heritage Studies Marie Louise Stig Sørensen, John Carman, 2009-09-18 This is the first volume specifically dedicated to the consolidation and clarification of Heritage Studies as a distinct field with its own means of investigation It presents the range of methods that can be used and illustrates their application through case studies from different parts of the world including the UK and USA The challenge that the collection makes explicit is that Heritage Studies must develop a stronger recognition of the scope and nature of its data and a concise yet explorative understanding of its analytical methods The methods considered fall within three broad categories textual discourse analysis methods for investigating people's attitudes and behaviour and methods for exploring the material qualities of heritage The methods discussed and illustrated range from techniques such as text analysis interviews participant observation to semiotic analysis of heritage sites and the use of GIS Each paper discusses the ways in which methods used in social analysis generally are explored and adapted to the specific demands that arise when applied to the investigation of heritage in its many forms Heritage Studies is a seminal volume that will help to define the field The global perspective and the shared focus upon the development of reflexive methodologies ensure that the volume explores these central issues in a manner that is simultaneously case specific and of general relevance

Sustainable Planet Barbara J. McNicol, 2021-04-26 Sustainable Planet is a two volume resource that provides comprehensive coverage on the world's most pressing environmental issues their impact in countries around the world and how or if they are being addressed Sustainable Planet Issues and Solutions for Our Environment's Future examines contemporary challenges to sustainability including population climate change decreasing biodiversity land degradation and water quality Each chapter analyzes one of these challenges by first providing an introduction to the topic as well as key concepts to provide readers with a basic understanding of the issue Essays deepen comprehension by investigating different aspects of the challenge Case studies written by experts in the field follow Each case study considers how a specific country is affected by the particular issue as well as the measures the country is taking to find solutions that will provide for a more sustainable future The final chapter of the book explores sustainability at a global level by examining through annotated primary documents a number of multinational initiatives and alliances intended to create a more sustainable planet

Hydrology and Water Law - Bridging the Gap J. Wallace, Patricia Wouters, 2006-04-30 With integrated water resources management IWRM the current buzzword in international circles the real question is how to operationalise a truly multidisciplinary approach to the

effective management of shared watercourses Based largely on the actual experience of HELP Hydrology for the Environment Life and Policy the overall aim of the book is to produce a series of case studies from around the world from the Aral Sea to Zimbabwe that demonstrate how the gaps between hydrology water law and management are actually bridged in practice Is hydrological data relevant and used in the formulation of national and international water law and policy Cases cited include examples of where this has happened and been successful or unsuccessful and where this has not happened and led to problems This will act as a guide to how future water laws and policies can be made more effective via the use of accurate and up to date hydrological information *Planning our electric future* Great Britain: Department of Energy and Climate Change, 2011-07-12 This white paper sets the Government's proposals for reform of the UK's electricity system to ensure that the UK electricity supply is secure low carbon and affordable This is especially crucial as we face a number of unprecedented challenges in the coming decades including the threat to security of supply as existing plant closes the necessity to decarbonise electricity generation the likelihood for a rise in electricity demand and electricity prices are also expected to rise Broadly the strategy's approach consists of four parts long term contracts for both low carbon energy and capacity institutional arrangements to support this contracting approach continued grandfathering supporting the principle of no retrospective change to low carbon policy incentives within a clear and rational planning cycle and ensuring a liquid market that allows existing energy companies and new entrants to compete on fair terms
