Invisible Language Garth L. Hallett, 2014-03-06 Invisible Language Its Incalculable Significance for Philosophy reveals that although the use of language is visible or audible the medium employed boasts neither of these attributes Garth L. Hallett suggests that from Plato until now the intangibility of language has exercised a far more profound influence in philosophy than even Wittgenstein came close to demonstrating Indeed without that pervasive factor of language the history of philosophy would have been undeniably different Yet philosophy is and can legitimately aspire to be much more than a struggle between language and human comprehension of it Ultimately this book suggests that philosophy's positive possibilities so often obscured by linguistically inattentive practice reach as far as human thought can reach

The Problem of Naturalism Brian Lightbody, 2013-05-09 Philosophers often use the term naturalism in order to describe their work It is commonplace to see a metaphysical epistemological and/or ethical position self-described and described by others as one that is naturalized But what if anything does the term naturalized add or subtract to the position being articulated I demonstrate in The Problem of Naturalism Analytic and Continental Perspectives that the term naturalism connotes such a broad meaning that it is difficult to demarcate naturalism from philosophy itself Still many philosophers have tried to provide non-trivial and non-vacuous definitions of the term My book by and large argues that such attempts are unsuccessful Instead I argue that naturalism is an attitude and neither a methodology nor a substantive position I then articulate the guidelines the naturalist needs to follow as well as the virtues he or she needs to practice in order for the term naturalism to do any meaningful work Much of the book explains and then critiques the various attempts to define naturalism in the Anglo-American secondary literature Some of the criticisms I raise seem to emanate from the internal logic of the naturalistic

position being expressed However others have emerged from gleaning the work of such Continental thinkers as Nietzsche Husserl Heidegger and Foucault I use these thinkers in order to expose the unjustified implicit and sometimes explicit assumptions that many naturalistic philosophers presume to hold when they attempt to render a clear distinct and robust naturalist position

Neuropsychology of Children in Africa Michael J. Boivin, Bruno Giordani, 2013-05-13 Increasingly global humanitarian efforts are focusing on improving the lives of children And among the developing world the African nations are particularly affected by extreme weather conditions devastating pandemics and armed conflict Neurocognitive science offers significant avenues toward bringing needed aid to the continent while creating a template for helping children worldwide The studies in Neuropsychology of Children in Africa clearly illustrate how the brain develops and adjusts in the face of adversity Contributors span assessment approaches and public health risk factors and represent established topics and emerging lines of research including biocultural constructs and genomic technologies Together these chapters argue for methodology that is culturally sensitive scientifically rigorous consistent and sustainable And although the focus is pediatric the book takes a lifespan approach to prevention and intervention modeling a universal framework for understanding neurocognitive development Included in the coverage Assessment of very young children in Africa in the context of HIV Psychosocial aspects of malnutrition among African children Assessment of neuropsychological outcomes in pediatric severe malaria Neurodisability screening using the Ten Questions questionnaire The neuropsychology of sickle cell disease in West African children Computerized Cognitive Rehabilitation Therapy for African children As a guide to current findings or a springboard for new studies Neuropsychology of Children in Africa is a necessary reference for researchers policymakers and diverse professionals in global aid organizations and across the discipline

Cartesian Poetics Andrea Gadberry, 2020-11-10 What is thinking? What does it feel like? What is it good for? Andrea Gadberry looks for answers to these questions in the philosophy of René Descartes and finds them in the philosopher's implicit poetics. Gadberry argues that Descartes's thought was crucially enabled by poetry and shows how markers of poetic genres from love lyric and elegy to the puzzling forms of the riddle and the anagram betray an impassioned negotiation with the difficulties of thought and its limits. Where others have seen Cartesian philosophy as a triumph of reason, Gadberry reveals that the philosopher, accused of having slashed poetry's throat, instead enlisted poetic form to contain thought's frustrations. Gadberry's approach to seventeenth-century writings poses questions urgent for the twenty-first. Bringing literature and philosophy into rich dialogue, Gadberry centers close reading as a method uniquely equipped to manage skepticism, tolerate critical ambivalence, and detect feeling in philosophy. Helping us read classic moments of philosophical argumentation in a new light, this elegant study also expands outward to redefine thinking in light of its poetic formations.

Between Two Worlds John Carriero, 2009 *Between Two Worlds* is an authoritative commentary on and powerful reinterpretation of the founding work of modern philosophy: Descartes's *Meditations*. Philosophers have tended to read Descartes's seminal work in an occasional way, examining its treatment of individual topics while ignoring other parts of the text. In contrast, John Carriero provides a sustained, systematic reading of the whole text, giving a detailed account of the positions against which Descartes was reacting and revealing anew the unity, meaning, and originality of the *Meditations*. Carriero finds in the *Meditations* a nearly continuous argument against Thomistic-Aristotelian ways of thinking about cognition and shows more clearly than ever before how Descartes bridged the old world of scholasticism and the new one of mechanistic naturalism. Rather than casting Descartes's project primarily in terms of skepticism, knowledge, and certainty, Carriero focuses on fundamental disagreements between Descartes and the scholastics over the nature of understanding, the relation between the senses and the intellect, the nature of the human being, and how and to what extent God is cognized by human beings. Against this background, Carriero shows Descartes developed his own conceptions of mind, body, and the relation between them, creating a coherent philosophically rich project in the *Meditations* and setting the agenda for a century of rationalist metaphysics.

Argument and Persuasion in Descartes' Meditations David Cunniff, 2010-07-23 Descartes' *Meditations on First Philosophy* has proven to be not only one of the canonical texts of Western philosophy but also the site of a great deal of interpretive activity in scholarship on the history of early modern philosophy. Over the last two decades, David Cunniff's monograph proposes a new interpretation which is that from beginning to end, the reasoning of the *Meditations* is the first-person reasoning of a thinker who starts from a confused, non-Cartesian paradigm and moves slowly and awkwardly toward a grasp of just a few of the central theses of Descartes's system. The meditator of the *Meditations* is not a full-blown Cartesian at the start, or middle, or even the end of inquiry, and

accordingly the Meditations is riddled with confusions throughout Cunniff argues that Descartes is trying to capture the kind of reasoning that a non Cartesian would have to engage in to make the relevant epistemic progress and that the Meditations rhetorically models that reasoning He proposes that Descartes is reflecting on what happens in philosophical inquiry we are unclear about something we roam about using our existing concepts and intuitions we abandon or revise some of these and then eventually we come to see a result as clear that we did not see as clear before Thus Cunniff's fundamental insight is that Descartes is a teacher and the reader a student With that reading in mind a significant number of the interpretive problems that arise in the Descartes literature dissolve when we make a distinction between the Cartesian and non Cartesian elements of the Meditations and a better understanding of surrounding texts is achieved as well This important volume will be of great interest to scholars of early modern philosophy
