

Love Vs. In Love

There is a difference between loving someone and being in love with someone. Love is a more broad feeling used to describe the deep affection felt towards other people in one's family or social circle, as well as partners.

Because of its broad meaning, there are different types of love: love at first sight, platonic love, familial love, romantic love, and even romantic attraction could be considered a form of love for some people. Knowing the difference between being in love and loving the person can sometimes be difficult to notice. However, it is important to note that love can also fluctuate during a relationship.
