Ben-Tov, 2025-10-01 The Artificial Paradise shows how science fiction is a powerful purveyor of cultural myths rooted in the history of the West myths that shape American attitudes toward nature technology and the pursuit of happiness Sharona Ben Tov posits the theory that science fiction is an American national mode of thinking which seeks to replace nature with technological worlds paradoxically in hope of regaining a mythic magical American Eden Science fiction imagery from fifties sci fi through women s sci fi and cyberpunk keeps alive the desires of and anxieties born during the Scientific Revolution when the Western view of nature changed radically Ben Tov discusses sci fi classics like Dune The Dispossessed Neuromancer Vonnegut s fiction and the Aliens movie in relation to ancient and modern myths of nature to scientific projects like the atom bomb Strategic Defense Initiative robotics virtual reality and to cultural psychology The book will appeal to those interested in popular culture literature and feminist studies It will also enchant general readers who are interested in science fiction especially readers who want to understand more about the relationship between technology and society The Artificial Paradise sets out to map the cultural anxieties that have beset Western thinking since the Scientific Revolution and to investigate the ills that flow from the split in Western thinking between nature and culture and subject and object and how the split is expressed and reinforced in popular culture and particularly in written science fiction A thought provoking wide ranging book written in an admirably lucid style Sarah Lefanu author of *Feminism and Science Fiction* The examination of America s uneasy relationship with nature is an illuminating approach which draws together science fiction studies and American studies The witty and readable style should attract a wide readership Brian Attebery Idaho State University The Artificial Paradise is at once intellectually provocative knowledgeable and literate As our lives become increasingly determined by technology we will need to turn to such thinkers as Dr Ben Tov to guide us through its dangers and pleasures Alan Lightman Massachusetts Institute of Technology Sharona Ben Tov is Assistant Professor of Creative Writing and English Bowling Green State University She is author of *During Ceasefire* Harper Collins a book of poems **Quran & My Qibla** Jamir Ahmed Choudhury, 2020-01-31 Quran and My Qibla Kitaaba Wal Hikmata IV represents the authority of infallible and unerring revelations removing all doubts and it speaks for itself It also represents the Verifiable Framework of Natural

Magnetic and Nonmagnetic Angela Royston,2008 Provides a simple explanation of the differences between magnetic and nonmagnetic materials and includes examples of their uses in everyday life *Climate Change in the Age of Artificial Intelligence* Alexandru Balasescu,2025-06-14 This book invites the reader to follow seemingly unrelated paths towards the same goal making sense of what it means to be human in a world that casually blends discourses on nature technology and biology with ideas of progress optimization and their capitalization at the centre The author critically analyses current thinking which often looks at technological solutions to the challenges posed by climate change and where artificial intelligence is instrumental in fulfilling the promise of ecological capitalism He instead advocates that we take a closer look at the politics of optimization within and outside managerial perspectives which could reveal that one of the main sources of our repeated failures related to governance and climate change lies not intrinsically in the qualities of the tools we use but in the underlying assumptions with which we design and in the scope of their use Therefore the book looks at possible solutions for humanity that may lie between the rock of technology and the hard place of nature That is it asks for a revision in our implicit assumptions for building our tools critiques the thinking about our relationships with them and re assesses their use Richly documented imaginatively argued and captivatingly written this book explores unexpected entanglements of nature

culture and technology that emerge in A I s unruly and unforeseen trajectories George Paul Meiu Professor of Anthropology University of Basel Balasescu develops wide ranging thick descriptions that provocatively draw together lotus flowers and data banks snakes and algorithms to delve into how bodies cultures and power are invisibly ensconced in every aspect of the digital realm Susan Ossman Distinguished Professor of Anthropology University of California Riverside This important work traces the evolution and development of the paradigms that made artificial intelligence possible and perhaps even inevitable Guy Nasmyth Associate faculty Royal Roads University Alec Balasescu skillfully broadens our horizons for not just nuanced thinking and diverse ways of knowing but in a fast changing landscape how we might more consciously choose to act and relate to nature Wanda Krause award winning author program head Global Leadership and associate professor Royal Roads University
