Media Computing Chitra Dorai, Svetha Venkatesh, 2012-12-06 Traditionally scientific fields have defined boundaries and scientists work on research problems within those boundaries However from time to time those boundaries get shifted or blurred to evolve new fields For instance the original goal of computer vision was to understand a single image of a scene by identifying objects their structure and spatial arrangements This has been referred to as image understanding Recently computer vision has gradually been making the transition away from understanding single images to analyzing image sequences or video

understanding Video understanding deals with understanding of video sequences e.g. recognition of gestures activities facial expressions etc. The main shift in the classic paradigm has been from the recognition of static objects in the scene to motion based recognition of actions and events. Video understanding has overlapping research problems with other fields therefore blurring the fixed boundaries. Computer graphics image processing and video databases have obvious overlap with computer vision. The main goal of computer graphics is to generate and animate realistic looking images and videos. Researchers in computer graphics are increasingly employing techniques from computer vision to generate the synthetic imagery. A good example of this is image based rendering and modeling techniques in which geometry appearance and lighting is derived from real images using computer vision techniques. Here the shift is from synthesis to analysis followed by synthesis.

Language and Beyond / Le langage et ses au-delà, 1998-01-01 The title of this book Language and Beyond suggests a dynamic relationship between two poles in which language is confronted with an otherness that is apparently fundamental to it and towards which it is seen to be reaching But what is the beyond of language Is it an object or an image Do images visual or aural actually constitute a beyond of language The interdependence of words might appear to perpetuate an absence instead and yet signs can also be seen to establish a presence by their very materiality The articles in this collection investigate and therefore postulate some form of dialogue between word and image but they also test semiotic borders examining the various shades of the interdependence conflict or dominance and the orientation of the relationship Ce livre s'adresse aux spécialistes chercheurs et étudiants ainsi qu'un public plus large aux lecteurs ouverts aux théories méthodes et pratiques de la recherche interdisciplinaire Son titre suggère un rapport dynamique entre le langage et ses au-delà une bipolarité tour à tour assumée et transgressée voire interrogée Mais quels sont ces au-delà Et comment les objets images sons ou représentations mentales sont-ils investis ou re-investis par le langage Dès lors que la nature séquentielle de ce dernier semble souligner le caractère direct et marginal de ses au-delà il suffit au contraire de la matérialité même des signes pour les projeter au cœur de l'expression verbale Les articles de ce recueil postulent un dialogue entre le mot et l'image mais scrutent galement les confins des systèmes de signes les modes et degrés de leurs interdépendances et de leurs oppositions
