The collection offers an insight into the key theorists and considers how the economics and politics of their time and personal ideology influenced their ideas about childhood. It looks at curricula and provision which have proved inspirational and how these have impacted on policy and practice in different parts of the world. The handbook also explores alternative and perhaps less familiar philosophies and ideas about babies and young children, their place in society and the ways in which it might be appropriate to educate them. Bringing together specially commissioned pieces by a range of international authors, this handbook will enable academics, research students, practitioners and policy makers to reflect on their own

understandings and approaches as well as the assumptions made in their own and other societies. **Young Learners** Sarah Phillips, 2013-03-08. Practical ideas are provided for a wide variety of language practice activities. By Sarah Phillips. Part of the Primary Resource Books for Teachers series. **Acquiring Culture (Psychology Revivals)** Gustav Jahoda, Ioan

Lewis, 2015-03-27. Until the 70s and 80s, anthropologists studying different cultures had mainly confined themselves to the behaviour and idea systems of adults. Psychologists, on the other hand, working mainly in Europe and America, had studied child development in their own settings and simply assumed the universality of their findings. Thus, both disciplines had largely ignored a crucial problem area: the way in which children from birth onwards learn to become competent members of their culture. This process, which has been called the quintessential human adaptation, constitutes the theme of this volume, originally published in 1988. It derives from a workshop held at the London School of Economics which brought together fieldworkers who in their studies had paid more than usual attention to children in their cultures. Their experience and foci of interest were varied, but this very diversity serves to illuminate different facets of the acquisition of culture by children, ranging in age from pre-verbal infants to adolescents. Evolutionarily primed for culture learning, children are responsive to a rich web of influences, from subtle and indirect as in their music and dance to direct teaching in the family, guided by culture-specific ideas about child psychology. Some of the salient things they learn relate to gender status and power, critical for the functioning of all societies. The introductory essay provides the necessary historical background of the development of child study in both anthropology and psychology and outlines how future research in the ethnography of childhood should proceed. The book concludes with an annotated bibliography providing a guide to the literature from 1970 onwards. Early Literacy

Storytimes @ Your Library® Saroj Nadkarni Ghoting, Pamela Martin-Diaz, 2006. Provides practical strategies for developing children's early literacy skills and contains information on phonological awareness, vocabulary, narrative skills and more.

Literacy Learning in the Early Years Caroline Barratt-Pugh, Mary Rohl, 2020-07-16. Children's early experiences of literacy have a major influence on how they continue to learn as they grow older. Children enter early childhood programs and school with a wealth of knowledge and understandings of literacy. It is critical that early childhood professionals and teachers recognise and build on this learning. *Literacy Learning in the Early Years* offers a practical introduction to literacy issues for early childhood professionals and teachers working with children aged 0-8 in childcare, preschool and school.
