Love And Hate In The Analytic Setting:

Love and Hate in the Analytic Setting Glen O. Gabbard, 2000-04-01 Passionate feelings of love and hate are stirred in psychotherapy Paradoxically these passions may either undermine the therapist catastrophically or serve as the crucible in which profound understanding is forged Transferences and countertransferences of love and hate occur on a spectrum that includes unobjectionable negative and positive feelings relatively benign forms of love and hate and more malignant intractable versions of love and hate that present formidable challenges to the therapist Each of these variations is explored in different chapters of this book Gender configurations gender fluidity adolescent transferences the link between love and lust and passive forms of hating are among the topics discussed Most of all the author noted psychoanalyst Glen Gabbard depicts what it is like to be in the eye of the hurricane when passions are aroused He provides a practical yet theoretically sophisticated guide to the management of love and hate as they are experienced by both patient and therapist **Love and Hate** David Mann, 2013-11-12 Love and hate seem to be the dominant emotions that make the world go round and are a central theme in psychotherapy Love and Hate seeks to answer some important questions about these all consuming passions Many patients seeking psychotherapy feel unlovable or full of rage and hate What is it that interferes with the capacity to experience love This book explores the origins of love and hate from infancy and how they develop through the life cycle It brings together contemporary views about clinical practice on how psychotherapists and analysts work with and think about love and hate in the transference and countertransference and explores how different schools of thought deal with the subject David Mann together with an impressive array of international contributors represent a broad spectrum of psychoanalytic perspectives including Kleinian Jungian Independent Group and Lacanian psychotherapists psychoanalysts and analytical psychologists With emphasis on clinical illustration throughout the writers show how different psychoanalytic schools think about and clinically work with the experience and passions of love and hate It will be invaluable to practitioners and students of psychotherapy psychoanalysis analytical psychology and counselling *Contemporary Psychoanalysis in America* Arnold M. Hate and Love in Psychoanalytical Institutions Jurgen Reeder, 2020-10-13 In *Hate and Love in Psychoanalytic Institutions* Jurgen Reeder investigates the professional superego of the psychoanalyst This superego designates a prescriptive and prohibiting role that the individual must play within the parameters of a certain occupational sphere The prescriptive aspect works like a professional ideal and in this respect the superego can be said to sustain a professional ethos or spirit commanding what the professional should know and what his or her relations to clients and colleagues should resemble It helps to bind the members of the analytical community together The prohibiting aspect installs a vigilant inner eye It offers necessary protection against detrimental aberrations but it also evokes fantasies of critical or condemning colleagues who might have insight into what transpires within the walls of the analyst's own private practice leading to a reluctance to communicate openly about the analytical experience In this sense the professional superego contributes to the paranoization of collegial communication a circumstance that has a hampering effect on spontaneity and creativity in both clinical and theoretical work Jurgen Reeder's groundbreaking research uncovering the dynamics of the professional superego in psychology psychotherapy and psychoanalysis can be applied to other professions as well including social work medicine education law and the ministry

Psychoanalytic Collisions Joyce Anne Slochower, 2013-05-13 In this beautiful work of reflection and self reflection Joyce Slochower wrestles with a seldom acknowledged dimension of being a psychoanalyst the dialectic between illusions and less ideal realities that complicate the analyst's sense of who she is and of how best to meet her clinical obligations *Psychoanalytic Collisions* details the various ways in which the analyst's wishes both professional and personal collide with the less than perfect actualities of everyday clinical work The collisions in question are often rooted in the analyst's own illusions illusions of therapeutic possibility in the face of ordinary human existence or illusions of therapeutic selflessness in the face of one's own immutably self centered humanity Such collisions may complicate nonclinical professional activities such as writing in which the analyst's desire to

develop a personal idiom collides with self doubt and the imagined rebuff of teachers and colleagues Other collisions coalesce dyadically in the consulting room They may reflect sharp dissonance between what the patient needs the analyst to feel and what the latter actually feels as in discrepant experiences of erotic desire They may grow out of colliding idealizations of analyst and patient each of the other And they may arise in the wake of traumatizing life events that destroy the shared illusions on which treatment has rested In finely wrought examinations of these eventualities Slochower is guided by the belief that collisions are intrinsic both to forging an analytic identity and to practicing in a manner consonant with that identity Psychoanalytic collisions she enjoins often cannot be resolved but they can usually be productively engaged And the very act of engagement be it establishing new grounds for collaboration in the wake of real world catastrophe or wrestling with clinical impasse grounded in the radically divergent expectations of analyst and patient or owning up to what Slochower terms secret delinquencies can provide the basis for a vision of the good enough analyst in which therapeutic hopefulness coexists with acceptance of the analyst's all too human fallibility

The Misuse of Persons Stanley J. Coen, 2013-11-26 In this major contribution to contemporary psychoanalysis Stanley Coen illuminates a heretofore undescribed character structure especially resistant to analytic process Pathologically dependent patients for Coen are

identified not by surface character traits but by their response to the intrapsychic demands of analysis. Such patients remain in treatment sometimes contentedly, sometimes amid rebukes and complaints, but they do not profit from it. Their inability to use insight, especially in the transference, is matched by a proclivity for sadomasochistic enmeshment. In analysis, this tendency translates into a continuing dependent attachment to the analyst. In exploring the genetic roots of pathological dependency, Coen ranges beyond extant trauma theories in describing a pattern of parent-child interaction in which repetitive behavioral enactments substitute for the acceptance and resolution of conflicts, both intrapsychic and interpersonal. In analysis, pathologically dependent patients use the analyst as they have come to use significant others throughout their lives, as part of a defensive structure characterized by repetitive enactments and a refusal to face what is wrong with them. This misuse of others is infused with destructiveness, hostility, and rage, and the analyst necessarily becomes the object of these powerful emotions. With such patients, then, the road to therapeutic progress invariably passes through the analysis of mutual transference and countertransference. Hate, the patient's tempting invitations to collusion and avoidance notwithstanding.

Many Voices Pamela Cooper-White, 2006-11 This book is a full-scale disciplinary framework for pastoral psychotherapists, pastoral counselors at intermediate and advanced levels of clinical training, and also for experienced pastoral counselors and psychotherapists in professional practice. It harvests the great potential of postmodern sensibilities to help accompany and support individuals, couples, and families in recognizing and healing especially painful psychic wounds and/or longstanding patterns of self-defeating relationships to self and others. Pamela Cooper-White's widely praised work, which has always integrated cutting-edge notions from the social sciences into pastoral therapy, here takes a distinctive and promising turn toward the relational and the theological. Pastoral psychotherapy, she argues, needs to find its framework in a strongly relational idea of the person-God and health. Illustrated throughout by four key case studies, Cooper-White shows in Part 1 how multiplicity and relationality provide a dynamic and exciting way of viewing human potential and pain. In Part 2, she unfolds the practical applications of this paradigm for a strongly empathic therapeutic relationship and process.

Phenomenologies of Love, 2025-03-13 This edited volume offers a comprehensive view of various possible phenomenological approaches of the experience of love, ranging from classical historical perspectives up to contemporary and critical viewpoints. Other Times, Other Realities Arnold H. Modell, 1990 Nearly a century has passed since Freud's theories unleashed a revolution in our understanding of the human psyche. Yet as Arnold Modell firmly points out, we still do not possess a theory that explains how psychoanalysis works. *Other Times, Other Realities* provides brilliant insight into this perplexing problem and lays the foundation for a comprehensive theory of psychoanalytic treatment. Modell's careful consideration of Freudian theory, the interpretations of contemporary ego

psychology and the contribution of object theory discloses the changing significance of the fundamental elements of the therapeutic process In *Other Times Other Realities* readers will discover an illuminating synthesis of concepts underlying the various interpretations of the psychoanalytic process

Love, Hate and Knowledge Robert Waska, 2018-04-17 This book introduces the clinical concept of analytic contact This is a term that describes the therapeutic method of investigation that makes up psychoanalytic treatment The field has been in debate for decades regarding what constitutes psychoanalysis This usually centers on theoretical ideals regarding analyzability goals or procedure and external criteria such as frequency or use of couch Instead the concept of analytic contact looks at what takes place with a patient in the clinical situation Each chapter in this book follows a wide spectrum of cases and clinical situations where hard to reach patients are provided the best opportunity for health and healing through the establishment of analytic contact This case material closely tracks each patient's phantasies and transference mechanisms which work to either increase oppose embrace or neutralize analytic contact In addition the fundamental internal conflicts all patients struggle with between love hate and knowledge are represented by extensive case reports

Shadow of the Other Jessica Benjamin, 2013-10-31 *Shadow of the Other* is a discussion of how the individual has two sorts of relationships with an other other beings other individuals The first regards the other as an entirely different being from oneself but one which is still recognizable The second understands and recognizes this other by its function as a repository of characteristics cast from oneself In recognizing how this dual relationship is reconciled within the self and its implications in male female relations Jessica Benjamin continues her exploration of intersubjectivity and gender taking up questions of contemporary debates in feminist theory and psychoanalysis

Affect Intolerance in Patient and Analyst Stanley J. Coen, 2002 The ability of psychotherapists to tolerate their own feelings in the clinical situation determines how their patients experience and tolerate their own intense and often distressing affect Dr Stanley J Coen draws on his own struggles with the most difficult and challenging patients in his practice and finds that affect intolerance in both patient and therapist can be mitigated and understood when therapists broaden their emotional range enabling them to engage in emotionally richer interactions with the patient The more of their own feelings and wishes that clinicians can take responsibility for the more they can tolerate contain and eventually interpret what patients find emotionally unbearable Dr Coen describes in detail how he works with difficult patients trying to engage them as deeply and fully as both they and he can tolerate Coen focuses on the pragmatic use of affect tolerance in the clinical situation Real change through treatment requires mobilization of intense feeling including hate and love Therapists too must contend with their own emotional inhibitions and stalemates and he suggests collaborative ways to help them He encourages therapists to broaden their

perspectives consult with colleagues listen to others write about their difficulties work in peer supervision and perhaps even go back to treatment themselves He counsels them to study one another s difficult cases in a spirit of collegiality to learn what is most effective for patients Coen shares his own experiences in troublesome clinical situations to help other therapists identify similar difficulties He shows how all therapists can be prepared to catch their own vulnerabilities and discomforts with their patients passions and how they can then subject their feelings to self scrutiny By seeking to understand and confront their struggles with the feelings that their patients arouse therapists can more fully help their patients work out their conflicts and to expand their emotional depth A
