**Scotland** Fiona J. Watson, 2003 A lively new history from one of Scotland's brightest young historians **Scotland from Pre-History** Fiona Watson, 2003-09-01 From the early settlers after the last Ice Age and the myth and ritual that surrounds that prehistoric period Fiona Watson charts the evolution of the Scottish people as Scots Picts and Angles and their interaction with the world abroad from invasions by the Romans and Vikings and the medieval wars of independence with England right through to Devolution **The North Pennines from Prehistory to Present** Paul Frodsham, Martin Green, Greg Finch, 2024-11-14 The first comprehensive survey of the archaeology of the North Pennines from Mesolithic to modern times Traces of 10 000 years of human activity survive today including flint scatters at Mesolithic campsites earthworks of prehistoric and later settlements and field systems and extensive remnants of the post medieval miner farmer landscape **Highlanders** James MacKillop, 2024-01-04 Rebellion was recurrent in the Highlands because the Gaels Scoti were an often oppressed indigenous minority in the nation Scotland to which they gave their name They spoke a language Gaelic few outsiders would learn and had their own family and social system the clans Warfare was bloody culminating in the catastrophe of Culloden Moor during the doomed quest to restore the Stuart kingship to all of Britain Economic hardship including the near genocidal Clearances in which tenant farmers were replaced with sheep drove the Gaels from the glens and islands so that most today live in the diaspora including millions in North America Although the Gaels lack a single genetic identity they clearly draw from distinct roots in the Irish Norse and Picts Despite their hardship the Gaels are also presented in romantic portrayals by the artistic elite of other nations This book offers ways in which the reader might find roots and ancestry in unfamiliar terrain Chapters discuss the landscape and language of the Highlanders the rise of clans feuds and invasions and eventual emigration **The Material Landscapes of Scotland's Jewellery Craft, 1780-1914** Sarah Laurenson, 2023-06-29 Shortlisted for the History Book Award in Scotland's National Book Awards 2023 During the long 19th century Scotland was home to an established body of skilled jewellers who were able to access a range of materials from the country's varied natural landscape precious gold and silver sparkling crystals and colourful stones freshwater pearls shells and parts of rare animals Following these materials on their journey from hill and shore across the jeweller's bench and on to the bodies of wearers this book challenges the persistent notion that the forces of industrialisation led to the decline of craft It instead reveals a vivid picture of skilled producers who were driving new and revived areas of hand skill and who were key to fostering a focused cultural engagement with the natural world among both producers and consumers through the things they made By placing producers and their skill in cultural context the book reveals how examining the materiality of even the smallest of objects can offer new and multifaceted insights into the wider transformations that marked British history during the long 19th century Uniting a vast array of jewellery objects with a range of other sources including paintings engravings newspaper reports letters inventories of big houses and small workshops sketchbooks novels works of

literary geology and early travel writings this book provides a deep dive into the cultural history of jewellery production through accessible thematic studies In doing so it sets out innovative methodologies for writing about the histories of craft production the natural environment and the material world Now available in a paperback edition it will be an important addition to the bookshelf of cultural historians and those interested in Scotland s wild landscapes and natural objects

Agricultural and Pastoral Landscapes in Pre-Industrial Society Fèlix Retamero,Inge Schjellerup,Althea Davies,2014-12-01 Through a series of case studies this third volume in the Earth series deals with the technological constraints and innovations that enabled societies to survive and thrive across a range of environmental conditions The contributions are structured into three sections to draw out particular commonalities and contrasts in the choices made by pre industrial communities in the construction of varied landscapes and cultural heritage Landnam from the Old Norse for taking of land deals with colonization including the drivers and processes through which colonizers developed an understanding of the productive potential and limitations of their new lands Fields and field systems Field walls are a distinctive and apparently timeless characteristic of many pre industrial farming landscapes but they present many the challenges to their study such as the effects of plowing abandonment and land use change and of urban development in fertile lowland zones which may eradicate reduce or conceal past systems of land use and division The importance of indirect and proxy evidence is illustrated and the value of interdisciplinary and modeling approaches emphasized Agro pastoralism focuses on the complex time space adaptations devised for managing cultivation and livestock production particularly the need to prevent stock incursions into arable fields during the growing season whilst making effective use of seasonal grazing resources The contributions focus on mountainous areas where temporary migrations in the form of transhumance provided access to a diversity of resources based around seasonal constraints on their availability and productivity *Proceedings of the Society of Antiquaries of Scotland* Society of Antiquaries of Scotland,1918 Includes List of members The Agrarian History of England and Wales: Volume 1, Part 1, Prehistory Stuart Piggott,Joan Thirsk,1981-04-02 General editor v 1 pt 1 v 5 pt 1 2 v 8 Joan Thirsk Includes bibliographies v 1 pt 1 Prehistory v 1 pt II A D 43 1042 v 2 1042 1350 v 3 1348 1500 edited by Edward Miller v 4 1500 1640 edited by J Thirsk v 5 1640 1750 edited by Joan Thirsk 2 v v 7 pt 1 2 1850 1914 v 8 1914 39 by E H Whetham **No Stone Unturned** Robert A Dodgshon,2015-05-19 A survey of how Highland society organised its farming communities exploited its resource base and interacted with its environment from prehistory to 1914 *The Agrarian History of England and Wales: Volume 1, Prehistory to AD 1042* Stuart Piggott,Joan Thirsk,2011-04-28 This volume surveys the evolution of the man made landscape in Britain over the period of some three millennia before the Roman conquest **Exploring Prehistoric Identity in Europe** Victoria Ginn,Rebecca Enlander,Rebecca Crozier,2014-03-19 Identity is relational and a construct and is expressed in a myriad of ways For example material culture and its pluralist meanings have been readily manipulated by humans in a prehistoric context in order to construct personal and group identities Artefacts were often from or reminiscent

of far flung places and were used to demonstrate membership of an imagined regional or European community Earthworks frequently archive maximum visual impact through elaborate ramparts and entrances with the minimum amount of effort indicating that the construction of identities were as much in the eye of the perceiver as of the perceived Variations in domestic architectural style also demonstrate the malleability of identity and the prolonged intermittent use of particular places for specific functions indicates that the identity of place is just as important in our archaeological understanding as the identity of people By using a wide range of case studies both temporally and spatially these thought processes may be explored further and diachronic and geographic patterns in expressions of identity investigated

**The Origins of the British: The New Prehistory of Britain** Stephen Oppenheimer, 2012-03-01 British prehistory will never look the same again Professor Colin Renfrew University of Cambridge Stephen Oppenheimer's extraordinary scientific detective story combining genetics linguistics archaeology and historical record shatters the myths we have come to live by It demonstrates that the Anglo Saxon invasions contributed just a tiny fraction 5% to the English gene pool Two thirds of the English people reveal an unbroken line of genetic descent from south western Europeans arriving long before the first farmers The bulk of the remaining third arrived between 7 000 and 3 000 years ago as part of long term north west European trade and immigration especially from Scandinavia and may have brought with them the earliest forms of English language As for the Celts the Irish Scots and Welsh history has traditionally placed their origins in Iron Age Central Europe Oppenheimer's genetic synthesis tells a different story There is indeed a deep divide between the English and the rest of the British But as this book reveals the division is many thousands of years older than previously thought Be prepared to have all your cherished notions of English history and Britishness swept away Clive Gamble

**Bronze Age Worlds** Robert Johnston, 2020-10-26 Bronze Age Worlds brings a new way of thinking about kinship to the task of explaining the formation of social life in Bronze Age Britain and Ireland Britain and Ireland's diverse landscapes and societies experienced varied and profound transformations during the twenty fifth to eighth centuries BC People's lives were shaped by migrations changing beliefs about death making and thinking with metals and living in houses and field systems This book offers accounts of how these processes emerged from social life from events places and landscapes informed by a novel theory of kinship Kinship was a rich and inventive sphere of culture that incorporated biological relations but was not determined by them Kinship formed personhood and collective belonging and associated people with nonhuman beings things and places The differences in kinship and kinwork across Ireland and Britain brought textures to social life and the formation of Bronze Age worlds Bronze Age Worlds offers new perspectives to archaeologists and anthropologists interested in the place of kinship in Bronze Age societies and cultural development
