introduction to ARUNA 2007 2008 was titled Towards a New Global Protocol on Climate Change in which he argued that solving the climate change problem will demand four steps: scientific consensus, public awareness, the development of alternative technologies and a global framework for action. He dealt in particular with the science underpinning the negotiations for a new global protocol on climate change as a successor to the Kyoto Protocol. Professor Sachs argued that climate change crises can only be solved through the goals, leadership and treaty mechanisms of the UN.

International Law of Sharks
 Erika J. Techera, Natalie Klein, 2017-04-18
 In *International Law of Sharks*, Erika J. Techera and Natalie Klein provide an in-depth analysis of the current legal frameworks that relate to these important species. The authors offer ways in which to overcome obstacles that prevent existing laws from working better and identify best practice global governance options while highlighting opportunities for legal reform. Scientific evidence indicates that sharks play a critical role in maintaining marine ecosystem health, yet current governance regimes have not been effective and many shark species continue to diminish. In this context, effective laws are critical to improve sharks' conservation status. This volume also explores the broader relevance of oceans governance by identifying appropriate legal frameworks and regulatory mechanisms that balance conservation and utilisation of marine species in general.

Chondrichthyes Luis Fernando Rodrigues-Filho,João Bráullio De Luna Sales,2017-12-20 Chondrichthyes are a group of cartilaginous fish where we have sharks rays and chimeras as members This group plays an important role in aquatic ecology as they act as predators throughout the food chain e g sharks However many populations of Chondrichthyes are threatened by several factors increased direct fishing high mortality rate as accompanying fauna marine pollution habitat destruction etc These declines are evident in many parts of the world and have come to the attention of scientists conservation organizations the media and the general public Fisheries legislation regulating international fisheries markets has been amended to provide greater protection for this group along with other species of fish However little is known about these species which reinforces the importance of studies in order to have a better understanding of the elasmobranch stocks as well as to identify the influences of the anthropic action of fishing In response to knowledge on the low sustainability of cartilaginous fish fisheries on a global scale FAO has developed an international plan of action for the management and conservation of these fish with the aim of developing and implementing national plans of action to ensure management and conservation of these stocks having as main recommendation the collection of information about the Chondrichthyes especially the sharks Even so this group is little known in terms of biodiversity ecology behavior and a host of other characteristics relevant to this taxon which is very worrying Chondrichthyes Multidisciplinary Approach attempts to portray to the readers up to date information on Chondrichthyes to promote an overview of the current taxon serving as an indispensable source of access to more accurate and detailed information on shark rays and chimeras
