Scorched Earth The Russian German War 1942 1944:

The German Defeat in the East Samuel W. Mitcham, 2007-01-23 Details the massive battles on the Eastern Front from the summer of 1944 until the fall of Budapest in early 1945 The last place a German soldier wanted to be in 1944 was the Russian front That summer Stalin hurled more than 6 million men 9 000 tanks 16 000 aircraft and 12 800 guns and rocket launchers against German forces *The Battle for Leningrad* David M. Lunde, 2013-07-19 A strategic analysis of the Nazi high command's decisions in the north from an established scholar of the Scandinavian theater Publishers Weekly One of the prominent controversies of World War II remains the debate over Germany's strategy in the north of the Soviet Union as the tide of war turned and gigantic Russian armies began to close in on Berlin Here Henrik Lunde former US Special Forces officer and author of renowned works on the campaigns in Norway and Finland turns his sights to the withdrawal of Army Group North Applying cool headed analysis to the problem the author first acknowledges that Hitler often accused of holding on to ground for the sake of it had valid reasons in this instance to maintain control of the Baltic coast Without it his supply of iron ore from Sweden would have been cut off German naval U boat bases would have been compromised and an entire simpatico area of Europe including East Prussia would have been forsaken On the other hand Germany's maintaining control of the Baltic would have meant convenient supply for forces on the coast or evacuation if necessary and perhaps most important remaining German defensive pockets behind the Soviets main drive to Europe would tie down disproportionate offensive forces Stalwart German forces remaining on the coast and on their flank could break the Soviet tidal wave However unlike during today's military planning the German high command in a situation that changed by the month had to make quick decisions and gamble the fate of hundreds of thousands of troops and the entire nation at stake on quickly decided throws of the dice In this book both combat and strategy are described in the final stages of the fighting in the Northern Theater with Lunde's even handed thought provoking analysis of the campaign a reward to every student of World War II Includes maps [The United States at War, 1941 - 1945](#) Gary R. Hitler's War Against the Partisans During The Stalingrad Offensive Antonio J Muñoz,2025-05-30 From the start of the war on the Eastern Front Hitler's Ostheer his Eastern Army and its associated forces would wage a vernichtungskrieg or war of annihilation in the East Never before had such a wide reaching campaign been fought The preparations for the war against the partisans began before the launches of Operation Barbarossa during which the Axis forces immediately put their

plans into effect. The effects upon the newly conquered territories were soon being felt. The end of the initial phase of the German invasion of the Soviet Union was met by a Red Army winter offensive which began on 5 December 1941. As the author shows, this had repercussions behind the German lines where the nascent Soviet partisan movement was attempting to grow and gain a foothold. By the spring of 1942, those early Soviet partisan units were ready to expand. The Germans, aware of the military situation both on the frontlines and in the rear of their armies, also prepared to counter the growing partisan threat. The partisans undoubtedly made a significant contribution to Stalin's war effort by countering Axis plans to exploit occupied Soviet territories economically as well as providing valuable assistance to the Red Army by conducting systematic attacks against Hitler's rear communication network. As the German military planned to continue the Russian campaign into the summer of 1942, new security forces were gathered together and sent to the Soviet Union, and a new headquarters specifically organized to fight the guerrilla menace was established. In this follow-up study, author Antonio Muñoz picks up the partisan and anti-partisan struggle in the East where Hitler's War Against the Partisans During Operation Barbarossa left off. The struggle behind the frontlines in Russia proved to be as grand and epic as the fight along the front lines. Dr. Muñoz describes this war of attrition along the entire breadth of the USSR. In 1942, the Ostheer, acting on Adolf Hitler's orders, launched their 1942 summer offensive which was aimed at capturing the Caucasus Mountains and the Russian oil fields that lay there. Dr. Muñoz not only covers the war behind the lines in every region of the occupied USSR but also describes the German anti-partisan effort behind the lines. Army Group South, as its forces drove into the Caucasus Mountains, the Volga River bend, and Stalingrad. No other work has included the guerrilla and anti-partisan struggle specific to the Stalingrad campaign. Muñoz manages to accomplish this but also to convey the story of the rest of the partisan and anti-guerrilla war in the rest of the USSR from the spring of 1942 to the spring of 1943.

Soviet Night Operations in World War II Claude Ronald Sasso, 1983. This study examines the extensive experiences of the Soviet Army as it struggled to master the night. Driven by necessity to operate in the relative safety of darkness, the Soviet Army in World War II learned to capitalize on night operations and to exploit that capability in its quest for victory over the German Army. The Soviets have not forgotten that experience and since the war they have emphasized the advantages of night combat. As they train for night operations, they closely study the experiences of World War II in the belief that certain basic techniques and conditions of battle transcend time and the vagaries of technological change.

Tank Warfare on the Eastern Front, 1943-1945 Robert Forczyk, 2016-03-30. The author of *Case White* offers an extensive history of German and Soviet armored warfare toward the end of World War II. By 1943, after the catastrophic German defeat at Stalingrad, the Wehrmacht's panzer armies gradually lost the initiative on the Eastern Front. The tide of the war had turned. Their combined arms technique, which had swept Soviet forces before it during 1941 and 1942, had lost its edge. Thereafter, the war on the Eastern Front was dominated by tank-led offensives, and as Robert Forczyk shows, the Red Army's mechanized forces gained the upper hand, delivering a

sequence of powerful blows that shattered one German defensive line after another His incisive study offers fresh insight into how the two most powerful mechanized armies of the Second World War developed their tank tactics and weaponry during this period of growing Soviet dominance He uses German Russian and English sources to provide the first comprehensive overview and analysis of armored warfare from the German and Soviet perspectives This major study of the greatest tank war in history is compelling reading **Soviet Night Operations in World War II** Claude R. Sasso,1982

Hitler's War Against the Partisans During Operation Barbarossa Antonio J Muñoz,2025-04-28 From the start of the war on the Eastern Front Hitler's Ostheer his Eastern Army would wage a vernichtungskrieg or war of annihilation in the East Never before had such a wide reaching campaign been fought Preparations for Germany's invasion of the Soviet Union had included the drawing up of plans and allocation of resources to secure the newly conquered territories These plans included the premeditated murder of many innocent civilians Adolf Hitler said as much when in July 1941 shortly after Stalin ordered the formation of partisans he told his Army High Command This partisan war has some advantage for us it enables us to eradicate everyone who opposes us Anticipating resistance to Nazi occupation and rule Hitler instructed the Ostheer to act ruthlessly not only on the front lines but in the rear areas as well When in July 1941 Stalin ordered partisan forces to be created the stage was therefore set for the largest and most savage conflict ever waged between a modern military force and a guerrilla army The scale of the partisan and anti partisan war on the Eastern Front was as costly and bitterly fought as the struggle on the front lines themselves Employing thousands of primary source documents and scouring eight separate state archives in six countries over a twenty two year period Antonio J Muñoz has produced what can be described as a definitive account of this part of the war behind the front lines in the East during the invasion of the Soviet Union From the very beginning the Nazis fought this war ruthlessly by eliminating not only actual guerrillas but a good portion of the civilian population Employing dozens of wartime anti partisan operational instructions plus newly created detailed battle maps and full orders of battle Dr Muñoz brings this little known conflict behind the lines into focus for the very first time The war behind the lines is detailed by district This includes the Reichskommissariat Ostland region which comprised the Generalbezirk Estland Estonia Generalbezirk Lettland Latvia Generalbezirk Litauen Lithuania Generalbezirk Bialystok Northeastern Poland and Generalbezirk Wei ruthenien Belarus The book also covers the guerrilla and anti partisan war in the Reichskommissariat Ukraine Ukraine region as well as in north central and southern Russia For Russia proper anti partisan operations against the guerrillas are broken down by army group area Not only are the operations described but the reader will also learn about guerrilla attacks and how the entire partisan movement grew from year to year and region to region Hitler's War Against the Partisans During Operation Barbarossa documents the whole of the beginning of the savage partisan war between June 1941 and the spring of 1942 Never before has every major and some minor anti guerrilla operation been described in such detail

Scorched Earth Jörg Baberowski,2016-11-22 German scholar Jörg Baberowski is one of the

world's leading experts on the Stalin era but his work has seldom been translated into English. This book is an unremitting indictment of the mad violence with which Stalin ruled the Soviet Union; it depicts Stalinism as a cruel and deliberate attack on Russian society driven by totalitarian ambitions and the goal of modernizing and rationalizing a backward people. Baberowski takes a twofold approach, emphasizing Stalin's personal role and responsibility as well as the continuity he sees in Communist aims and ideology since 1917. Unlike recent apologist accounts that focus on the challenges of modernization or on the operational complexities of managing the Soviet state, this hard-hitting analysis unequivocally locates the origins of the terror in the culture of violence and the techniques of power. Detailed, well-documented, and including many new details on the workings of the Stalinist state, this powerful work encompasses the dictator's brutal reign from his achievement of total power in 1929 to his death in 1953.

Kursk Steven H. Newton, 2009-02-18 The battle of Kursk fought in the summer of 1943 involved six thousand German and Soviet armored vehicles, making it the biggest tank battle of all time and possibly the largest battle of any kind. Students of military history have long recognized the importance of Kursk, also known as Operation Citadel, and there have been several serious studies of the battle. Yet the German view of the battle has been largely ignored. After the war, U.S. Army Intelligence officers gathered German commanders' post-war reports of the battle. Due in part to poor translations done after the war, these important documents have been overlooked by World War II historians. Steven H. Newton has collected, translated, and edited these accounts, including reports made by the Chiefs of Staff of Army Group South and the Fourth Panzer Army, and by the Army Group Center Operations Officer. As a result, a new and unprecedented picture of German strategy and operations is made available. The translated staff reports are supplemented by Newton's commentary and original research, which challenges a number of widely accepted ideas about this pivotal battle.

Soviet Cavalry Operations During the Second World War John S. Harrel, 2019-09-30 The author of *The Nisibis War* analyzes the Red Army's usage of horse-mounted units along the Soviet-German Eastern Front during World War II. While the development of tanks had largely led to the replacement of cavalry in most armies by 1939, the Soviets retained a strong mounted arm. In the terrain and conditions of the Eastern Front, they were able to play an important role denied them elsewhere. John Harrel shows how the Soviets developed a doctrine of deep penetration using cavalry formations to strike into the Axis rear, disrupting logistics and lines of communication, encircling and isolating units. Interestingly, he also shows that this doctrine did not stem from the native cavalry tradition of the steppe but from the example of the American Civil War. The American approach was copied by the Russians in WWI and the Russian Civil War, refined by the Soviets in the early stages of World War Two and perfected during the last two years of the war. The Soviet experience demonstrated that deep operations cavalry raids against enemy rear echelons set the conditions for victory. Although the last horse-mounted units disappeared in the 1950s, their influence led directly to the formation of the Operational Manoeuvre Groups that ironically faced U.S. forces in the Cold War. An expansive analysis of the technical, tactical, and operational employment of Soviet cavalry.
