Rocky Mountain Divide John B. Wright,2010-07-22 The opposing forces of conservation and development have shaped and will continue to shape the natural environment and scenic beauty of the American West Perhaps nowhere are their opposite effects more visible than in the neighboring states of Colorado and Utah so alike in their spectacular mountain environments yet so different in their approaches to land conservation This study explores why Colorado has over twenty five land trusts while Utah has only one John Wright traces the success of voluntary land conservation in Colorado to the state s history as a region of secular commerce As environmental consciousness has grown in Colorado people there have embraced the businesslike approach of land trusts as simply a new more responsible way of conducting the real estate business In Utah by contrast Wright finds that Mormon millennialism and the belief that growth equals success have created a public climate opposed to the formation of land trusts As Wright puts it environmentalism seems to thrive in the Centennial state within the spiritual vacuum which is filled by Mormonism in Utah These findings remind conservationists of the power of underlying cultural values that affect their efforts to preserve private lands

The Geography of God's Incarnation Ann Pederson,2013-07-25 What does geography have to do with the incarnation of God and with our spiritual lives as Christians We will embark on a theological road trip that explores how geographies are at the heart of understanding of God s incarnation in the world It is no surprise to Christians that the center of the incarnation is the person of Jesus Christ God in flesh made manifest However it might be a stretch for some Christians to imagine that the promise that God has become flesh is not only in a person but also in a place in the creation Christians need to expand what incarnation means and what it means to be created in the image of God so that the scope of God s creative and redemptive action and work indeed reaches to the scope of all things from the outer reaches of space to the inner reaches of our hearts To be the creatures of God that God calls us to be requires a kind of dual citizenship within the details of our daily life attending to the needs of our neighbors simultaneously knowing we are part of a greater cosmos whose future is still unfolding

English-Speaking World Françoise Besson,2020-06-01 The essays in this book written by poets novelists mountain climbers and academics from all over the world evoke the representation of mountains in the English speaking world as artists writers philosophers or mountain climbers have represented them from the sixteenth to the twenty first centuries From the Alps to the Pyrenees from Mount Fuji to Mount Shasta from the Himalayas to the Scottish Highlands from Ikere in Nigeria to Devil s Tower in the United States from Uluru in Australia to the most northern mountain of the Arctic the shapes of the world speak the same language and tell the world its own story This interdisciplinary book weaving together

mountaineering literature philosophy painting cinema ecology history palaeontology geography geopolitics toponymy law religion and myth invites people to an innovative reading of mountains it reveals the close relationship existing between the shapes of the world and all forms of writing and at the same time it shows how the representations of the imagination may be instrumental in protecting the natural world The story told by the landscape inscribes a broken line in the shapes of the world tearing the landscape like a fragile page whenever historical and political events wars mining or deforestation leave scars in the landscape but writers and artists representations of mountains constitute a path to awareness as they are not only a painting of beauty but an image of our link to nature and a warning as well For centuries the image of the mountain has conveyed a symbolism telling the story of human thought and this book shows to what extent literature and art play an essential part in our awareness of nature
