Measuring Medical Professionalism David Thomas Stern, 2006 Patients who are confident of physicians intellectual and technical abilities are sometimes not convinced of their professional behavior Systemic and anecdotal cases of physician misconduct conflict of interest and self interest abound Many have even come to mistrust physicians as patient advocates How can patients trust the intellectual and technical aspects of medical care but not the professional In order to enhance and promote professionalism in medicine one should expect it encourage it and evaluate it By measuring their own professional behavior physicians can provide the kind of transparency with which they can regain the trust of patients and society Not only patients but also institutions which accredit organizations have demanded accountability of physicians in their professional behavior While there has been much lament and a few strong proposals for improving professionalism no single reliable and valid measure of the success of these proposals exists This book is a theory to practice text focused on ways to evaluate professional behavior written by leaders in the field of medical education and assessment *Qualitative Organizational Research Volume 1* Kimberly D. Elsbach, 2005-06-01 Over the past five years the Davis Conference on Qualitative Research has welcomed research projects by the very best qualitative organizational researchers in the world This conference has helped authors develop and hone theoretical ideas in an environment friendly to qualitative methods and more importantly has begun to build a community of qualitative researchers that work on organizational and management issues The authors winning the Best Presentation Awards at the Davis Conference over the past five years have contributed chapters to this volume The ideas in these chapters were born before the conference but were nurtured through dialogue at the conference and subsequently matured through later interactions among the community of qualitative scholars associated with the conference As such this volume represents the fruits of our collective labor as a qualitative research community This collective and iterative process is a hallmark of qualitative methods and often leads to a counter intuitive ah hah experience for the researcher This volume showcases some of the very best of those ah hah experiences from the organizational qualitative research community *Educating For Professionalism* Delese Wear, Janet Bickel, 2009-05 The thirteen essays in *Educating for Professionalism* examine the often conflicting ethical social emotional and intellectual messages that medical institutions send to students about what it means to be a doctor Because this disconnection between what medical educators profess and what students experience is partly to blame for the current crisis in medical professionalism the authors offer timely reflective analyses of the work and opportunities facing medical education if doctors are to win public trust In their drive to improve medical professionalism within the world of academic medicine editors Delese Wear and Janet Bickel have assembled thought provoking essays that elucidate the many facets of teaching valuing and maintaining medical professionalism in the middle of the myriad challenges facing medicine at the dawn of the twenty first century The collection traces how the values of altruism and service can influence not only mission statements and admission policies but also the
