Tsagalis,2024-09-03 The Doloneia is the most controversial book of the Iliad its authenticity having been doubted since antiquity Modern scholars are divided between those who regard it as a major interpolation by a later poet who was trained in the technique of epic composition and those who see it as the earliest manifestation of the very ancient theme of lochos However the first claim assumes the stylistic homogeneity of book 10 while the second sweeps out dictional and thematic difficulties by attributing them to the theme of ambush that is weakly represented in the extant corpus of archaic Greek epic By applying sophisticated interpretive tools such as intratextual association intertextual allusion and oral neoanalysis this book maintains that Iliad 10 is thematically consonant with the rest of the Iliad and that it has evolved from an earlier Iliadic version after the addition of the Rhesus episode which did not circulate as an independent composition but formed part of lost oral epic poetry with cyclic

features that focused on the events after the death of Achilles      **Medieval Warhorse** Oliver H. Creighton, Robert Liddiard, Alan K. Outram, Carly Ameen, Kate Kanne, 2025-02-24 The image of the armoured knight mounted on his charging warhorse is one of the most evocative of the Middle Ages As distinctive symbols of social status horses were central to the medieval aristocratic image and closely bound up with concepts of knighthood and chivalry while as weapons of war bred for size strength and stamina they changed the face of battle Drawing upon new interdisciplinary research this volume presents a fresh perspective on warhorses and medieval horses generally in Britain understood within its wider European context It adopts an integrated approach that covers the full array of evidence for medieval horses from their physical remains bones teeth and DNA equipment and armour through to visual sources such as sculpture and wall paintings and documentary and landscape evidence for the environments in which they were bred and trained Analyses of these sources of information are first presented individually and then integrated and cross compared with the historical record to present a new chronology of horse stature conformation and appearance and to generate new understandings of the changing place of the horse in the medieval world      **Journal of Medieval Military History: Volume XXII** Kelly DeVries, John France, Clifford J. Rogers, 2024-06-25 The leading academic vehicle for scholarly publication in the field of medieval warfare Medieval Warfare The articles in volume 22 of the Journal of Medieval Military History range widely not only in chronology but also in geography and approach Sven Ekdahl looks at the big picture of the role of Swedish castles in the north L J Andrew Villalon focuses on the very particular and culturally significant rewards given by the Catholic Kings to two noble families to celebrate minor victories on the borders of Granada in the far south Subjects include fighting at the tactical level the unexpectedly substantial tradition of mounted archery in England the Low Countries and France revealed by Sanders Goevarts the operational level Emperor Louis II s logistics in Italy treated by Elijah T Wallace and the strategic level King John s employment of naval power analyzed by Adam M McNeil Vladimir Aleksy and Damjan Prlin evi consider military political geographical demographic and economic factors to contextualize the military history of the rich mining town of Novo Brdo in Serbia as it faced the rising tide of Ottoman conquest in the last century of the Middle Ages Three contributions draw on the rich resources of the English royal archives to illuminate the material and technological tools of medieval warfare individual weapons most significantly both longbows and short bows described with exceptional detail in a murder case of 1315 Clifford J Rogers the horses of Henry V in the Agincourt campaign of 1415 Gary P Baker and the military equipment stored at Dover Castle as described in inventories dating from 1320 to 1437 Dan Spencer      *Another 1000 Famous Horses* FJH Glover, 2022-11-13 This 2nd book is a continuation of the 1st book The index at the back of the book is brilliant The contents list at the front of the book is in alphabetical order and is a list of the horses names gives paragraph numbers Whereas the Index gives the Rider Owner in alphanumeric order and gives paragraph numbers So if you do not know the name of a persons horse you would look up the person in the Index and it would indicate the paragraph numbers to find the

answer For instance Steptoe and Son would be under S in the Index and this would lead you to Hercules the strong man from Greek Mythology Or Toy Story 2 would lead you to Bullseye Books 3 and 4 are in the process of compiling it s a Never Ending Story
