Human Landscapes in Classical Antiquity John Salmon, Graham Shipley, 2013-02-01 Human Landscapes in Classical Antiquity shows how today's environmental and ecological concerns can help illuminate our study of the ancient world The contributors consider how the Greeks and Romans perceived their natural world and how their perceptions affected society The effects of human settlement and cultivation on the landscape are considered as well as the representation of landscape in Attic drama Various aspects of farming such as the use of terraces and the significance of olive growing are examined The uncultivated landscape was also important hunting was a key social ritual for Greek and hellenistic elites and wild places were not wastelands but played an essential economic role The Romans' attempts to control their environment are analyzed This volume shows how Greeks and Romans worked hand in hand with their natural environment and not against it It represents an outstanding collaboration between the disciplines of history and archaeology **Roman Italy** Timothy W. Potter, 1987 This is the first general survey of Roman Italy that brings together the wealth of evidence available from literary sources inscriptions and the exciting recent discoveries in Roman archaeology Potter's account is one of the few to cover the whole period of Roman Italy Roman Britain Timothy W. Understanding Integration in the Roman World ,2023-09-14 Integration is a buzzword in the 21st century However academics still do not agree on its meaning and above all on its consequences This book offers numerous examples showing

that the inhabitants of the Roman Mediterranean were integrated i.e. were aware of the existence of a common framework of coexistence without this necessarily resulting in a process of cultural convergence For instance the Spanish poet Martial explicitly refused to be considered the brother of the Greek Charmenton 10 65 paradoxically while reaffirming their differences his satirical epigram confirms the existence of a common frame of reference that encompassed them both Understanding integration in the Roman world requires paying attention to the complex and varied responses to diversity in Roman times The Politics of Identity in Visigothic Spain Jamie Wood, 2012-03-20 This book reappraises the historical writings of the seventh century Spanish bishop Isidore of Seville as a coherent and pastorally informed programme intended to reconcile the population of Spain to their recent conquest by the barbarian Visigoths **Explore Ancient Rome!** Carmella Van Vleet, 2008-03-01 Investigate the fascinating civilization of ancient Rome through 25 hands on projects and activities for young readers ages 6 9 Kids learn about ancient Roman homes food playtime clothing conquests gods entertainment and more Activities range from creating an amphora and making a tunic to baking bread and hosting a Roman feast By combining a hands on element with riddles jokes fun facts and comic cartoons kids Explore Ancient Rome and develop an understanding of how this ancient civilization laid the foundation of our modern world *Isidore of Seville* Saint Isidore (of Seville), 2008 This latest volume in the Ancient Christian Writers series offers an English translation of Isidore of Seville's *De Ecclesiasticis Officiis* an invaluable source of information about liturgical practice and church offices in the seventh century **BOOK JACKET** *Urban Interactions* Michael J. Kelly, Michael Burrows, 2020 This volume is dedicated to eliciting the interactions between localities across late antique and early medieval Europe and the wider Mediterranean Significant research has been done in recent years to explore how late Roman and post Roman cities towns and other localities communicated vis vis larger structural phenomena such as provinces empires kingdoms institutions and so on This research has contributed considerably to our understanding of the place of the city in its context but tends to portray the city as a necessarily subordinate conduit within larger structures rather than an entity in itself or as a hermeneutical object of enquiry Consequently not enough research has been committed to examining how local people and communities thought about engaged with and struggled against nearby or distant urban neighbors *Urban Interactions* addresses this lacuna in urban history by presenting articles that apply a diverse spectrum of approaches from archaeological investigation to critical analyses of historiographical and historical biases and developmental consideration of antagonisms between ecclesiastical centers Through these avenues of investigation this volume elucidates the relationship between the urban centers and their immediate hinterlands and neighboring cities with which they might vie or collaborate This entanglement and competition whether subterranean or explicit across overarching political religious or other macro categories is evaluated through a broad geographical range of late Roman provinces and post Roman states to maintain an expansive perspective of developmental trends within and about the city **Regional Urban Systems in the Roman World, 150 BCE - 250 CE**

,2019-12-16 The focus of *Regional Urban Systems in the Roman World* is on urban hierarchies and interactions in large geographical areas rather than on individual cities Based on a painstaking examination of archaeological and epigraphic evidence relating to more than 1 000 cities the volume offers comprehensive reconstructions of the urban systems of Roman Gaul North Africa Sicily Greece and Asia Minor In addition it examines the transformation of the settlement systems of the Iberian Peninsula and the central and northern Balkan following the imposition of Roman rule Throughout the volume regional urban configurations are examined from a rich variety of perspectives ranging from climate and landscape administration and politics economic interactions and social relationships all the way to region specific ways of shaping the townscapes of individual cities

Rome's Armies to the Death of Augustus Tony McArthur,2024-09-30 National armies as we know them today are a comparatively recent development It has been assumed that the Romans had an army similar to the national institutions of advanced almost exclusively European powers at the end of the nineteenth century But the assumption was wrong as is the belief that changes seen in the armies can be explained because the Romans reformed their armies Up to the death of Augustus the Romans had no permanent military forces Roman armies were raised for particular campaigns and disbanded at their conclusion Repeated campaigns were conducted in places like northern Italy and Spain but the armies were always disbanded These armies were not seen by Romans as part of a national institution as modern armies are they were simply a part of the life of a Roman citizen like religion or elections These armies were more like a militia than a national army There is little evidence even of systematic training and what changes can be detected can be better explained by contingent adaptation to circumstances rather than reform The emperor Augustus is commonly seen as the originator of the imperial armies but it was an unintended outcome of a long life
