Sustainability on Campus Peggy F. Barlett, Geoffrey W. Chase, 2004 Stories both practical and inspirational about environmental leadership on campus These personal narratives of greening college campuses offer inspiration motivation and practical advice Written by faculty staff administrators and a student from varying perspectives and reflecting divergent experiences these stories also map the growing strength of a national movement toward environmental responsibility on campus Environmental awareness on college and university campuses began with the celebratory consciousness raising of Earth Day 1970 Since then environmental action on campus has been both global in research and policy formation and local in efforts to make specific environmental improvements on campuses The stories in this book show that achieving environmental sustainability is not a matter of applying the formulas of risk management or engineering technology but part of what the editors call the messy reality of participatory engagement in cultural transformation In Sustainability on Campus campus leaders recount inspiring stories of strategies that moved eighteen colleges and universities toward a more sustainable future This book is for faculty students administrators staff and community partners whether hesitant or committed knowledgeable or newcomer Scholars and activists have recognized the crucial role that higher education can play in the sustainability effort and each chapter in the book is full of ideas about how to get started revitalize efforts and overcome roadblocks Human and at times joyful these stories illustrate many forms of leadership in new courses and faculty development green buildings and administrative policies student programs residential life and collaborations with local communities

Voices of Indigenuity Michelle Montgomery, 2023-12-01 Voices of Indigenuity collects the voices of the Indigenous Speaker Series and multigenerational Indigenous peoples to introduce best practices for traditional ecological knowledge TEK In this edited collection presenters from the series both within and outside of the academy examine the ways they have utilized TEK for inclusive teaching practices and in environmental justice efforts Advocating for and providing an expansion of place based Indigenized education that infuses Indigenous epistemologies for student success in both K 12 and higher education curricula these essays explore topics such as land fragmentation remote sensing and outreach through the lens of TEK demonstrating methods of fusing learning with Indigenous knowledge IK

Contributors emphasize the need to increase the perspectives of IK within institutionalized knowledge beyond being co-opted into non Indigenous frameworks that may be fundamentally different from Indigenous ways of thinking. Decolonizing current harmful pedagogical curricula and research training about the natural world through an Indigenous guided approach is an essential first step to rebuilding a healthy relationship with our environment while acknowledging that all relationships come with an ethical responsibility. *Voices of Indigenuity* captures the complexities of exploring the contextualized meanings for why TEK should be integrated into Western environmental science processes and frameworks while rooted in Indigenous studies programs.

Higher Education and the Challenge of Sustainability Peter Blaze Corcoran, Arjen E.J. Wals, 2007-05-08. Sustainability challenges universities around the world to rethink their missions and to restructure their courses, research programs and life on campus. Graduates are increasingly exposed to notions of sustainability which are emotionally, politically, ethically and scientifically charged. They must be able to deal with conflicting norms and values, uncertain outcomes and futures and a changing knowledge base. At the same time, they will need to be able to contextualize knowledge in an increasingly globalized society. This book provides a variety of valuable theoretical and practical resources for students, teachers, researchers and administrators who seek to integrate sustainability in higher education. Sustainability is not only explored as both an outcome and a process of learning but as a catalyst for educational change and institutional innovation.

The book raises the various problematics related to this inchoate field and provides an intellectual history and critical assessment of the prospects for institutionalizing sustainability in higher education [Come Sit on My Tangerine Couch](#) Carol Y.
