The Shaping of Modern Thought Crane Brinton, 1963 *The Shaping of Rationality* J. Wentzel van Huyssteen, 1999-07-20 This book arises out of a deep fascination with the relationship between human intelligence and rationality and with how our fragile but uniquely human ability to be rational invariably affects our everyday lives as well as our involvement with faith theology and the spectacular scientific achievements of our time After carefully analyzing the notion of rationality and examining how the skill of rationality is being challenged by postmodern culture J Wentzel van Huyssteen argues that it is precisely the problem of rationality that holds the key to understanding the complex forces shaping the radically different domains of religion and science today

Shaping Science and Technology Policy David H. Guston, Daniel Sarewitz, 2007-02-01 With scientific progress occurring at a breathtaking pace science and

technology policy has never been more important than it is today Yet there is a very real lack of public discourse about policy making and government involvement in science remains shrouded in both mystery and misunderstanding Who is making choices about technology policy and who stands to win or lose from these choices What criteria are being used to make decisions and why Does government involvement help or hinder scientific research Shaping Science and Technology Policy brings together an exciting and diverse group of emerging scholars both practitioners and academic experts to investigate current issues in science and technology policy Essays explore such topics as globalization the shifting boundary between public and private informed consent in human participation in scientific research intellectual property and university science and the distribution of the costs and benefits of research Contributors Charlotte Augst Grant Black Mark Brown Kevin Elliott Patrick Feng Pamela M Franklin Carolyn Gideon Ten N Hamilton Brian A Jackson Shobita Parthasarathy Jason W Patton A Abigail Payne Bhaven Sampat Christian Sandvig Sheryl Winston Smith Michael Whong Barr **Jean-Paul Sartre** Hector Davidson, Jean Paul Sartre a towering figure in 20th century philosophy is perhaps best known for his development of existentialism a school of thought that emphasizes individual freedom choice and the creation of meaning in an otherwise indifferent universe Sartre s philosophy arises from the existentialist tradition but distinguishes itself through its rigorous approach to human freedom and responsibility At the heart of Sartre s thought is the idea that human beings are condemned to be free burdened with the constant task of making choices without any external justification or predetermined essence Born in Paris in 1905 Sartre s intellectual journey was shaped by early encounters with phenomenology and existential philosophy especially through the works of Edmund Husserl and Martin Heidegger However it was his engagement with phenomenology along with his studies in literature and politics that laid the groundwork for his later ideas Sartre s major philosophical work Being and Nothingness 1943 is considered one of the central texts of existentialist thought where he explores the nature of existence consciousness and freedom in profound detail Sartre s existentialism diverges from traditional metaphysical perspectives by rejecting the notion of an intrinsic human nature or essence For Sartre existence precedes essence meaning that individuals are not born with any predefined purpose or identity instead they must create their essence through their actions and choices This concept places the responsibility for defining oneself squarely on the individual leading to Sartre s famous assertion that man is nothing else but what he makes of himself **Hidden**

Reconsidering Michael Polanyi's Philosophy Stefania Ruzsits Jha, 2017-03-13 The chemist

and philosopher Michael Polanyi 1891-1976 was one of the first twentieth century scientists to propose a program to resolve the internal conflict of the modern Enlightenment scientific detachment and moral nihilism with humanist values Stefania Jha's intellectual biography places Polanyi in the context of his time and culture analyzes his key philosophical ideas and explicates the application and at times misappropriation of his work Polanyi's method was not laid out in his published works and his vocabulary tends to make his writings difficult to understand By exposing the structure of his theory of tacit knowing and by tracing the growth of his thinking Jha shows how the various elements of his thought are integrated Through examination of his philosophical roots in Kant and the complexity of his evolving thought she counteracts the popular notion that Polanyi's philosophy stands apart from the western philosophic tradition Jha's deep analysis makes Polanyi's shift of focus from science to philosophy more intelligible his philosophy more approachable and the causes he championed such as the freedom of science and cultural freedom more understandable Applying his notion of tacit knowing in practical directions Jha seeks to bring the study of Polanyi's philosophy out of the specialists' enclave and into such fields as ethics and clinical medicine
