Bogowie: A Study of Eastern Europe's Ancient Gods T.D. Kokoszka, 2023-08-25 T D Kokoszka grew up in Texas with a Jewish mother and a Polish American father While he was aware of roots going back to Eastern Europe from both families he found it hard to learn very much about them He knew that Polish people would whack one another with palm leaves around Easter and he knew that his great grandmother purportedly believed in forest spirits known as borowy However it wasn't until he was in his teens that he became vaguely aware of an ancient people known as the Slavs who gave rise to the Polish Ukrainian Russian Serbian Bulgarian Slovakian Slovene and Czech languages It quickly became clear to

him that this was a family of cultures currently under represented in popular culture and even in western scholarship Not simply a regurgitation of scholarship from the Soviet period and presenting new analyses by using previously neglected resources Bogowie A Study of Eastern Europe s Ancient Gods offers one of the most painstaking scholarly reconstructions of Slavic paganism These new resources include not only an overview of folklore from many different Slavic countries but also comparisons with Ossetian culture and Mordvin culture as well as a series of Slavic folktales that Kokoszka analyzes in depth often making the case that the narratives involved are mythological and shockingly ancient Readers will recognize many European folktale types and possibly learn to look at these folktales differently after reading this book *Creation Myths of the World* David A. Johnson,2013-03-28 Porphyry a native of Phoenicia educated in Athens and Rome during the third century AD was one of the most important Platonic philosophers of his age In this book Professor Johnson rejects the prevailing modern approach to his thought which has posited an early stage dominated by Oriental superstition and irrationality followed by a second rationalizing or Hellenizing phase consequent upon his move west and exposure to Neoplatonism Based on a careful treatment of all the relevant remains of Porphyry s originally vast corpus much of which now survives only in fragments he argues for a complex unity of thought in terms of philosophical translation The book explores this philosopher s critical engagement with the processes of Hellenism in late antiquity It provides the first comprehensive examination of all the strands of Porphyry s thought that lie at the intersection of religion theology ethnicity and culture *The Cavern's Wise Woman: The Bear Goddess* Annie Welch,

Aztec Latin Andrew Laird,2024 In 1536 only fifteen years after the fall of the Aztec empire Franciscan missionaries began teaching Latin classical rhetoric and Aristotelian philosophy to native youths in central Mexico The remarkable linguistic and cultural exchanges that would result from that initiative are the subject of this book Aztec Latin highlights the importance of Renaissance humanist education for early colonial indigenous history showing how practices central to humanism the cultivation of eloquence the training of leaders scholarly translation and antiquarian research were transformed in New Spain to serve Indian elites as well as the Spanish authorities and religious orders While Franciscan friars inspired by Erasmus ideal of a common tongue applied principles of Latin grammar to Amerindian languages native scholars translated the Gospels a range of devotional literature and even Aesop s fables into the Mexican language of Nahuatl They also produced significant new writings in Latin and Nahuatl adorning accounts of their ancestral past with parallels from Greek and Roman history and importing themes from classical and Christian sources to interpret pre Hispanic customs and beliefs Aztec Latin reveals the full extent to which the first Mexican authors mastered and made use of European learning and provides a timely reassessment of what those indigenous authors really achieved **The**

Counterheritage Denis Byrne,2014-04-16 The claim that heritage practice in Asia is Eurocentric may be well founded but the view that local people in Asia need to be educated by heritage practitioners and governments to properly conserve their heritage distracts from the responsibility of educating oneself about the local popular beliefs and practices which constitute the bedrock of most people s engagement with the material past Written by an archaeologist who has long had one foot in the field of heritage practice and another in the academic camp of archaeology and heritage studies *Counterheritage* is at once a forthright critique of current heritage practice in the Asian arena and a contribution to this project of self education Popular religion in Asia including popular Buddhism and Islam folk Catholicism and Chinese deity cults has a constituency that accounts for a majority of Asia s population making its exclusion from heritage processes an issue of social justice but more pragmatically it

explains why many heritage conservation programs fail to gain local traction This book describes how the tenets of popular religion affect building and renovation practices and describes how modernist attempts to suppress popular religion in Asia in the early and mid twentieth century impacted religious heritage Author Denis Byrne argues that the campaign by archaeologists and heritage professionals against the private collecting and looting of antiquities in Asia largely ignores the regimes of value which heritage discourse has helped erect and into which collectors and local diggers play Focussing on the Philippines Thailand and Taiwan but also referencing China and other parts of Southeast Asia richly detailed portraits are provided of the way people live with old things and are affected by them Narratives of the author s fieldwork are woven into arguments built upon an extensive and penetrating reading of the historical and anthropological literature The critical stance embodied in the title counterheritage is balanced by the optimism of the book s vision of a different practice of heritage advocating a view of heritage objects as vibrant agentic things enfolded in social practice rather than as inert and passive surfaces subject to conservation

Ancestors, Territoriality, and Gods Ina Wunn, Davina Grojnowski, 2016-07-27 This books sets out to explain how and why religion came into being Today this question is as fascinating as ever especially since religion has moved to the centre of socio political relationships In contrast to the current but incomplete approaches from disciplines such as cognitive science and psychology the present authors adopt a new approach equally manifest and constructive that explains the origins of religion based strictly on behavioural biology They employ accepted research results that remove all need for speculation Decisive factors for the earliest demonstrations of religion are thus territorial behaviour and ranking coping with existential fears and conflict solution with the help of rituals These in turn in a process of cultural evolution are shown to be the roots of the historical and contemporary religions

Exceeding Reason Dennis Vanden Auweele, 2020-10-12 The work of the later Schelling in and after 1809 seems antithetical to that of Nietzsche one a Romantic idealist and Christian the other Dionysian anti idealist and anti Christian Still there is a very meaningful and educative dialogue to be found between Schelling and Nietzsche on the topics of reason freedom and religion Both of them start their philosophy with a similar critique of the Western tradition which to them is overly dualist rationalist and anti organic metaphysically ethically religiously politically In response they hope to inculcate a more lively view of reality in which a new understanding of

freedom takes center stage This freedom can be revealed and strengthened through a proper approach to religion one that neither disconnects from nor subordinates religion to reason Religion is the dialogical other to reason one that refreshes and animates our attempts to navigate the world autonomously In doing so Schelling and Nietzsche open up new avenues of thinking about the relationship between freedom reason and religion
