Shattered Self A Psychoanalytic Study Of Trauma:

The Shattered Self Richard B. Ulman, Doris Brothers, 2013-05-13 Ulman and Brothers utilize a unique clinical research population of rape and incest victims and Vietnam combat veterans to argue that trauma results from real occurrences that have as their unconscious meaning the shattering of central organizing fantasies of self in relation to selfobject Their innovative treatment approach revolves around the transformation of these shattered fantasies in the intersubjective context of the transference countertransference neurosis Trauma and Self Charles B. Strozier, Michael Flynn, 1996 This remarkable collection of original essays written by prominent scholars recognized for their achievements in a wide range of disciplines defines trauma as a disruption in the fragile process of symbolization or the human capacity to imbue life with meaning by representing the self's immortality The contributors analyze the multiple meanings and deeper significance of trauma whether of shell shocked war veterans or victims of sexual abuse and they discuss its manifestations both subtle and obvious in human behavior and memory Organized as an honorary volume to Robert Jay Lifton who identified trauma as the core psychological issue of the postmodern world this book demonstrates how trauma and other fundamental breaks in human continuity inform psychiatric historical religious literary political cultural and scientific interpretations of the self

Toward a Psychology of Uncertainty Doris Brothers, 2011-04-12 Since trauma is a thoroughly relational phenomenon it is highly unpredictable and cannot be made to fit within the scientific framework Freud so admired In *Toward a Psychology of Uncertainty* Trauma Centered Psychoanalysis Doris Brothers urges a return to a trauma centered psychoanalysis Making use of relational systems theory she shows that experiences of uncertainty are continually transformed by the regulatory processes of everyday life such as feeling knowing forming categories making decisions using language creating narratives sensing time remembering forgetting and fantasizing Insofar as trauma destroys the certainties that organize psychological life it plunges our relational systems into chaos and sets the stage for the emergence of rigid life constricting relational patterns These trauma generated patterns which often involve denial of sameness and difference the creation of complexity reducing dualities and the transformation of certainty into certitude figure prominently in virtually all of the complaints for which patients seek analytic treatment Analysts she claims are no more strangers to trauma than are their patients Using in depth clinical illustrations Dr Brothers demonstrates how a mutual desire to heal and to be healed from trauma draws patients and analysts into their analytic relationships She recommends the reconceptualization of what has heretofore been considered transference and countertransference in terms of the transformation of experienced uncertainty In her view the increased ability of both analytic partners to live with uncertainty is the mark of a successful treatment Dr Brothers perspective sheds fresh light on a variety of topics of great general interest to analysts as well as many of their patients such as gender the acceptance of death faith cult like training programs and burnout Her discussions of these topics are enlivened by references to contemporary cinema and theatre

The Self Psychology of Addiction and its Treatment Richard B.

Ulman, Harry Paul, 2013-04-03 In the time of Freud the typical psychoanalytic patient was afflicted with neurotic disorders however the modern day psychotherapy patient often suffers instead from a variety of addictive disorders As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help To address the shift and respond to contemporary patients needs Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options Their honest and unique work provides new ideas that will help gain access to the fantasy worlds of addicted patients The Self Psychology of Addiction and Its Treatment emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction They use the representative subjects to develop a self psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date Integrating Body Self & Psychological Self David W. Krueger, 2013-10-17 David W Krueger illustrates a novel synthesis of fundamental psychodynamic principles with evolving advances in developmental self neuropsychological and attachment theories Focusing on action symptoms self object experiences gender issues embodiment somatic symptoms affect regulation and ego states the theoretical innovations are illustrated by vivid case material He introduces treatment inroads enabling clinicians to hear and articulate arcane messages spoken in metaphor actualized in symptoms and encrypted in the body A fresh conceptualization from an original thinker Integrating Body Self and Psychological Self broadens our understanding of the mind and body interplay in the clinical exchange *The Journal of Transpersonal Psychology*, 2005 **Canadian Journal of Psychiatry**, 1992 Psychoanalysis and Psychotherapy, 1989 Shakespeare Quarterly, 2003 *Casualties Of Childhood* Bobbie Kaufman, Agnes Wohl, 2013-05-24 Against the backdrop of powerful case vignettes and their accompanying House Tree Person and Kinetic Family Drawings the discussion focuses primarily on the essential link between childhood sexual abuse and specific developmental problems Given that sexual abuse is commonly directed toward latency age young people it is imperative that this connection be given greater emphasis in the literature The book represents an important step in that direction In sum the authors bring to life the full dimension of sexual victimization its meaning and consequences for the individual the family and by extension the society For therapists of all persuasions it is a much needed resource **Trauma, Transformation, and Purpose in Life Among Formerly Incarcerated Substance Users** Dina Redman, 2003 *Faces in the Revolution* Gill Straker, 1992 One of South Africa's most serious problems is the large number of youths in the black townships who have been exposed to an incredible depth and complexity of trauma Not only have they lived through severe poverty the deterioration of family and social structures and an inferior education system but they have also been involved in catastrophic levels of violence both as victims and as

perpetrators What are the effects of the milieu What future is there for this generation Above all who are they In the mid 1980s Gill Straker Professor of Psychology at the University of the Witwatersrand was called in by the South African Council of Churches as part of a counseling team to provide therapeutic services for a group of young blacks who had been driven out of their township by vigilantes Their lives had been threatened and many had participated in various forms of violence stoning of vehicles burning of houses belonging to local counselors some even taking part in necklacing This counseling experience together with a follow up study of the same group three years later is the basis of Gill Straker's book *Faces in the Revolution* a fascinating psychological profile of the youngsters involved In her moving and highly readable account she penetrates beyond the media generated stereotype of township youth as a brutalized generation showing instead the processes that motivate the leaders the conformists and the psychological casualties of the civil war that has raged in South Africa's townships *Faces in the Revolution* will bring a great deal of clarity to concerned readers seeking informed insight into the lives of the young black people at the forefront of this undeclared war
