Career Advice for Young Scientists in

Biomedical Research Béla Z. Schmidt, 2021-10-31 Pursuing a career in biomedical research can be daunting considering the stiffer competition and uncertain career prospects in academia. This book summarizes career advice gathered during in-depth interviews with 106 biomedical scientists who lead their own laboratories. The participating principal investigators are from 44 research institutions in 11 countries. This book is unique in that it provides a glimpse into the mindset of principal investigators. Here the reader will learn about common thought patterns and values as well as the range of opinions and ways of thinking to be found among a large group of active principal investigators without having to read more than a hundred individual autobiographies. The book will benefit all PhD students who want to learn more about their supervisor's mindset in order to successfully complete their projects. It can help freshly graduated PhDs planning to pursue an academic career and MDs contemplating a career in research to decide whether they truly want to embark on this path. Lastly, it can offer young principal investigators a source of inspiration on how to succeed and achieve their goals.

Trends in the Early Careers of Life Scientists National Research Council, Division on Earth and Life Studies, Commission on Life Sciences, Committee on Dimensions, Causes, and Implications of Recent Trends in Careers of Life Scientists, 1998-10-03 In each year between 1994 and 1996 more than 7 000 individuals received a Ph D in life science and the number of graduates is rising sharply. If present trends continue, about half of those graduates will have found permanent positions as independent researchers within ten years after graduation. These statistics and the labor market situation they reflect can be viewed either positively or negatively depending on whether one is a young scientist seeking a career or an established investigator whose productivity depends on the labor provided by an abundant number of graduate students. This book examines the data concerning the production of doctorates in life science and the changes in the kinds of positions graduates have obtained. It discusses the impact of those changes and suggests ways to deal with the challenges of supply versus demand for life science Ph D graduates. *Trends in the Early Careers of Life Scientists* will serve as an information resource for young scientists deciding on career paths and as a basis for discussion by educators and policymakers as they examine the current system of education linked to research and decide if changes in that system are needed.

Scientists, Experts, and Civic Engagement Amy E. Lesen, 2016-04-01 How do scientists, scholars, and other experts engage with the general public and with the communities affected by their work or residing in their sites of study? Where are the fine lines between public scholarship, civic engagement, and activism? Must academics give back once they collect data and publish results? In this volume, authors from a wide range of disciplines examine these relationships to assess how they can be fruitful or challenging. Describing the methodological and ethical issues that experts must consider when carrying out public scholarship, this book includes a checklist for critical factors of success in engagement and an examination of the role of digital social media in science communication. Illustrated by a range of case studies addressing environmental issues, climate change, resource use, post

disaster policy and education it offers an investigation into the levels and ways in which scholars can engage and how and whether academics and experts who engage in community work and public scholarship are acknowledged and rewarded for doing so by their institutions Also bringing into the debate the perspective of citizens who have collaborated with academics the book offers an exploration of the democratizing potential of participatory action research *Two Universities; an Account of the Life and Work of Lumumba Friendship University and Moscow State University* Agentstvo pechat
