Sharp Eyes John Burroughs American Nat:

Sharp Eyes Charlotte Zoë Walker, 2000-08-01 John Burroughs the genial and tremendously popular author of the nineteenth and early twentieth centuries has gained renewed appreciation at the end of the twentieth century His quiet approach to nature writing a combination of scientific observation and poetic spirit has informed generations of readers This book is a testament to the importance of his work in modern literature In addition to exploring the historical aspects of Burroughs s life and character these works illuminate his role as a writer and his relationships with such contemporaries as Whitman Thoreau Emerson and Muir Frank Bergan discusses Burroughs as environmentalist Bill McKibben writes on Burroughs and the call of the not so wild Daniel Payne expounds on Burroughs s religion of nature Wendell Berry considers the sacred economy of homesteading and Ralph Black provides an analysis on Burroughs and the poetics of the nature essay This book will have special appeal to those interested in nature writing American literature and environmental and cultural history of New York State A section on the history and current use of Burroughs s work in the classroom also makes the book a valuable resource for teachers

Forest and Garden Melanie Louise Simo, 2003 How wild and managed or artificially arranged environments coexist has long been a matter of intense debate among foresters and landscape professionals

Sanctified Landscape David Schuyler, 2012-04-27 The Hudson River Valley was the first iconic American landscape Beginning as early as the 1820s artists and writers found new ways of thinking about the human relationship with the natural world along the Hudson Here amid the most dramatic river and mountain scenery in the eastern United States Washington Irving and James Fenimore Cooper created a distinctly American literature grounded in folklore and history that contributed to the emergence of a sense of place in the valley Painters led by Thomas Cole founded the Hudson River School widely recognized as the first truly national style of art As the century advanced and as landscape and history became increasingly intertwined in the national consciousness an aesthetic identity took shape in the region through literature art memory and folklore even gardens and domestic architecture In Sanctified Landscape David Schuyler recounts this story of America s idealization of the Hudson Valley during the nineteenth and early twentieth centuries Schuyler s story unfolds during a time of great change in American history At the very moment when artists and writers were exploring the aesthetic potential of the Hudson Valley the transportation revolution and the rise of industrial capitalism were transforming the region The first generation of American tourists traveled from New York City to Cozzens Hotel and the Catskill Mountain House in search of the picturesque Those who could afford to live some distance from jobs in the city built suburban homes or country estates Given these momentous changes it is not surprising that historic preservation emerged in the Hudson Valley the first building in the United States preserved for its historic significance is Washington s Headquarters in Newburgh Schuyler also finds the seeds of the modern environmental movement in the transformation of the Hudson Valley landscape Richly illustrated and compellingly written Sanctified Landscape makes for rewarding reading Schuyler expertly ties local history to

national developments revealing why the Hudson River Valley was so important to nineteenth century Americans and why it is still beloved today American Forests ,1926 **A Place for Humility** Christine Gerhardt,2014-09-01 Emily Dickinson and Walt Whitman are widely acknowledged as two of America s foremost nature poets primarily due to their explorations of natural phenomena as evocative symbols for cultural developments individual experiences and poetry itself Yet for all their metaphorical suggestiveness Dickinson s and Whitman s poems about the natural world neither preclude nor erase nature s relevance as an actual living environment In their respective poetic projects the earth matters both figuratively as a realm of the imagination and also as the physical ground that is profoundly affected by human action This double perspective and the ways in which it intersects with their formal innovations points beyond their traditional status as curiously disparate icons of American nature poetry That both of them not only approach nature as an important subject in its own right but also address human nature relationships in ethical terms invests their work with important environmental overtones Dickinson and Whitman developed their environmentally suggestive poetics at roughly the same historical moment at a time when a major shift was occurring in American culture s view and understanding of the natural world Just as they were achieving poetic maturity the dominant view of wilderness was beginning to shift from obstacle or exploitable resource to an endangered treasure in need of conservation and preservation A Place for Humility examines Dickinson s and Whitman s poetry in conjunction with this important change in American environmental perception exploring the links between their poetic projects within the context of developing nineteenth century environmental thought Christine Gerhardt argues that each author s poetry participates in this shift in different but related ways and that their involvement with their culture s growing environmental sensibilities constitutes an important connection between their disparate poetic projects There may be few direct links between Dickinson s letter to the World and Whitman s language experiment but via a web of environmentally oriented discourses their poetry engages in a cultural conversation about the natural world and the possibilities and limitations of writing about it a conversation in which their thematic and formal choices meet on a surprising number of levels **The Environment and the Press** Mark Neuzil,2008-07-16 This history of environmental journalism looks at how the practice now defines issues and sets the public agenda evolving from a tradition that includes the works of authors such as Pliny the Elder John Muir and Rachel Carson It makes the case that the relationship between the media and its audience is an ongoing conversation between society and the media on what matters and what should matter *The Lincoln Library of Essential Information an Up to Date Manual for Daily Reference, for Self Instruction, and for General Culture Named in Appreciative Remembrance of Abraham Lincoln, the Foremost American Exemplar of Self Education* ,1924 American Forests and Forest Life ,1926 **Nature's Bounty** Anthony N. Penna,2016-07-01 This thorough clearly organized text focuses on four major environmental categories forests and land wildlife and wildlife habitat water and drinking water quality and air Each category is treated historically from the time of exploration and discovery in the seventeenth century to the

present There are also discussions on environmental public policy issues currently in our national debate The text is integrated throughout with fascinating primary source documents eyewitness accounts government reports and documents speeches and congressional testimony which illuminate the material The Lincoln Library of Essential Information ,1924
