Royal Mistress:

The Creation of the French Royal Mistress Tracy Adams, Christine Adams, 2020-03-24 Kings throughout medieval and early modern Europe had extraconjugal sexual partners Only in France however did the royal mistress become a quasi institutionalized political position This study explores the emergence and development of the position of French royal mistress through detailed portraits of nine of its most significant incumbents Agn s Sorel Anne de Pisseleu d Heilly Diane de Poitiers Gabrielle d Estr es Fran oise Louise de La Baume Le Blanc Fran oise Ath na s de Rochechouart de Mortemart Fran oise d Aubign Jeanne Antoinette Poisson and Jeanne B cu Beginning in the fifteenth century key structures converged to create a space at court for the royal mistress The first was an idea of gender already in place that while women were legally inferior to men they were men s equals in competence Because of their legal subordinacy queens were considered to be the safest regents for their husbands and subsequently the royal mistress was the surest counterpoint to the royal favorite Second the Renaissance was a period during which people began to experience space as theatrical This shift to a theatrical world opened up new ways of imagining political guile which came to be positively associated with the royal mistress Still the role had to be activated by an intelligent charismatic woman associated with a king who sought women as advisors The fascinating particulars of each case are covered in the chapters of this book Thoroughly researched and compellingly narrated this important study explains why the tradition of a politically powerful royal mistress materialized at the French court but nowhere else in Europe It will appeal to anyone interested in the history of the French monarchy women and royalty and gender studies

Female Beauty Systems Christine Adams, Tracy Adams, 2015-09-04 Female beauty systems everywhere are complex integrating markers of class status power and sexuality to perform the fundamental function of sorting individuals into categories of more or less desirable. Heirs to the tradition of courtly love, modern western female beauty systems tend to share the norm of man as pursuer, woman as pursued, having developed around the trope of the madly desiring poet or knight supplicating his aloof and lovely lady for her favor. The apparent longevity of the courtly love tradition raises the question of whether the way in which it structures male desire in reaction to female beauty is part of a universal tendency, an evolutionary adaptation, despite clear evidence that female beauty systems are also in fact socially constructed and reflect enormous ambivalence about the power and performance of beauty. Although modern western female beauty systems are routinely demystified and contested today, the purveyors of culture that support them—institutional, intellectual, artistic, commercial, and popular—continue as they always have to construe women as objects of male desire. Still within this basic structure, the systems have varied greatly across time and space, with women using beauty as a form of social capital in widely differing ways. Moreover, as individuals have begun to experience their bodies as malleable and endlessly transformable rather than unruly and unyielding, many have begun to experience beauty less as a given and more as a project. The nine essays collected here examine a number of different Western female beauty systems over the centuries, considering how women have complied with, contributed to, profited or suffered from, and resisted them.
