Royal Botanic Gardens Sydney A History 1816 1985:

The History of the Royal Botanic Gardens Kew Ray Desmond, 2007 The authorised history of the Royal Botanic Gardens Kew *Gardens of History and Imagination* Gretchen Poiner, Sybil Jack, 2016-06-03 Whether on the ground or in the mind gardens carry meaning They reflect social and aesthetic values and may express hope anticipation or grief Throughout history they have provided a means of physical survival In creating and maintaining gardens people construe and construct a relationship with their environment But there is no single meaning carried in the word garden as idea and practice it reflects cultural differences in beliefs values and social organisation It embodies personal community even national ways of seeing and being in the world There are ten essays in *Gardens of History and Imagination* each of which examines the role of gardens and gardening in the settlement of New South Wales and in growing a colony and a state They explore the significance of gardens for the health of the colony for its economy for the construction of social order and moral worth No less do they reveal the significance of forming and reforming personal identities in this process For the immigrants gardening was an act of settlement it was also a statement of possession for individuals and for Britain For a long time it was with memories of home often selective and idealised that settlers made gardens but as the colony developed its own character so did gardening possibilities and practices

Dictionary Of British And Irish Botanists And Horticulturalists Including plant collectors, flower painters and garden designers Ray Desmond, 2020-12-23 Over the past four centuries botanists and gardeners in the British Isles have gathered maintained and propagated many varying species of plants Their work has been documented in innumerable books and articles which are often difficult to trace The Dictionary of British and Irish Botanists and Horticulturalists represents a time saving reference source for those who wish to discover more about the lives and achievements of the horticulturalists listed The dictionary's utility comes not only from indicating the major publications of the named authors but also the location of their herbaria and manuscripts The previous 1977 edition of the Dictionary has for many years been a much used source of information for botanists botanic artists and archivists In this revised edition the scope has been expanded to include among its 13 000 entries flower painters in addition to botanical artists over 1400 entries and for the first time garden designers Finally the Dictionary should have international appeal since so many botanists and gardeners worked on collective plants overseas in particular in North America and the British Commonwealth Each entry gives wherever possible details of dates and places of birth and death educational qualifications professional posts honours and awards publications location of plant collections manuscripts drawings and portraits Its main function however is to provide further biographical references to books and periodicals Comprehensive classified indices facilitate access by professions and activities countries and plant interests

Reading the Garden Katie Holmes, Susan K. Martin, Kylie Mirmohamadi, 2007-05-28 Whether a small plot in the backyard of an inner urban home or a capital city's sprawling botanic garden Australians have long desired a patch of dirt to plough or enjoy Reading the garden

explores our deep affection for gardens and gardening and illuminates their numerous meanings and uses from European settlement to the late twentieth century Cover **The Royal Botanic Gardens, Sydney** Lionel Arthur Gilbert, 1986 This book is a copiously illustrated account of the Gardens development the events and personalities involved in it and their implications for the city of Sydney Australia **Nature Displaced, Nature Displayed** Nuala C. Johnson, 2011-04-29 Botanical gardens brought together in a single space the great diversity of the earth's flora They displaced nature from forest and foothill and re arranged it to reveal something of the scientific principles underpinning the apparent chaos of the wild Nature Displaced Nature Displayed shows how the design and display of such gardens was not determined by scientific principles alone Through a study of three botanical gardens belonging to the University of Cambridge the Royal Dublin Society and the Belfast Natural History Society the author shows how the final outcome involved a complex interplay of ideas about place identity empire botanical science and especially aesthetics creating spaces that would educate the mind as well as please the senses This highly engaging book offers a wealth of fresh insights into both the history and development of botanical gardens as well as connections between science and aesthetics *National Approaches to the Governance of Historical Heritage Over Time* Stefan Fisch, 2008 The five elements governmental authorities public discourse corporate and market interests citizens associations and international agencies may help in figuring out the complex and challenging purpose of the research work presented in this volume which is nothing less than the history of the governance of cultural and natural heritage in eleven countries from its outset to the present Speaking about governance is challenging The term has been vastly used and misused But today when the feverish popularity of the concept is probably in decline we rest with one solid conviction at least that social economic cultural and institutional processes are governed not only through government be it national or local with its legislative administrative and jurisdictional mechanisms but through a larger array of different actors and factors These include schools and universities citizens associations public opinion economic corporations non governmental organizations learned societies unions media international agencies clubs consultants etc In fact the reader is going to meet quite a few of these actors in this publication they are the unavoidable characters involved in the story the authors have set out to tell **The Kew Record of Taxonomic Literature Relating to Vascular Plants for ...**, 1986 *Darwin's Laboratory* Roy M. MacLeod, Philip F. Rehbock, 1994-01-01 No scientific traveler was more influenced by the Pacific than Charles Darwin and his legacy in the region remains unparalleled Yet the extent of the Pacific's impact on the thought of Darwin and those who followed him has not been sufficiently grasped In this volume of essays sixteen scholars explore the many dimensions biological geological anthropological social and political of Darwinism in the Pacific Fired by Darwinian ideas nineteenth century naturalists within and around the Pacific rim worked to further Darwin's programs in their own research in Seattle conchologist P Brooks Randolph in Honolulu evolutionist John Thomas Gulick in Adelaide botanist Richard Schomburgk and in Malaysia biogeographer Alfred Russel Wallace Lesser known enthusiasts furnished

Darwin with fresh material and replied to his endless inquiries while young aspiring biologists from Cambridge tested Darwinian ideas directly in the laboratory of the Pacific But the implications of Darwinism for the understanding of human nature and history turned it into a public theory as well as a scientific one Anthropologists geographers missionaries politicians and social commentators from Australia to Japan all found ways to adapt Darwinism to their own agendas Darwin's Laboratory demonstrates the variety and richness of Darwinian ideas in the Pacific and in so doing shows how the region functioned as a testing ground for the theory of evolution Further it illustrates how Darwinian ideas and their European contexts helped invent and define the particular conception we have of the Pacific Both the general reader and the specialist will find controversy illumination and entertainment in this the first book to probe the extent of Darwinism and Darwinian thinking in the Pacific

The Enlightenment and the Origins of European Australia John Gascoigne, 2002-06-07 This book surveys some of the key intellectual influences in the formation of Australian society by emphasizing the impact of the Enlightenment with its commitment to rational inquiry and progress The first part analyzes the political and religious background of the period from the First Fleet 1788 to the mid nineteenth century The second demonstrates the pervasiveness of ideas of improvement across a range of human endeavors from agriculture to education penal discipline and race relations Throughout the book highlights the extent to which developments in Australia can be compared with those in Britain and the U S

Imperial Nature Jim Endersby, 2020-05-21 Joseph Dalton Hooker 1817 1911 was an internationally renowned botanist a close friend and early supporter of Charles Darwin and one of the first and most successful British men of science to become a full time professional He was also Jim Endersby argues the perfect embodiment of Victorian science A vivid picture of the complex interrelationships of scientific work and scientific ideas Imperial Nature gracefully uses one individual's career to illustrate the changing world of science in the Victorian era By analyzing Hooker's career Endersby offers vivid insights into the everyday activities of nineteenth century naturalists considering matters as diverse as botanical illustration and microscopy classification and specimen transportation and storage to reveal what they actually did how they earned a living and what drove their scientific theories What emerges is a rare glimpse of Victorian scientific practices in action By focusing on science's material practices and one of its foremost practitioners Endersby ably links concerns about empire professionalism and philosophical practices to the forging of a nineteenth century scientific identity

Vanished Sadiah Qureshi, 2025-06-05 A vital and important book David Olusoga From an award winning historian of race science and empire a path breaking and poignant history of extinction as a scientific idea an imperial legacy and a political choice Anyone alive today is among a tiny fraction of the once living over 90% of species that ever existed are now extinct How did we come to think of ourselves as survivors in a world where species can vanish forever or as capable of pushing our planet to the verge of a sixth mass extinction Extinction Sadiah Qureshi shows us is a surprisingly modern concept and a phenomenon that's not as natural as we might think In Europe until the late eighteenth century species were considered perfect and

unchanging creations of God Then in the age of revolutions scientists gathered enough fossil evidence to determine that mammoth bones for example were not just large elephants but a lost species that once roamed the Earth alongside ancient humans Extinction went from being regarded as theologically dangerous to pervasive and even inevitable Yet Vanished shows us that extinction is more than a scientific idea it s a political choice that has led to devastating consequences Europeans and Americans quickly used the notion that extinction was a natural process to justify persecution and genocide predicting that nations from Newfoundland s Beothuk to Aboriginal Australians were doomed to die out from imperial expansion Exploring the tangled and unnatural histories of extinction and empire Vanished weaves together pioneering original research and breath taking storytelling to show us extinction is both an evolutionary process and a human act one which illuminates our past and may alter our future **Australian Agriculture** Ted Henzell,2007 Focusing on the technologies that the farmers and graziers actually used this book follows the history of each of the major commodities of groups of commodities to the end of the 20th century grain crops sheep and wool beef and dairy wine and others Issues facing agriculture as it enters the 21st century are also discussed **The Scientific Savant in Nineteenth Century Australia** ,1997 **Huntia** ,1993 **The Brightest Jewel** E. Charles Nelson,Eileen M. McCracken,Eileen McCracken,1987 Australian Books ,1985 **Australia** I. Kepars,1994 **Travel, Space, Architecture** Miodrag Mitrasinovic,2016-02-17 Travel Space Architecture defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production through the notion of travel By aligning architectural thinking with current critical theory debates this book explores whether dissociating culture from place and identity and detaching the idea of architecture from both can reframe our understanding of spatial and architectural practices The book presents seventeen key case studies from a diverse range of perspectives including historical theoretical and praxis based and range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies Subject Guide to Books in Print ,1975
