Rome's Eastern Trade Gary K. Young, 2003-10-04 Utilising new archaeological research the author questions the traditionally held view that the imperial government had a strong political interest in eastern trade Instead he argues that their primary motivation was the tax income Trade, Commerce, and the State in the Roman World Andrew Wilson, Alan Bowman, 2017-11-03 This volume presents eighteen papers by leading Roman historians and archaeologists discussing trade in the Roman Empire during the period c 100 BC to AD 350 It focuses especially on the role of the Roman state in shaping the institutional framework for trade within and outside the empire in taxing that trade and in intervening in the markets to ensure the supply of particular commodities especially for the city of Rome and for the army As part of a novel interdisciplinary approach to the subject the chapters address its myriad facets on the basis of broadly different sources of evidence historical papyrological and archaeological They are grouped into three sections covering institutional factors taxation legal structures market regulation financial institutions evidence for long distance trade within the empire in wood stone glass and pottery and trade beyond the frontiers with the east as far as China India Arabia the Red Sea and the Sahara Rome's external trade with realms to the east emerges as being of particular significance but it is in the eastern part of the empire itself where the state appears to have adapted the mechanisms of taxation in collaboration with the elite holders of wealth to support its need for revenue On the other hand the price of that collaboration which was in effect a fiscal partnership ultimately led in the longer term in slightly different forms in the east and the west to a fundamental change in the political character of the empire Settlement and Soldiers in the Roman Near East David Kennedy, 2024-10-28 The Roman Near East has been a source of fascination and exasperation an immense area a rich archaeological heritage as well as documents in several local languages a region with a great depth of urbanisation and development yet relatively neglected by modern researchers and difficult to work on and in Local archaeologists are often under funded and the Roman period viewed as an earlier phase of western colonialism Happily the immense surge in archaeological and historical research on the Roman period everywhere has included the Roman Near East and there have been significant academic developments This collection of studies on the Roman Near East represents Professor Kennedy's academic assessment of the region which began with his doctoral thesis on the contribution of Syria to the Roman army Although the thesis was never published several articles owe their genesis to work done then or soon after and are included here VI VII IX XII Initial visits to military sites in Syria and Jordan swiftly brought out the presence in many cases of associated civil settlements and though often now gone the traces of ancient field systems Hence the two prominent sub themes in this collection are the Roman military and various aspects of society and settlement settlement types farming logistical underpinning and communications **The Oxford Handbook of Roman Egypt** Christina Riggs, 2012-06-21 This handbook arranged in seven thematic sections is unique in drawing together many different strands of research on Roman Egypt in order to suggest both the state of

knowledge in the field and the possibilities for collaborative synthetic and interpretive research

Economics Giuseppe Dari-Mattiacci, Dennis P. Kehoe, 2020-05-26 Ancient Rome is the only society in the history of the western world whose legal profession evolved autonomously distinct and separate from institutions of political and religious power Roman legal thought has left behind an enduring legacy and exerted enormous influence on the shaping of modern legal frameworks and systems but its own genesis and context pose their own explanatory problems The economic analysis of Roman law has enormous untapped potential in this regard by exploring the intersecting perspectives of legal history economic history and the economic analysis of law the two volumes of Roman Law and Economics are able to offer a uniquely interdisciplinary examination of the origins of Roman legal institutions their functions and their evolution over a period of more than 1000 years in response to changes in the underlying economic activities that those institutions regulated Volume I explores these legal institutions and organizations in detail from the constitution of the Roman Republic to the management of business in the Empire while Volume II covers the concepts of exchange ownership and disputes analysing the detailed workings of credit property and slavery among others Throughout each volume contributions from specialists in legal and economic history law and legal theory are underpinned by rigorous analysis drawing on modern empirical and theoretical

techniques and methodologies borrowed from economics In demonstrating how these can be fruitfully applied to the study of ancient societies with due deference to the historical context Roman Law and Economics opens up a host of new avenues of research for scholars and students in each of these fields and in the social sciences more broadly offering new ways in which different modes of enquiry can connect with and inform each other

Rome and China Walter Scheidel, 2009-02-05 Transcending ethnic linguistic and religious boundaries early empires shaped thousands of years of world history Yet despite the global prominence of empire individual cases are often studied in isolation This series seeks to change the terms of the debate by promoting cross cultural comparative and transdisciplinary perspectives on imperial state formation prior to the European colonial expansion Two thousand years ago up to one half of the human species was contained within two political systems the Roman empire in western Eurasia centered on the Mediterranean Sea and the Han empire in eastern Eurasia centered on the great North China Plain Both empires were broadly comparable in terms of size and population and even largely coextensive in chronological terms 221 BCE to 220 CE for the Qin Han empire c 200 BCE to 395 CE for the unified Roman empire At the most basic level of resolution the circumstances of their creation are not very different In the East the Shang and Western Zhou periods created

a shared cultural framework for the Warring States with the gradual consolidation of numerous small polities into a handful of large kingdoms which were finally united by the westernmost marcher state of Qin In the Mediterranean we can observe comparable political fragmentation and gradual expansion of a unifying civilization Greek in this case followed by the gradual formation of a handful of major warring states the Hellenistic kingdoms in the east Rome Italy Syracuse and Carthage in the west and likewise eventual unification by the westernmost marcher state the Roman led Italian confederation Subsequent destabilization occurred again in strikingly similar ways both empires came to be divided into two halves one that contained the original core but was more exposed to the main barbarian periphery the west in the Roman case the north in China and a traditionalist half in the east Rome and south China These processes of initial convergence and subsequent divergence in Eurasian state formation have never been the object of systematic comparative analysis This volume which brings together experts in the history of the ancient Mediterranean and early China makes a first step in this direction by presenting a series of comparative case studies on clearly defined aspects of state formation in early eastern and western Eurasia focusing on the process of initial developmental convergence It includes a general introduction that makes the case for a comparative approach a broad sketch of the character of state formation in western and eastern Eurasia during the final millennium of antiquity and six thematically connected case studies of particularly salient aspects of this process **The Oxford**

Adams,2007-03-15 Publisher description **Lettered Christians** Lincoln Blumell,2012-03-02 With the discovery of the Oxyrhynchus Papyri just over a century ago a number of important texts directly relating to ancient Christianity have come to light While certain literary texts have received considerable attention in scholarship by comparison the documentary evidence relating to Christianity has received far less attention and remains rather obscure To help redress this imbalance and to lend some context to the Christian literary materials this book examines the extant Christian epistolary remains from Oxyrhynchus between the third and seventh centuries CE Drawing upon this unique corpus of evidence which until this point has never been collectively nor systematically treated this book breaks new ground as it employs the letters to consider various questions relating to Christianity in the Oxyrhynchite Not only does this lucid study fill a void in scholarship it also gives a number of insights that have larger implications on Christianity in late antiquity
