Royal Education Past Present And Future:

Royal Education Peter Gordon, Denis Lawton, 2003 Many people assume that kings and queens have generally received a good education perhaps the best that money could buy at the time This book investigates the reality what is known about the education of British sovereigns from the beginning of the Tudor period to the end of the 20th century There have been enormous differences in the seriousness with which education was regarded at different points in history For example Henry VIII and his children were educated at a high point in the Renaissance when educational ideas were regarded as important as well as exciting Queen Elizabeth I was by any standards extremely well educated by contrast Queen Elizabeth II s education has been described as undemanding because her parents wanted her to have a happy childhood Peter Gordon and Denis Lawton have traced changes in royal education through the centuries and related them not only to educational ideas and theories but also to changing political social and religious contexts The monarchy itself has changed as an institution from the semi absolute authority of the Tudors to a much more limited kind of monarchy by the end of the Stuart period after one king had been executed and another exiled to the constitutional monarchy of the 20th century To what extent have such changes made any difference to royal education What is the most appropriate kind of education for future kings and queens in our present day democracy In this book the authors confront these and other such questions and explore some of the answers

Medical Education: Past, Present and Future Kenneth Calman, 2006-12-12 Highly Commended BMA Awards 2007 I would certainly recommend this book to all in Medical Education Medical education both for undergraduate and postgraduate students and for those training in their chosen specialty is currently undergoing great change In Medical Education Past Present and Future Handling on Learning Sir Kenneth Calman puts this change in its proper historical context and also examines the current upheavals and their implications for the future An ambitious but timely project made readable and specific by the use of a case based approach a book of this range and type has not been attempted since the early 20th century Written by a known expert in the field and therefore individualistic but with a real insider s attributes of being able to discriminate between what does and does not matter the insider viewpoint especially of someone so recently involved at the centre of political and educational debate The overall theme of regulation covers not just the professionals viewpoint but also the public s and therefore covers political influences on the educational and regulatory process

The Past, Present, and Future of Higher Education in the Arabian Gulf Region Awad Ibrahim, Osman Z. Barnawi, 2022-08-29 This edited volume contributes a novel understanding of the past present and future of higher education across the six countries that make up the Gulf Cooperation Council GCC Against the backdrop of intense political ideological and epistemological disruptions across the Arabian Gulf Region over the last two decades this volume adopts critical comparative perspectives in order to chart the history present day and future realities of higher education in Saudi Arabia the United Arab Emirates Oman Qatar Bahrain and Kuwait By focusing on dynamics relating to neoliberalism and using the notions of tensionality and

The final instalment of N A M Rodger's definitive authoritative trilogy on Britain's naval history. At the end of the French and Napoleonic wars, British sea power was at its apogee. But by 1840, as one contemporary commentator put it, the Admiralty was full of intellectuals becalmed in the smoke of Trafalgar. How the Royal Navy reformed and reinvigorated itself in the course of the nineteenth century is just one thread in this magnificent book which refuses to accept standard assumptions and analyses. All the great actions are here, from Navarino in 1827 won by a daringly disobedient Admiral Codrington to Jutland, D-Day, the Battle of the Atlantic and the battles in the Pacific in 1944-45 in concert with the US Navy. The development and strategic significance of submarine and navy air forces is superbly described, as are the rapid evolution of ships from classic Nelsonic type to hybrid steam-sail ships, then armour-clad and the fully armoured Dreadnoughts and beyond, and weapons. The social history of officers and men, and sometimes women, always a key part of the author's work, is not neglected. Rodger sets all this in the essential context of politics and geo-strategy. The character and importance of leading admirals, Beatty, Fisher, Cunningham, is assessed together with the roles of other, less famous but no less consequential figures. Based on a lifetime's learning, it is the culmination of one of the most significant British historical works in recent decades. Naval specialists will find much that is new here and will be invigorated by the originality of Rodger's judgements, but everyone who is interested in one of the central threads in British history will find it rewarding. **Reflections on War** Ian Liebenberg, 2012-10-01. *Reflections on War* is a comprehensive and objective investigation into the problems of war. The book explores the crucial link between theory, strategy, and objectives in war, taking all the evidence and theory into account and should be of interest to military practitioners, specialists in defence studies, and others interested in military history. Also notable about the work is its ability to draw insights together from international legal theory, management sciences, history, sociology, and the political economy of war, showing due respect for the moral complexities involved in waging war.
