The Commodification of Academic Research Hans Radder, 2010-09-05 Selling science has become a common practice in contemporary universities This commodification of academia pervades many aspects of higher education including research teaching and administration As such it raises significant philosophical political and moral challenges This volume offers the first book length analysis of this disturbing trend from a philosophical perspective and presents views by scholars of philosophy of science social and political philosophy and research ethics The epistemic and moral responsibilities of universities whether for profit or nonprofit are examined from several philosophical standpoints The contributors discuss the pertinent epistemological and methodological questions the sociopolitical issues of the organization of science the tensions between commodified practices and the ideal of science for the public good and the role of governmental regulation and personal ethical behavior In order to counter coercive and corruptive influences of academic commodification the contributors consider alternatives to commodified research and offer practical recommendations for establishing appropriate research standards methodologies and institutional arrangements and a corresponding normative ethos

The Ethics of Science David B. Resnik, 2005-08-12 An essential introduction to the study of ethics in science and scientific research for students and professionals alike

Intellectual Property and Biotechnology Matthew Rimmer, 2008-01-01 Dr Rimmer's book is a marvellous introduction to a crucial topic of our time He writes engagingly provocatively and always with good humour A highly technical and complex area of law has been reduced to clear descriptions and searching analysis Truly this is an important book on an essential topic that will help define the ethics of a future that includes nothing less than the future of our species From the foreword by the Hon Justice Michael Kirby AC CMG the High Court of Australia the author has done an excellent job by explaining the subject in an open and accessible manner This book is a timely and very thought provoking analysis of patent law and

biotechnology The book is a unique theoretical contribution to the controversial public debate over commercialization of biological inventions there is an extensive bibliography a valuable resource for further reading The book will be of prime interest to lawyers and patent attorneys scientists and researchers business managers and technology transfer specialists Journal of Intellectual Property Rights Rimmer s book is highly recommended for anyone interested in the issues and debate related to biological inventions regardless of which side the reader is on Stefan M Miller Journal of Commercial Biotechnology this book gives an excellent account of the most celebrated biotechnology cases from three continents and for this alone is to be thoroughly recommended David Rogers European Intellectual Property Review Rimmer has put a great deal of thought and effort into this series of chapters For those looking at how to reform direct and develop laws in relation to biotechnology this book is brimming with ideas suggestions and recommendations of what to do next Rebecca Halford Harrison Chartered Institute of Patent Attorneys an excellent introduction to a wide range of legal thinking in an increasingly controversial and relevant area to humankind Sharon Givoni Australian Intellectual Property Law Bulletin Rimmer s new book is a timely and very thought provoking analysis of patent law and biotechnology and asks a very serious question can a 19th century patent system adequately deal with a 21st century industry Kate McDonald Australian Life Scientist This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro organisms plants and animals to human genes and stem cells It makes a unique theoretical contribution to the controversial public debate over the commercialization of biological inventions The author also considers the contradictions between the Supreme Court of Canada rulings in respect of the Harvard oncomouse and genetically modified canola He explores law policy and practice in both Australia and New Zealand in respect to gene patents and non coding DNA This study charts the rebellion against the European Union Biotechnology Directive particularly in respect of Myriad Genetics BRCA1 and BRCA2 patents and stem cell patent applications The book also considers whether patent law will accommodate frontier technologies such as bioinformatics haplotype mapping proteomics pharmacogenomics and nanotechnology Intellectual Property and Biotechnology will be of prime interest to lawyers and patent attorneys scientists and researchers business managers and technology transfer specialists *Transparency and Accountability in Science and Politics* K. Andersson, 2008-07-10 This book challenges the role of scientists in policy making and the idea of deliberative democracy The author argues that awareness must increase among both politicians and the citizens who elect them We must revitalise the decision making processes in representative democracy The book proposes new institutional structures Biotechnology, Patents and Morality Sigrid Sterckx, 2017-11-01 This title was first published in 2000 This work documents an international and interdisciplinary workshop on the ethical aspects of the patenting of biotechnological inventions including genes plants and animals The public perception is discussed along with how these perceptions relate to ethical social and cultural factors The legal framework in Europe is laid out by several experts in the field of patent law and the situation in the US is also

briefly described This edition also includes a general discussion of three important theories called upon to justify the patent system the natural rights argument the distributive justice argument and the utilitarian argument The chapter about the European Directive on the legal protection of biotechnological inventions has been updated A selection of provisions from the August 1997 draft as well as the final text of the Directive as adopted on 12 May 1998 are discussed and commented upon The patent provisions of the TRIP s Agreement the Agreement on Trade Related aspects of Intellectual Property rights concluded in 1994 as an Annex to the Agreement Establishing the World Trade Organization are also discussed and criticized paying particular attention to the implications for biotechnology patents Finally the question is asked whether the developing countries stand to gain anything from TRIPs A look at the results of empirical research conducted by commentators on the economics of patenting reveals that the new patent regime may prove to entail significant costs for the developing countries This second edition also contains material on the EU Directive on biotechnology patents adopted in May 1998 justificatory theories of the patent system and the TRIP s agreement on Trade Related aspects of Intellectual Property rights concluded in the GATT WTO framework Virtue and Vice: Volume 15, Part 1 Ellen Frankel Paul,Fred Dycus Miller,Jeffrey Paul,1998-02-13 The essays in this volume examine the nature of virtue and its role in moral theory
