Soule,1883 **Westminster Part I: The Art, Architecture and Archaeology of the Royal Abbey** Warwick Rodwell,Tim Tatton-Brown,2020-04-27 The British Archaeological Association s 2013 conference was devoted to the study of Westminster Abbey and the Palace of Westminster It also embraced Westminster School which was founded at the Reformation in the Abbey precinct Collectively these institutions occupy a remarkable assemblage of medieval and later buildings most of which are well documented Although the Association had held a conference at Westminster in 1902 this was the first time that the internationally important complex of historic buildings was examined holistically and the papers published here cover a wide range of subject matter Westminster came into existence in the later Anglo Saxon period and by the mid 11th century when Edward the Confessor s great new abbey was built it was a major royal centre two miles south west of the City of London Within a century or so it had become the principal seat of government in England and this series of twenty eight papers covers new research on the topography buildings art history architecture and archaeology of Westminster s two great establishments Abbey and Palace Part I begins with studies of the topography of the area an account of its Roman period finds and an historiographical overview of the archaeology of the Abbey Edward the Confessor s enigmatic church plan is discussed and the evidence for later Romanesque structures is assembled for the first time Five papers examine aspects of Henry III s vast new Abbey church and its decoration A further four cover aspects of the later medieval period coronation and Sir George Gilbert Scott s impact as the Abbey s greatest Surveyor of the Fabric A pair of papers examines the development of the northern precinct of the Abbey around St Margaret s Church and the remarkable buildings of Westminster School created within the remains of the monastery in the 17th and 18th centuries Part II part deals with the Palace of Westminster and its wider topography between the late 11th century and the devastating fire of 1834 that largely destroyed the medieval palace William Rufus s enormous hall and its famous roofs are completely reassessed and comparisons discussed between this structure and the great hall at Caen Other essays reconsider Henry III s palace St Stephen s chapel the king s great chamber the Painted Chamber and the enigmatic Jewel Tower The final papers examine the meeting places of Parliament and the living accommodation of the MPs who attended it the topography of the Palace between the Reformation and the fire of 1834 and the building of the New Palace which is better known today as the Houses of Parliament [Out of the Melting Pot, Into the Fire](#) Jens Kurt Heycke,2023-04-11 The melting pot has been the prevailing ideal for integrating new citizens through most of America s history yet contemporary elites often reject it as antiquated and racist Instead they advocate multiculturalism which promotes ethnic boundaries and distinct group identities Both models have precedents across the centuries as Jens

Heycke demonstrates in a contribution to the debate that incorporates an international historical perspective Heycke surveys multiethnic polities in history focusing on societies that have shifted between the melting pot and multicultural models Beginning with ancient Rome he demonstrates the appeal of a unifying syncretic identity that diverse individuals can join regardless of their ethnic or racial origins He details how early Islam with its ideal of an inclusive ummah integrated diverse groups and even different faiths into a cohesive and flourishing society Both civilizations eventually abandoned their integrative ideals in favor of a multicultural paradigm The consequences of that paradigm shift are instructive for societies that seek to emulate it In the modern era many nations have implemented multicultural policies like group preferences to compensate for past injustices or current disparities Heycke examines some notable examples Yugoslavia Rwanda and Sri Lanka These nations were on a rough trajectory toward ethnic tolerance and comity a trajectory that multicultural policies altered dramatically They contrast with Botswana a country that opposes group distinctions so resolutely that it prohibits the collection of racial and ethnic statistics Since World War II ethnic conflicts have killed over ten million people But the consequences of ethnic division go far beyond that Heycke analyzes those consequences in an international statistical survey of ethnic fractionalization This survey combined with the extensive historical record of multiethnic societies illustrates the staggering costs of accentuating group differences and the benefits of a unifying identity that transcends those differences

The Discovery of Freedom in Ancient Greece Kurt Raaflaub,2004-02 Although there is constant conflict over its meanings and limits political freedom itself is considered a fundamental and universal value throughout the modern world For most of human history however this was not the case In this book Kurt Raaflaub asks the essential question when why and under what circumstances did the concept of freedom originate To find out Raaflaub analyses ancient Greek texts from Homer to Thucydides in their social and political contexts Archaic Greece he concludes had little use for the idea of political freedom the concept arose instead during the great confrontation between Greeks and Persians in the early fifth century BCE Raaflaub then examines the relationship of freedom with other concepts such as equality citizenship and law and pursues subsequent uses of the idea often paradoxically as a tool of domination propaganda and ideology Raaflaub s book thus illuminates both the history of ancient Greek society and the evolution of one of humankind s most important values and will be of great interest to anyone who wants to understand the conceptual fabric that still shapes our world views
