Royal Navy And The Mediterranean Vol Ii November 1940 December 1941:

The Royal Navy and the Mediterranean David Brown,2016-01-20 This work covers a difficult period of the war for the Royal Navy s Mediterranean Fleet It covers the destruction of the Italian Fleet at Taranto by naval aircraft from the carrier Illustrious and the entry of the German Luftwaffe into the theatre with their attack on Illustrious in 1941 The Royal Navy and the Mediterranean G. A. Titterton,2002 **The Royal Navy and the Mediterranean Convoys** Malcolm Llewellyn-Jones,2013-09-05 This book contains the Naval Staff History originally issued by the Admiralty in 1957 as a confidential book for use within the Royal Navy It has since been declassified and is published here for the first time along with an extended preface This volume describes the dangerous convoy operations in the Mediterranean which were necessary to relieve the garrison and people of Malta covering the period from the beginning of 1941 until the end of 1942 These convoys had to be fought through against determined attack by German and Italian surface submarine and particularly air forces Although casualties were proportionately higher than in Atlantic convoys Malta was successfully re supplied and remained a considerable impediment to enemy s attempts to supply their armies in North Africa These operations reveal the dedication courage and professionalism of the sailors of both naval and merchant services as well as the airmen who supported them A new preface sets the scene for the Staff History The Royal Navy and the Mediterranean Convoys will be of great interest for students interested in the Mediterranean Convoys Second World War and naval and military history

The Royal Navy and Maritime Power in the Twentieth Century Ian Speller,2004-08-02 This book adopts an innovative new approach to examine the role of maritime power and the utility of navies It uses a number of case studies based upon key Royal Navy operations in the twentieth century to draw out enduring principles about maritime power and to examine the strengths and limitations of maritime forces as instruments of national policy Individual chapters focus on campaigns and operations from both World Wars and a series of post 1945 crises and conflicts from the Palestine Patrol in the 1940s to Royal Navy operations in support of British policy in the 1990s Each case study demonstrates critical features of maritime power including operations during the transition to war fleet operations in narrow seas logistics submarine operations the impact of air power on maritime operations blockade maritime power projection amphibious warfare jurisdictional disputes and the law of the sea and peace support operations The contributors to this book all have considerable experience lecturing on these issues at the United Kingdom Joint Services Command and Staff College where maritime campaign analysis is used to teach the principles of maritime power to officers of the Royal Navy The book combines an authoritative examination of critical Royal Navy operations during the twentieth century with a sophisticated analysis of the nature of maritime power As such it is of both historical interest and contemporary relevance and will prove equally valuable to academic historians military professionals and the general reader **The Eastern Fleet and the Indian Ocean, 1942-1944** Charles Stephenson,2022-04-06 A study of the British Royal Navy s activities in the Indian Ocean

during World War II led by Admiral Sir James Somerville The story of the British Eastern Fleet which operated in the Indian Ocean against Japan has rarely been told Although it was the largest fleet deployed by the Royal Navy prior to 1945 and played a vital part in the theatre it was sent to protect it has no place in the popular consciousness of the naval history of the Second World War So Charles Stephenson s deeply researched and absorbing narrative gives this forgotten fleet the recognition it deserves British pre war naval planning for the Far East is part of the story as is the disastrous loss of the battleship Prince of Wales and battlecruiser Repulse in 1941 but the body of the book focuses on the new fleet commanded by Admiral Sir James Somerville and its operations against the Japanese navy and aircraft as well as Japanese and German submarines Later in the war once the fleet had been reinforced with an American aircraft carrier it was strong enough to take more aggressive actions against the Japanese and these are described in vivid detail Charles Stephenson s authoritative study should appeal to readers who have a special interest in the war with Japan in naval history more generally and Royal Navy in particular Praise for The Eastern Fleet and the Indian Ocean 1942 1944 This meticulously researched outstandingly clear well written and absorbing account is long overdue and will most likely become a standard work The text is most helpfully supported by over 80 pages of detailed end notes referenced to each chapter and a detailed index This is not only a book for naval historians but also for anyone with an interest in the War in the Indian Ocean region Highly recommended Military Historical Society I enjoyed this book it gives us an account of an often neglected part of the war at sea and of the achievements of Admiral Somerville who kept his fleet intact in the face of a potentially overwhelming opponent then was willing to acknowledge that his fleet needed to improve massively before it could take on the Japanese Dr John Rickard author and webmaster of the Military History Encyclopedia on the Web **The Royal Navy and the Palestine Patrol** Ninian Stewart, 2013-11-05 This is an entirely new Naval Staff History covering the period immediately after the Second World War and the Royal Navy operations to prevent illegal Jewish immigration into Palestine at the time under British Mandate from the United Nations The Palestine Patrol as it became known illustrates clearly the problems facing navies conducting operations other than war in particular those involving maritime embargo measures [The Royal Navy and the Arctic Convoys](#) Malcolm Llewellyn-Jones, 2013-05-13 The book is a masterpiece of operational history and is written with surprising candour given that the author was a member of the Naval Staff The men who took part in these operations were drawn from Britain Canada America particularly for the merchant service This book provides a detailed account of naval actions with maps based on close examination of all relevant documentation and interviews with principal participants

British Cruiser Warfare Alan Raven, 2019-05-30 An outstanding contribution to the historiography of the Second World War at sea an excellent book The Australian Naval Institute Cruisers were the Navy s maids of all work employed in a greater variety of roles than any other warship type Smaller faster and far more numerous than battleships they could be risked in situations where capital ships were too vulnerable while still providing heavy gunfire support for smaller ships or anti aircraft

cover for the fleet As such they were in the frontline of the naval war from the outset and from its first days the fighting provided unexpected challenges and some very unpleasant surprises not least the efficacy of air power Cruisers learned to deal with these new realities in the Norway campaign and later in the Mediterranean partly through the introduction of new technology notably radar but also by codifying the hard won experience of those involved This highly original book analyses the first years of the war when the sharpest lessons were learned initially describing every action and its results and then summarizing in individual chapters the conclusions that could be drawn for the many aspects of a cruiser s duties These include the main roles like surface gunnery shore bombardment anti aircraft tactics and fighter direction but also encompass technology like radar ASDIC and shipborne aircraft and even tackle more human issues such as shipboard organization damage control the impact of weather and the morale factor It also attempts to evaluate the importance of electronic warfare intelligence and code breaking and concludes with a comparison between the performance of British cruisers and their Italian and German opponents Thought provoking and sometimes controversial this is a book that should be read by everyone interested in the Second World War at sea Includes maps and photos *German Capital Ships and Raiders in World War II: From Graf Spee to Bismarck, 1931-1941* Eric Grove,2002 This is a compendium volume of three Battle Summaries or Naval Staff Histories The documents in this book cover the actions during the period 1939 1941 that resulted in the sinking of the German warships Bismarck and Graf Spee **German Capital Ships and Raiders in World War II** Eric Grove,2013-10-08 This is a compendium volume of three Battle Summaries or Naval Staff Histories produced soon after the war by the Naval Historical Branch of the Admiralty Originally classified and designed for internal use only these histories are published here for the first time The documents in this book cover the actions during the period 1939 1941 that resulted in the sinking or immobilising of the German Warships Bismarck and Graf Spee and record the struggle to rid the seas of the menace of the armed merchant raiders **Exercising Control of the Sea** Milan Vego,2020-10-14 This book explains both the strategic and the operational aspects of exercising control of the sea The struggle for sea control consists of three mutually related and overlapping phases obtaining maintaining and exercising sea control It is in the phase of exercising sea control when one s strategic or operational success is exploited otherwise the fruits of victories achieved would be wasted This work describes the strategy of a stronger side in wartime after a desired degree of control has been obtained which is followed by a discussion on the objectives and main methods used in exercising sea control The remaining chapters explain and analyze in some detail each of the main methods of exercising sea control defence and protection of one s own and destruction neutralization of the enemy s military economic potential at sea capturing the enemy s operationally important positions ashore destroying weakening the enemy s military economic potential ashore and supporting one s ground forces in their offensive and defensive operations on the coast This book will be of much interest to students of strategic studies sea power and naval history **More Lives Than a Ship's Cat** G.A. experiences in the Royal Navy during the Second World War were remarkable Aged nineteen he was Mentioned in Despatches and awarded the Distinguished Service Cross for his courage during incessant bombing during the Siege of Tobruk He survived multiple torpedo attacks firstly serving on the cruiser Glasgow which was hit twice on the battleship Queen Elizabeth at sea and blown up by human torpedoes at Alexandria and on HMS Hardy struck in January 1944 while escorting Russian Arctic Convoy JW56B In 1942 he was serving on HMS Carlisle during the fiercely fought Malta convoys and took part in the Battle of Sirte Later that year he was awarded the MBE for outstanding bravery resource and devotion to duty during very heavy bombing at the port of Bone during Operation TORCH He went on to serve at D Day and later in the Pacific on HMS Rajah It is a privilege to read Mick Stokes graphic and modest memoir Readers will appreciate and understand how he became The Most Highly Decorated Paymaster Midshipman in the Royal Navy *Very Special Ships* Arthur Nicholson, 2015-10-30 *Very Special Ships* is the first full length book about the six Abdiel class fast minelayers the fastest and most versatile ships to serve in the Royal Navy in the Second World War They operated not only as offensive minelayers dashing into enemy waters under cover of darkness but in many other roles most famously as blockade runners to Malta In lieu of mines they transported items as diverse as ammunition condensed milk gold and VIPs Distinguished by their three funnels the Abdiels were attractive well designed ships and they were also unique no other navy had such ships and so they were sought after commands and blessed with fine captains To give the fullest picture of this important class of ships the book details the origins and history of mines minelayers and minelaying covers the origins and design of the class describes the construction of each of the six ships and the modified design of the last two tells in detail of the operational careers of the ships in the second World War when they played vital roles in the battle of Crete and the siege of Malta plied the hazardous route to Tobruk and laid mines off the Italian coast The post war careers of the surviving ships is also documented Written to appeal to naval enthusiasts students of World War II and modelmakers the author tells the story of these ships through first hand accounts official sources and specially commissioned drawings and photographs The British Defence of Egypt, 1935-40 Steve Morewood, 2004-11-25 A comprehensive and challenging analysis of the British defence of Egypt primarily against fascist Italy in the critical lead up period to the Second World War Culminating in the decisive defeat of the Italian military threat at Sidi Barrani in December 1940 this is a fascinating new contribution to the field The security of Egypt a constant of British imperial strategy is a curiously neglected dimension of the still burning appeasement debate Steven Morewood adds to the originality of his interpretation by suggesting the old view should be reinstated that Mussolini should and could have been stopped in his empire building at the Abyssinian hurdle Thereafter as Nazi Germany tore the Versailles peace settlement to shreds the drift to war accelerated as British resolve and credibility were brought into question The fascist dictators in Rome and Berlin held no respect for weakness and Mussolini became the conduit through which Hitler could apply pressure to a sensitive British interest through reinforcing Libya at critical

moments *British Battleship vs Italian Battleship* Mark Stille, 2020-01-23 During World War II's battle for control of the Mediterranean both the British and Italian navies planned to bring their battle fleets into play At the centre of both of these fleets was a core of battleships which both sides expected to play a decisive role in the conflict On 9 July 1940 the two navies met in the central Mediterranean as two Italian battleships faced off against three of their British counterparts Christened the Battle of Calabria the action allowed the ships to play to their strengths engaging in a long range gunnery duel the very thing they had been designed for Though both sides shot well the only hit was scored by Warspite on the Italian battleship Giulio Cesare The Italians were forced to withdraw and the action ended up being indecisive but it was the largest fleet action fought in the Mediterranean during the war As well as this battle there were other occasions during the war when both British and Italian battleships were present and influential but during which they never engaged each other directly the Battle of Spartivento on 27 November 1940 and the Battle of Cape Matapan on 28-29 March 1941 Packed with full colour artwork carefully selected archive photographs and expert analysis this title explores in detail the role played by British and Italian battleships in these encounters and their influence in the Mediterranean theatre of World War II *A Companion to World War II* Thomas W. Zeiler, Daniel M. DuBois, 2012-12-21 A Companion to World War II brings together a series of fresh academic perspectives on World War II exploring the many cultural social and political contexts of the war Essay topics range from American anti-Semitism to the experiences of French African soldiers providing nearly 60 new contributions to the genre arranged across two comprehensive volumes A collection of original historiographic essays that include cutting edge research Analyzes the roles of neutral nations during the war Examines the war from the bottom up through the experiences of different social classes Covers the causes key battles and consequences of the war German Capital Ships and Raiders in World War II: From Scharnhorst to Tirpitz, 1942-1944, 2002 **In Passage Perilous** Vincent P. O'Hara, 2012-11-05 An invaluable account of one of the most overlooked sea battles of World War II By mid 1942 the Allies were losing the Mediterranean war Malta was isolated and its civilian population faced starvation In June 1942 the British Royal Navy made a stupendous effort to break the Axis stranglehold The British dispatched armed convoys from Gibraltar and Egypt toward Malta In a complex battle lasting more than a week Italian and German forces defeated Operation Vigorous the larger eastern effort and ravaged the western convoy Operation Harpoon in a series of air submarine and surface attacks culminating in the Battle of Pantelleria Just two of seventeen merchant ships that set out for Malta reached their destination In Passage Perilous presents a detailed description of the operations and assesses the actual impact Malta had on the fight to deny supplies to Rommel's army in North Africa The book's discussion of the battle's operational aspects highlights the complex relationships between air and naval power and the influence of geography on littoral operations An important and highly recommended addition to the literature on World War II in the Mediterranean IPP Naval Maritime History World War II at Sea Spencer C. Tucker, 2011-11-10 The war at sea was a key aspect of World War II one that is

too often under studied This comprehensive encyclopedia shares current understandings of the struggle to control the seas during that conflict and it opens our eyes to the reasons sea power continues to be of critical importance today Scholarly treatment of World War II is constantly changing as new materials inform new interpretations At the same time current military operations lead to reevaluation of the tactics and technologies of the past Marshalling the latest information and insights into this epic conflict World War II at Sea An Encyclopedia will enable students and other interested readers to explore specific naval engagements while also charting the transformation of naval history through innovations in ordnance In treating the naval aspects of World War II this two volume ready reference enhances the understanding of a part of the war that is often overshadowed by the fighting on land and in the air The encyclopedia focuses on the events individuals organizations and ideas that shaped the world s navies during World War II as well as the resultant battles that changed naval history It also covers the numerous innovations that occurred during the conflict and shows how strategies evolved and were executed

The Littorio Class Ermingo Bagnasco, Augusto de Toro, 2011-07-18 An important work for anyone interested in warship design the naval side of World War II in the Mediterranean or modern Italian history New York Military Affairs Symposium For its final battleship design Italy ignored all treaty restrictions on tonnage and produced one of Europe s largest and most powerful capital ships comparable with Germany s Bismarck class similarly built in defiance of international agreements The three ships of the Littorio class were typical of Italian design being fast and elegant but also boasting a revolutionary protective scheme which was tested to the limits as all three were to be heavily damaged in the hard fought naval war in the Mediterranean Roma had the unfortunate distinction of being the first capital ship sunk by guided missile These important ships have never been covered in depth in English language publications but the need is now satisfied in this comprehensive and convincing study by two of Italy s leading naval historians The book combines a detailed analysis of the design with an operational history evaluating how the ships stood up to combat It is illustrated with an amazing collection of photographs many fine line plans and colored artwork of camouflage schemes adding up to as complete a monograph on a single class ever published Among warship enthusiasts battleships enjoy a unique status As the great success of Seaforth s recent book on French battleships proves that interest transcends national boundaries and this superbly executed study is certain to become another classic in the field A very impressive piece of work History of War An essential book for all naval history enthusiasts Firetrench
