

Big Idea 1 : The Practice of Science

Description

A: Scientific inquiry is a multifaceted activity; The processes of science include the formulation of scientifically investigable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.

B: The processes of science frequently do not correspond to the traditional portrayal of "the scientific method ."

C: Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.

D: Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes but also in its questions and explanations.

Scientific Americans The Big Idea:

Scientific American: The Big Idea David Levy, 2010-09-11 SCIENTIFIC AMERICAN s The Big Idea 150 Years of the Best and Worst Ideas in Modern Science goes beyond the headlines to present the passions prejudice and outrage that from 1845 on formed the ideas of modern science from the sublime to the ridiculous This fascinating new book based on SCIENTIFIC AMERICAN s wildly popular feature 50 100 and 150 Years Ago in Science Today presents the often hilarious human aspect of science as well as a serious timetable of scientific discovery Progress in science is rarely a straight line While the events are arranged in chronological order the chapters reflect the somewhat twisted path scientists take in developing their theories conducting their experiments presenting their findings and getting acceptance for their ideas The chapters in THE BIG IDEA include Eureka Great Discoveries Inventions which details achievements from insulin to the Talkies and more often as first reported in SCIENTIFIC AMERICAN From the Editor s Desk which contains insightful and occasionally provocative commentary and news articles about subjects that have shaped our modern world Great Debates reveals that not every invention or discovery was greeted with universal acclaim and acceptance and which big ideas were subject to derision when first advanced It Seemed Like A Good Idea at the Time contains reports on ideas and inventions that quickly or ultimately failed the test of time Bizarro reveals the truly unusual lengths scientists go to prove their theories no matter how outlandish

Understanding Expository Text Bruce K. Britton,John B. Black,2017-11-01 Originally published in 1985 the various chapters in this volume give examples of research on all three aspects of text understanding namely structure world knowledge and process More than this however the research described represents a shift in emphasis from studying stories which dominated the field in the late 1970s to studying expository text This focus on stories was probably due to the essential first step in any science of examining the simplest materials possible However the editors thought that it was time to shift the research focus from

stories to expository text and this volume is their attempt to provide this transition
