Roald Hoffmann on the Philosophy, Art, and Science of Chemistry Jeffrey Kovac, Michael Weisberg, 2012-02-01 Nobel laureate Roald Hoffmann s contributions to chemistry are well known Less well known however is that over a career that spans nearly fifty years Hoffmann has thought and written extensively about a wide variety of other topics such as chemistry s relationship to philosophy literature and the arts including the nature of chemical reasoning the role of symbolism and writing in science and the relationship between art and craft and science In Roald Hoffmann on the Philosophy Art and Science of Chemistry Jeffrey Kovac and Michael Weisberg bring together twenty eight of Hoffmann s most important essays Gathered here are Hoffmann s most philosophically significant and interesting essays and lectures many of which are not widely accessible In essays such as Why Buy That Theory Nearly Circular Reasoning How Should Chemists Think The Metaphor Unchained Art in Science and Molecular Beauty we find the mature reflections of one of America s leading scientists Organized under the general headings of Chemical Reasoning and Explanation Writing and Communicating Art and Science Education and Ethics these stimulating essays provide invaluable insight into the teaching and practice of science

Duchamp Juan Ramírez, 2013-06-01 Marcel Duchamp s stature in the history of art has grown steadily since the 1950s as several artistic movements have embraced him as their founding father But although his influence is comparable only to Picasso s Duchamp continues to be relatively unknown outside his narrow circle of followers This book seeks to explain his oeuvre which has been shrouded with mystery Duchamp s two great preoccupations were the nature of scientific truth and a feeling for love with its natural limit death His works all speak of eroticism in a way that pushes the socially acceptable to its outer limits Juan Antonio Ramirez addresses such questions as the meaning of the artist s ground breaking ready made s and his famous

installation Etant donné son passionné essai reproduces all of Duchamp's important works in addition to numerous previously unpublished visual sources Duchamp Love and Death even is a seminal monograph for understanding this crucial figure of modern art

Rethinking Art History Donald Preziosi, 1989-01-01 A general overview of the theoretical and institutional history of the discipline of art history Refuting the image of art history as a discipline in crisis Preziosi asserts that many of the dilemmas and contradictions of art history today are not new but can be traced back to problems surrounding the founding of the discipline its institutionalization and its academic expansion since the 1870s Donald Preziosi has written a timely and incisive study of the methods and assumptions of art history in the modern period As the book unfolds one realizes that art history was never as unitary and monolithic as the phrase the discipline of art history suggests but is in fact a complicated and highly contradictory range of practices whose disciplinary coherence may be more mythical than real This is a deliberately discomfiting book however for its clear sightedness rigor and wit it is a book to be welcomed by everyone concerned with the present condition and future direction of visual studies Norman Bryson Harvard University An important and courageous book Rethinking Art History is a rigorous and original contribution to the current post-structuralist and postmodernist debates in cultural studies here and abroad Steven Z. Levine Bryn Mawr College Through this kind of reading of the discourse of art history Preziosi provides some acute analysis of the metaphors and stratagems which continue to discipline the discipline of art history

[BBC Radiophonic Workshop's BBC Radiophonic Workshop - A Retrospective](#)

William L. Weir, 2023-05-04 In 1958 an anonymous group of overworked and under budgeted BBC employees set out to make some new sounds for radio and TV They ended up changing the course of 20th century music For millions of people the work of the BBC Radiophonic Workshop was the first electronic music they had ever heard Sampling loops and the earliest synthesizers long before audiences knew what they were made up the groundbreaking scores for news programs auto maintenance shows and children's programming They also produced the Doctor Who theme one of the first electronic music masterpieces The Beatles Pink Floyd and others borrowed from them A generation of musicians raised on BBC programming

Aphex Twin Portishead and Prodigy among them took these once alien sounds and carried on the Workshop's legacy Ignored for decades by music historians the Workshop is now recognized as one of the most influential forebears of electronica psychedelia ambient music and synth pop

The American Roman Noir William Marling, 1998-10-01 In *The American Roman Noir* William Marling reads classic hard boiled fiction and film in the contexts of narrative theories and American social and cultural history His search for the origins of the dark narratives that emerged during the 1920s and 1930s leads to a sweeping critique of Jazz Age and Depression era culture Integrating economic history biography consumer product design narrative analysis and film scholarship Marling makes new connections between events of the 1920s and 1930s and the modes styles and genres of their representation At the center of Marling's approach is the concept of prodigality how narrative represents having and having had too much Never before in the country he argues did wealth impinge on the national conscience as in the 1920s and never was such conscience so sharply rebuked as in the 1930s What asks Marling were the paradigms that explained accumulation and windfall waste and failure Marling first establishes a theoretical and historical context for the notion of prodigality Among the topics he discusses are such watershed events as the trial of Sacco and Vanzetti and the premiere of the first sound movie *The Jazz Singer* technology's alteration of Americans' perceptive and figurative habits and the shift from synecdochical to metonymical values entailed by a consumer society Marling then considers six noir classics relating them to their authors' own lives and to the milieu of prodigality that produced them and which they sought to explain Dashiell Hammett's *Red Harvest* and *The Maltese Falcon* James M Cain's *The Postman Always Rings Twice* and *Double Indemnity* and Raymond Chandler's *The Big Sleep* and *Farewell My Lovely* Reading these narratives first as novels then as films Marling shows how they employed the prodigality fabula's variations and ancillary value systems to help Americans adapt for better or worse to a society driven by economic and technological forces beyond their control

The Berkeley Undergraduate Journal, 1998 [Shifting the Blame](#) Nan Goodman, 2013-12-16 When someone gets hurt in an accident we reflexively ask a set of questions which ultimately comes down to who was blameworthy Yet early nineteenth century Americans were entirely and to the modern reader astonishingly uninterested in this line of reasoning Their concern was whether an accident had happened and not why Nan Goodman takes this transformation in legal and popular thought about the nature of accidents as a starting point for a broad inquiry into changing conceptions of individual agency and ultimately of self in industrializing America Goodman looks to both conventional historical sources and the literary depiction of accidents in the work of Mark Twain Stephen Crane Charles Chesnutt and others to explain the new ways that Americans began to make sense of the unplanned

American Literature and Science Robert Scholnick, 2014-07-11 Literature and science are two disciplines often thought to be unrelated if not actually antagonistic But Robert J Scholnick points out that these areas of learning up through the beginning of the nineteenth century were understood as parts of a unitary endeavor By mid century they had diverged but literature and

science have continued to interact conflict and illuminate each other In this innovative work twelve leaders in this emerging interdisciplinary field explore the long engagement of American writers with science and uncover science s conflicting meanings as a central dimension of the nation s conception of itself Reaching back to the Puritan poet minister physician Edward Taylor who wrote at the beginning of the scientific revolution and forward to Thomas Pynchon novelist of the cybernetic age this collection of original essays contains essential work on major writers including Franklin Jefferson Poe Emerson Thoreau Twain Hart Crane Dos Passos and Charles Olson Through its exploration of the ways that American writers have found in science and technology a vital imaginative stimulus even while resisting their destructive applications this book points towards a reconciliation and integration within culture An innovative look at a neglected dimension of our literary tradition American Literature and Science stands as both a definition of the field and an invitation to others to continue and extend new modes of inquiry
