Masonry Construction Structural Mechanics And Other Aspects:

Masonry Construction C.R. Calladine, 2013-03-09 This volume contains eight contributions on the common theme of masonry construction. The publication coincides with the retirement of Dr Jacques Heyman from his Professorship of Engineering in the University of Cambridge and Headship of the University's Engineering Department. It is entirely appropriate to have a collection of papers in honour of Professor Heyman at this time for he has made signal contributions to our understanding of masonry construction over the past thirty years or so. It is no exaggeration to say that he has radically changed the way in which engineers think about masonry structures particularly in relation to the old ecclesiastical buildings and bridges. Indeed it is hard to imagine what this subject would be like today in the absence of Professor Heyman's seminal papers. **Masonry Construction**, 1992 **New Approaches to Structural Mechanics, Shells and Biological Structures**

Horace R. Drew, Sergio Pellegrino, 2013-03-09 This Festschrift marks the retirement of Professor Chris Calladine FRS after 42 years on the teaching staff of the Department of Engineering, University of Cambridge. It contains a series of papers contributed by his former students, colleagues and friends. Chris Calladine's research has ranged very widely across the field of structural mechanics with a particular focus on the plastic deformation of solids and structures and the behaviour of thin shell structures. His insightful books on Engineering Plasticity and Theory of Shell Structures have been appreciated by many generations of students at Cambridge and elsewhere. His scientific contribution outside engineering in molecular structures is at least as significant and he is unique among engineers in having co-authored a book on DNA. Also he has been keenly interested in the research of many students and colleagues and on many occasions his quick grasp and physical insight have helped a student and sometimes a colleague find the nub of the problem without unnecessary effort. Many of the papers contained in this volume gratefully acknowledge this generous contribution. We thank Professor G M I Gladwell for reading through all of the contributions. Mrs R Baxter and Mrs O Constantinides for help in preparing this volume. Godfrey Argent Studio for permission to reproduce Calladine's portrait for the Royal Society and Dr A

Schouwenburg from Kluwer for his assistance. Horace R Drew Sergio Pellegrino ix **CHRIS CALLADINE SOME THOUGHTS**
