The Man Who Found Time Jack Repcheck, 2008-12-15 There are three men whose contributions helped free science from the straitjacket of theology Two of the three Nicolaus Copernicus and Charles Darwin are widely known and heralded for their breakthroughs The third James Hutton never received the same recognition yet he profoundly changed our understanding of the earth and its dynamic forces Hutton proved that the earth was likely millions of years old rather than the biblically determined six thousand and that it was continuously being shaped and re shaped by myriad everyday forces rather than one cataclysmic event In this expertly crafted narrative Jack Repcheck tells the remarkable story of this Scottish gentleman farmer and how his simple observations on his small tract of land led him to a theory that was in direct confrontation with the Bible and that also provided the scientific proof that would spark Darwin s theory of evolution It is also the story of Scotland and the Scottish Enlightenment which brought together some of the greatest thinkers of the age from David Hume and Adam Smith to James Watt and Erasmus Darwin Finally it is a story about the power of the written word Repcheck argues that Hutton s work was lost to

history because he could not describe his findings in graceful and readable prose Unlike Darwin's *Origin of the Species* Hutton's one and only book was impenetrable A marvelous narrative about a little known man and the science he founded *The Man Who Found Time* is also a parable about the power of books to shape the history of ideas **Social Justice and Social Policy in Scotland** Gerry Mooney, Gill Scott, 2012

Social justice and social policy in Scotland offers a critical engagement with the state of social policy in Scotland focusing on a diverse range of topics and issues including income inequalities work and welfare criminal justice housing education health and poverty each reflecting the themes of social inequality and social justice **Need, Risk and Protection in Social Work Practice** Steve Hothersall, Mike

Maas-Lowit, 2010-05-06 This book provides a detailed and comprehensive guide to working with risk It begins by looking at notions of need vulnerability and protection and looks at the theoretical concepts of each before applying them to practice By using this combination of theory and practice the authors are able to integrate policy for a wide range of services users from older people to children families and younger adults Case studies accompany and illustrate each method and the reader is invited to engage in a number of exercises and activities to consolidate learning *The Reign of James VI* Julian

Goodare, Michael Lynch, 2000-01-11 The reign of James VI 1567-1625 remains one of the most enigmatic in Scottish history There are long periods within it that resemble black holes in our knowledge This study is a concerted attempt by a group of ten scholars of the reign drawn from three different disciplines to shed light on its politics and government viewed through various perspectives These include the royal court which is analysed through its literature architecture and ceremony noble factionalism relations with England a revised model of tensions between church and state and the relationship between the government and the Highlands the Borders and the south west a future region of opposition to Charles I This study also analyses James as a literary author correspondent husband and universal king The book offers alternatives to accepted views of the reign dismissing both Melvillianism and laissez faire monarchy as useful tools It sees the centre of politics as the interaction between an expanded and increasingly expensive royal court and a phenomenal growth of the state based on a huge increase in legislation and the business of the Privy Council *Ian Rankin* Erin E. MacDonald, 2020-06-22

suspenseful plots realistic character development and a unique mix of American hard boiled and procedural styles with Scottish dialects and sensibilities **Agri-Food Commodity Chains and Globalising Networks** Dr Christina Stringer, Professor Richard Le Heron, 2012-11-28 Within the international agri food community at least four theoretical targets are attracting increasing attention They are 1 the established notions of networks and commodity chains that are being revisited by way of critical engagement informed by the insights of in depth empirical work 2 the metrics of calculation and institutional embedding that underpin the rise and functionality of governance technologies 3 the place of regional networking in creating conditions that make possible agri food producer participation in local provisioning and supply and 4 the geo historical dimensions of interconnection and interdependency in the agri food sphere This volume brings together an interdisciplinary team of anthropologists economists business and management academics and geographers to examine a wide range of case studies illustrating various agri food commodity chains and networks around the world and to discuss how they link globally
