Sharing The Front Line And The Back Hills:

Sharing the Front Line and the Back Hills Yael Danieli, 2018-10-26 Sharing the Front Line and the Back Hills points to a crisis facing international institutions and the media who seek to alleviate and report human suffering throughout the world. The goals of the editor are to tell the story of thousands of individuals dedicated to helping others and to integrate issues of protection and care into all levels of planning, implementing and evaluating international intervention and action. The book identifies approaches that have proven useful and explores and suggests future directions. *War and Public Health* Barry S. Levy, Victor W. Sidel, 2008 The first comprehensive examination of the relationship between war and public health, this book documents the public health consequences of war and describes what health professionals can do to minimize these consequences and even help prevent war altogether. It explores the effects of war on health, human rights and the environment. The health and environmental impact of both conventional weapons and weapons of mass destruction, nuclear, chemical and biological weapons, is described in chapters that cover the consequences of their production, testing, maintenance, use and disposal. Separate chapters cover especially vulnerable populations such as women, children and refugees. In-depth descriptions of specific military conflicts, including the Vietnam War, the Persian Gulf War and wars in Central America, provide striking illustrations of the issues covered in other chapters. A series of chapters explores the roles of health professionals and of organizations during war and in preventing war and its consequences. This revised second edition includes seven new chapters, including one on landmines by the Nobel Prize winning founding director of the International Campaign to Ban Landmines. A wide range of individuals, including physicians, nurses and other health professionals, will find this book enlightening and useful in their work. The book will be valuable for faculty and students in schools of public health, medicine, nursing and other health professions. In addition, it will be useful to those working in the fields of law, economics, international studies, peace and conflict resolution, military studies, diplomacy and sociology and in related disciplines. Trauma Journalism Mark H. Massé, 2011-10-06 A narrative approach advocating education for students and professionals on the impact of stress, trauma and intervention in the life of a journalist. *Journalism's Roving Eye* John Maxwell Hamilton, 2011-08-15 In all of journalism, nowhere are the stakes higher than in foreign news gathering. For media owners, it is the most difficult type of reporting to finance; for editors, the hardest to oversee. Correspondents roaming large swaths of the planet must acquire expertise that home-based reporters take for granted: facility with the local language, for instance, or an understanding of local cultures. Adding further to the challenges, they must put news of the world in context for an audience with little experience and often limited interest in foreign affairs, a task made all the more daunting because of the consequence to national security. In *Journalism's Roving Eye*, John Maxwell Hamilton, a historian and former foreign correspondent, provides a sweeping and definitive history of American foreign news reporting from its inception to the present day and chronicles the economic and technological advances that have influenced overseas coverage as well as the

cavalcade of colorful personalities who shaped readers' perceptions of the world across two centuries. From the colonial era when newspaper printers hustled down to wharfs to collect mail and periodicals from incoming ships to the ongoing multimedia press coverage of the Iraq War, Hamilton explores journalism's constant and not always successful efforts at dishing the foreign news as James Gordon Bennett put it in the mid-nineteenth century to describe his approach in the *New York Herald*. He details the highly partisan coverage of the French Revolution, the early emergence of special correspondents and the challenges of organizing their efforts, the profound impact of the non-yellow press in the run up to the Spanish American War, the increasingly sophisticated machinery of propaganda and censorship that surfaced during World War I and the golden age of foreign correspondence during the interwar period when outlets for foreign news swelled and a large number of experienced independent journalists circled the globe. From the Nazis' intimidation of reporters to the ways in which American popular opinion shaped coverage of Communist revolution and the Vietnam War, Hamilton covers every aspect of delivering foreign news to American doorsteps. Along the way, Hamilton singles out a fascinating cast of characters among them Victor Lawson, the overlooked proprietor of the *Chicago Daily News* who pioneered the concept of a foreign news service geared to American interests; Henry Morton Stanley, one of the first reporters to generate news on his own with his 1871 expedition to East Africa to find Livingstone; and Jack Belden, a forgotten brooding figure who exemplified the best in combat reporting. Hamilton details the experiences of correspondents, editors, owners, publishers, and network executives as well as the political leaders who made the news and the technicians who invented ways to transmit it. Their stories bring the narrative to life in arresting detail and make this an indispensable book for anyone wanting to understand the evolution of foreign news gathering. Amid the steep drop in the number of correspondents stationed abroad and the recent decline of the newspaper industry, many fear that foreign reporting will soon no longer exist. But as Hamilton shows in this magisterial work, traditional correspondence survives alongside a new type of reporting. Journalism's Roving Eye offers a keen understanding of the vicissitudes in foreign news, an understanding imperative to better seeing what lies ahead.

The United Nations and Human Rights Frédéric Mégret, Philip Alston, 2020-04-02. The very concept of human rights implies governmental accountability. To ensure that governments are indeed held accountable for their treatment of citizens and others, the United Nations has established a wide range of mechanisms to monitor compliance and to seek to prevent as well as respond to violations. The panoply of implementation measures that the UN has taken since 1945 has resulted in a diverse and complex set of institutional arrangements, the effectiveness of which varies widely. Indeed, there is much doubt as to the effectiveness of much of the UN's human rights efforts, but also about what direction it should take. Inevitable instances of politicization and the hostile or at best ambivalent attitude of most governments has at times endangered the fragile progress made on the more technical fronts. At the same time, technical efforts cannot dispense with the complex politics of actualizing the promise of human rights at and through the UN. In addition to significant actual and potential problems of duplication, overlapping, and

inconsistent approaches there are major problems of under funding and insufficient expertise The complexity of these arrangements and the difficulty in evaluating their impact makes a comprehensive guide of the type provided here all the more indispensable These essays critically examine the functions procedures and performance of each of the major UN organs dealing with human rights including the Security Council and the International Court of Justice as well as the more specialized bodies monitoring the implementation of human rights treaties Significant attention is devoted to the considerable efforts at reforming the UN s human rights machinery as illustrated most notably by the creation of the Human Rights Council to replace the Commission on Human Rights The book also looks at the relationship between the various bodies and the potential for major reforms and restructuring

Protection of Civilians Haidi Willmot, Ralph Mamiya, Scott Sheeran, Marc Weller, 2016-04-15 The protection of civilians is a highly topical issue at the forefront of international discourse and has taken a prominent role in many international deployments It has been at the centre of debates on the NATO intervention in Libya UN deployments in Darfur South Sudan and the Democratic Republic of the Congo and on the failures of the international community in Sri Lanka and Syria Various descriptions as a moral responsibility a legal obligation a mandated peacekeeping task and the culmination of humanitarian activity it has become a high profile concern of governments international organisations and civil society and a central issue in international peace and security This book offers a multidisciplinary treatment of this important topic harnessing perspectives from international law and international relations traversing academia and practice Moving from the historical and philosophical development of the civilian protection concept through relevant bodies of international law and normative underpinnings and on to politics and practice the volume presents coherent cross cutting analysis of the realities of conflict and diplomacy In doing so it engages a series of current debates including on the role of politics in what has often been characterized as a humanitarian endeavour and the challenges and impacts of the use of force The work brings together a wide array of eminent academics and respected practitioners incorporating contributions from legal scholars and ethicists political commentators diplomats UN officials military commanders development experts and humanitarian aid workers As the most comprehensive publication on the subject this will be a first port of call for anyone studying or working towards a better protection of civilians in conflict

Making Choices for Peace Elias Omondi Opongo, 2006 *Love and Liberation* Lauren Carruth, 2021-10-15 Lauren Carruth s *Love and Liberation* tells a new kind of humanitarian story The protagonists are not volunteers from afar but rather Somali locals caring for each other nurses aid workers policymakers drivers community health workers and bureaucrats The contributions of locals are often taken for granted and the competencies aspirations and effectiveness of local staffers frequently remain muted or absent from the planning and evaluation of humanitarian interventions structured by outsiders Relief work is traditionally imagined as politically neutral and impartial and interventions are planned as temporary extraordinary and distant Carruth provides an alternative vision of what humanitarian response means in practice not driven

by International Humanitarian Law the missions of Western relief organizations or trends in the aid industry or academia but instead by what Somalis call samafal Samafal is structured by the cultivation of lasting relationships of care interdependence kinship and ethnic solidarity Samafal is also explicitly political and potentially emancipatory humanitarian responses present opportunities for Somalis to begin to redress histories of colonial partitions and to make the most out of their political and economic marginalization By centering Love and Liberation around Somalis understanding and enactments of samafal Carruth offers a new perspective on politics and intervention in Africa

Modern Warfare Benjamin Perrin, 2012-05-15 The face of modern warfare is changing as more and more humanitarian organizations private military companies and non state armed groups enter complex security environments such as Iraq Afghanistan and Haiti Although this shift has been overshadowed by legal issues connected to the War on Terror and intervention in countries such as Rwanda and Sudan it has caused some to question the relevance of the laws of war Modern Warfare explores the law s failure and potential to ensure compliance in the context of a changing military landscape by doing so it opens a path to preventing further unnecessary suffering and violence
