This book puts together contributions of linguists and psycholinguists whose main interest here is the representation of Semitic words in the mental lexicon of Semitic language speakers The central topic of the book confronts two views about the morphology of Semitic words The point of the argument is Should we see Semitic words morphology as root based or word based The proponents of the root based approach present empirical evidence demonstrating that Semitic language speakers are sensitive to the root and the template as the two basic elements bound morphemes of Semitic words Those supporting the word based approach present arguments to the effect that Semitic word formation is not based on the merging of roots and templates but that Semitic words are comprised of word stems and affixes like we find in Indo European languages The variety of evidence and arguments for each claim should force the interested readers to reconsider their views on Semitic morphology Pre-Algebra, Grades 5 - 8 Shireman,2008-09-08 Take the abstract out of algebra for students in grades 5 and up using Pre Algebra This 82 page book covers topics such as number systems integers order of operations variables and exponents rectangular coordinates linear equations and graphing It helps students strengthen problem solving abilities increases positive attitudes and encourages in depth study The book also includes reproducibles and an answer key
