## **Master Of Airpower:**

Master of Airpower David R. Mets, 1988      **Master of Airpower** David Mets, 1997-10-14 A valuable and long overdue biography of one of America's greatest soldiers Parameters The story of Gen Carl Tooey Spaatz's life is more than a biography of one of America's great military leaders It is a history of the development of airpower and a fascinating inside look at the long difficult struggle to win autonomy for the U S Air Force Spaatz earned his wings in 1918 when flying was a new and dangerous occupation aviation school mortality rates were 18 percent After gaining experience as a fighter pilot during the Great War he became one of the Air Corps top pursuit commanders during the 1920s During the 1930s he moved over to bombers just as modern long range aircraft were coming into service As a senior bomber commander Spaatz significantly influenced the emerging strategic bomber doctrine By the time of the outbreak of the Second World War Spaatz was one of America's most experienced aviators He was at the helm of the evolution of the new American military strategic airpower doctrine which proved to be a decisive factor in World War II After the Allied victory planning and launching an independent Air Force would occupy Spaatz for the remainder of his career Today's Air Force bears his indelible stamp Tooey Spaatz was a low profile leader who was known for his open mind and pragmatic approach and who was influential in a quiet forceful way Possessed of absolute integrity even when his beliefs were unpopular he pressed them at the risk of his career      Masters of the Air MTI Donald L. Miller, 2024-01-23 A history recounting the events and experiences of the World War II bomber pilots of the U S Eighth Air Force the armed forces group that conducted daytime bombing of Germany in advance of the Allied soldiers arrival on the ground      **American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane, 2000 The Korean War was the first armed engagement for the newly formed U S Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air force generals shaped the air force's mission and strategy He also addresses misunderstandings about plans to use nuclear biological and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war The book considers not only the actual air effort in Korea but also its ramifications The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability

to deliver nuclear weapons in a high intensity conflict a position that left it unprepared to fight the next limited war in Vietnam As America observes the fiftieth anniversary of its initial engagement in Korea Crane s book is an important reminder of the lessons learned there And as airpower continues to be a cornerstone of American defense this examination of its uses in Korea provides new insights about the air force s capabilities and limitations **The Great Air Race** John Lancaster,2022-11-15 The untold almost unbelievable story of the daring pilots who risked their lives in an unprecedented air race in 1919 and put American aviation on the map Years before Charles Lindbergh s flight from New York to Paris electrified the nation a group of daredevil pilots most of them veterans of the World War I brought aviation to the masses by competing in the sensational transcontinental air race of 1919 The contest awakened Americans to the practical possibilities of flight yet despite its significance it has until now been all but forgotten In *The Great Air Race* journalist and amateur pilot John Lancaster finally reclaims this landmark event and the unheralded aviators who competed to be the fastest man in America His thrilling chronicle opens with the race s impresario Brigadier General Billy Mitchell who believed the nation s future was in the skies Mitchell s contest critics called it a stunt was a risky undertaking given that the DH 4s and Fokkers the contestants flew were almost comically ill suited for long distance travel engines caught fire in flight crude flight instruments were of little help in clouds and fog and the brakeless planes were prone to nosing over on landing Yet the aviators possessed an almost inhuman disregard for their own safety braving blizzards and mechanical failure as they landed in remote cornfields or at the edges of cliffs Among the most talented were Belvin The Flying Parson Maynard whose dog Trixie shared the rear cockpit with his mechanic and John Donaldson a war hero who twice escaped German imprisonment Jockeying reporters made much of their rivalries and the crowds along the race s route exploded with everyday Americans eager to catch their first glimpse of airplanes and the mythic birdmen who flew them The race was a test of endurance that many pilots didn t finish some dropped out from sheer exhaustion while others betrayed by their engines or their instincts perished For all its tragedy Lancaster argues the race galvanized the nation to embrace the technology of flight A thrilling tale of men and their machines *The Great Air Race* offers a new origin point for commercial aviation in the United States even as it greatly expands our pantheon of aviation heroes ***A Century of Air Power Leadership*** Jacob Neufeld,2007

*Airpower Advantage* Diane Therese Putney,2004 American air power is a dominant force in today s world Its ascendancy evolving in the half century since the end of World War II became evident during the first Gulf War Although a great deal has been written about military operations in Desert Shield and Desert Storm this deeply researched volume by Dr Diane Putney probes the little known story of how the Gulf War air campaign plan came to fruition Based on archival documentation and interviews with USAF planners this work takes the reader into the planning cells where the difficult work of building an air campaign plan was accomplished on an around the clock basis The tension among air planners is palpable as Dr Putney traces the incremental progress and friction along the way The author places the complexities of the planning process within

the context of coalition objectives All the major players are here President George H W Bush General H Norman Schwarzkopf General Colin Powell General Chuck Horner and Secretary of Defense Richard Cheney The air planning process generated much debate and friction but resulted in great success a 43 day conflict with minimum casualties Dr Putney s rendering of this behind the scenes evolution of the planning process in its complexity and even suspense provides a fascinating window into how wars are planned and fought today and what might be the implications for the future C R Anderegg Director of Air Force History *United States Code* United States,2018 *Architect of Air Power* Brian D. Laslie,2017-10-06 A biography of the pioneering four star general chronicling his influence on the United States Air Force At age 36 Laurence S Kuter 1905 1979 became the youngest general officer since William T Sherman He served as deputy commander of allied tactical air forces in North Africa during World War II and helped devise the American bombing strategy in Europe Although his combat contributions were less notable than other commanders in the Eighth Air Force few officers saw as many theaters of operation as he did or were as highly sought after After World War II he led the Military Air Transport Service Air University Far East Air Forces and served as commander in chief of the North American Air Defense Command NORAD Despite these accomplishments and others however Kuter remains widely underappreciated In *Architect of Air Power* Brian D Laslie offers the first biography of this important but unsung pioneer whose influence can be found in every stage of the development of an independent US Air Force From his early years at West Point to his days at the Air Corps Tactical School to his leadership role at NORAD Kuter made his mark with quiet efficiency He was an early advocate of strategic bombardment rather than pursuit or fighter aviation fundamentally changing the way air power was used and later helped implement the Berlin airlift in 1948 In what would become a significant moment in military history he wrote Field Manual 100 20 which is considered the Air Force s declaration of independence from the Army Drawing on diaries letters and scrapbooks Laslie offers a complete portrait of this influential soldier *Architect of Air Power* illuminates Kuter s pivotal contributions and offers new insights into critical military policy and decision making during the Second World War and the Cold War Praise for *Architect of Air Power* Laslie expertly brings into focus perhaps the least known of the major Air Force personalities of World War II and the early Cold War Kuter was the indispensable behind the scenes man in those years and this book fills a similarly indispensable gap in our understanding of the people and ideas that propelled the nation s air arm to independence and prominence Thomas Alexander Hughes author of *Over Lord General Pete Quesada and the Triumph of Tactical Air Power in World War II* Laslie s outstanding work on Laurence Kuter is the first full and highly effective look at this exceptionally important airman It gives the reader ample evidence of Kuter s central role in making America the quintessential airpower nation during the course of the twentieth century This will be the book on Kuter for many years to come Robert S Ehlers Jr author of *The Mediterranean Air War Airpower and Allied Victory in World War II* ***The Paths Of Heaven: The Evolution Of Airpower Theory: The School Of Advanced Airpower Studies*** Philip S. Paola Lo Cascio, Antoni Segura i Mas, Alberto Pellegrini, 2014-10-16 This volume is the result of an academic initiative organized by the Center for International Historical Studies of the University of Barcelona CEHI UB in April 2012 with the purpose of bringing Military History to the center of the attention of university and historiographical debate This choice is based on the idea that too often Military History is considered a technical discipline only intended for experts On the contrary we think that on the one hand this research field constitutes an unavoidable tool for the interpretation of the historical processes of contemporaneity and that on the other Military History is among the most interesting research fields because of its intrinsic interdisciplinarity On the basis of these considerations the congress and the resulting book propose the analysis of some of the main war processes of the twentieth century from a perspective that could situate them in the wider background defined by the conflicts themselves The book gathers the contributions of Professors Fortunato Minniti University of Roma Tre Rome Giuseppe Conti University La Sapienza Rome Joan Villarroja University of Barcelona Allan R

Millett University of New Orleans and Antoni Segura i Mas University of Barcelona respectively about World War I war intelligence the Spanish Civil War World War II and the asymmetric conflicts ranging from the Cold War to more recent examples *National Defense Authorization Act for Fiscal Year 2000* United States. Congress. House. Committee on Armed Services,1999 *Airmen and air theory a review of the sources* Phillip S. Meilinger,2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America s greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done **The Regulars** Edward M. Coffman,2009-07-01 In 1898 the American Regular Army was a small frontier constabulary engaged in skirmishes with Indians and protesting workers 43 years later it was a large modern army ready to wage war against the Germans and the Japanese In this social history of America s standing army a military historian tells how that transformation was accomplished **Journal of the House of Representatives of the United States** United States. Congress. House,1998 Some vols include supplemental journals of such proceedings of the sessions as during the time they were depending were ordered to be kept secret and respecting which the injunction of secrecy was afterwards taken off by the order of the House *Fighting from Above* Brian D. Laslie,2024-03-19 The story of the United States Air Force USAF stretches back to aerial operations prior to the First World War well before the USAF became a separate service and looks forward to a new era of airpower in space *Fighting from Above* presents a concise account of this expansive history offering a new perspective on how the air forces of the United States created an independent way of warfare over time From the earliest battles of the USAF s predecessor organizations to its modern incarnation Brian D Laslie identifies four distinct and observable ways of war that developed over four distinct epochs Beginning with the development of early air power 1906 1941 he highlights the creation of roles and missions with bombardment theory and practice ascendant An era of strategic dominance 1942 1975 followed in which the ideas of strategic bombardment ruled the air force when such notions were unceremoniously proven false during the Vietnam era conflicts a period of tactical ascendancy 1975 2019 began Finally Laslie considers the current environment where much of the story of the USAF remains unwritten as it grapples with the prospects and challenges posed by drones and the U S Space Force While detailing combat operations *Fighting from Above* also pays close attention to technology politics rivalries
