Elementary scientific Russian reader George Alexandrovich Znamensky, 1943 **Scientific Russian Reader** Noah D. Gershevsky, 1960 *Scientific Babel* Michael D. Gordin, 2024-05-31 English is the language of science today No matter which languages you know if you want your work seen studied and cited you need to publish in English But that hasn't always been the case Though there was a time when Latin dominated the field for centuries science has been a polyglot enterprise conducted in a number of languages whose importance waxed and waned over time until the rise of English in the twentieth century So how did we get from there to here How did French German Latin Russian and even Esperanto give way to English And what can we reconstruct of the experience of doing science in the polyglot past With *Scientific Babel* Michael D Gordin resurrects that lost world in part through an ingenious mechanism the pages of his highly readable narrative account teem with footnotes not offering background information but presenting quoted material in its original language The result is stunning as we read about the rise and fall of languages driven by politics war economics and institutions we actually see it happen in the ever changing web of multilingual examples The history of science and of English as its dominant language comes to life and brings with it a new understanding not only of the frictions generated by a scientific community that spoke in many often mutually unintelligible voices but also of the possibilities of the polyglot and the losses that the dominance of English entails Few historians of science write as well as Gordin and *Scientific Babel* reveals his incredible command of the literature language and intellectual essence of science past and present No reader who takes this linguistic journey with him will be disappointed *Elementary Scientific Russian Reader. 2Pts* Heorage A Znamensky, 1944
