Marietta and Ernie O Byrne's garden situated on one and a half acres in Eugene Oregon is filled with an incredible array of plants from around the world. By consciously leveraging the garden's many microclimates they have created a stunning patchwork of exuberant plants that is widely considered one of America's most outstanding private gardens. In *A Tapestry Garden* the O Byrnes share their deep knowledge of plants and essential garden advice. Readers will discover the humble roots of the garden, explore the numerous habitats and the plants that make them shine and find inspiration in photography that captures the garden's astonishing beauty. There is something here for every type of gardener: a shade garden, perennial borders, a chaparral garden, a kitchen garden and more. Profiles of the O Byrne's favorite plants including hellebores, trilliums, arisaemas and alpine plants include comprehensive growing information and tips on pruning and care. *A Tapestry Garden* captures the spirit of a very special place.

Public Garden Management: a Global Perspective Bijan Dehgan, 2014-04-16

*Public Gardens Management: A Global Perspective* provides essential information about public gardens and what is involved in designing, managing and maintaining one. Although suitable as a textbook, its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen. It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden, a fact reflected in the extensive reference citations. The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he/she was in a natural but well-ordered garden environment. Thus began the art of garden making. Many volumes have been written on every applicable subject discussed in this and similar publications. Indeed the voluminous literature on history, design, horticulture and numerous related subjects is nothing short of overwhelming. Accordingly, anyone involved in management of public gardens, whether as a director or area supervisor and irrespective of the type and size of such facility, would have to have familiarity with various aspects of garden organization and administration. However, despite the enormous number and diversity of such publications, there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book. These volumes provide the essential background information on plants, animals, management, maintenance, fundraising and finances as well as history, art, design, education and conservation. They also cover a host of interrelated subjects and responsible organization of such activities as creating a children's garden, horticultural therapy, conservatories, zoological gardens and parks, hence administration of multidimensional public gardens. Nearly 500 full-color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management. The 15 chapters begin with the need for public gardens, types of public gardens, historical backgrounds as well as design diversity. Numerous quotations are included from many garden lovers, landscape architects, philosophers and others. The authors' primary aim in writing this book

was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens. The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was. In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival. Visitors of zoological gardens expect to see more than just animals; zoos are landscaped grounds. Moreover, most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks. A number of public gardens are currently referred to as botanical and zoological gardens. Population density and the public's desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco, Central Park in New York City and Lincoln Park in Chicago, which integrate botanical or zoological divisions as well as museums and recreational facilities. While this book attempts to provide basic principles involved in public garden management, it does not claim to be a substitute for broader familiarity.

**RHS Encyclopedia of Planting Combinations** Tony Lord, 2012. RHS Encyclopedia of Planting Combinations is the essential reference book for anyone wanting to combine plants according to shape, colour, texture or form. This visionary planting guide features an A-Z of more than 1 000 great garden plants. Each plant is photographed in glorious partnership with one, two or three ideal companions, creating more than 4 000 of the most imaginative and visually effective combinations possible. With a practical introduction and analyses of what makes a successful combination, the authors show how to recreate combinations shown and invent new combinations of your own. With chapters on bulbs, climbers, perennials, shrubs, trees, roses and annuals, this book has become the essential reference book for all those who wish to combine plants according to colour, shape, texture and form in every corner of their gardens.

**The Royal Horticultural Society New Encyclopedia of Plants and Flowers** Christopher Brickell, 2003. Comprehensively written and researched by leading plant experts, this authoritative reference book includes many features that make plant selection and identification easy.

**The American Horticultural Society A-Z Encyclopedia of Garden Plants** Christopher Brickell, 1997. The AHS A-Z Encyclopedia of Garden Plants is the most comprehensive, detailed and lavishly illustrated guide to garden plants ever published. With authoritative coverage of more than 15 000 ornamental plants accompanied by nearly 6 000 full color photographs, it is destined to become the essential reference work for all gardeners from novice to expert. Plants are arranged alphabetically by their botanical names for fast, straightforward access. All names are completely up to date and previous names/synonyms appear as cross references throughout. Any plant can be located quickly even if the current botanical name is unfamiliar or not known. Detailed plant profiles prepared by an international team of more than 40 expert contributors describe growth habit, leaf and flower anatomy, plant height and spread, geographical origin and hardiness. A concise introduction to each genus provides essential details of botanical family, native habitat, number of species and the ornamental qualities for which

the plants are grown together with succinct advice on cultivation propagation and pests and diseases Specially commissioned photographs closely integrated with the plant descriptions capture the beauty of nearly 6 000 plants The full diversity of growth habits within a genus is shown wherever possible and special close up panels illustrate the range of flower colors and shapes A comprehensive introduction and glossary guide beginners and experienced gardeners alike to a greater knowledge and understanding of the key elements of plant classification anatomy and cultivation     *The Perennial Gardener's Design Primer* Stephanie Cohen,Nancy J.
