Seasons Such As These

Bernard M'Mahon

Seasons Such As These:

Seasons Such As These Cynthia J. Bogard, 2003 Homelessness had become a social problem that was primarily not about solving the nation's housing crisis. The pressing question becomes: How and why did homelessness become the social problem in its own right, one that was only tangentially related to the problem of inappropriate or insufficient housing? Why, when people demanded that something be done about homelessness, did they get specific policies and unintended outcomes? Cynthia Bogard is not content with the shorthand answers that rested on bias and ideology such as conservative politics bred conservative policies or American individualism precludes government investment in housing. This did not explain homelessness sufficiently, especially given all the advocacy and research that had occurred in the 1980s and 1990s. Examining these claimsmaking activities as constructionists call them, however, is a daunting task because the activities engaged in by people in the attempt to persuade others are fluid, subtle, and complicated, as are the responses to these social actions. This raised a second set of issues that the author is concerned with: How can we adequately represent and sociologically examine this very complicated human activity of social problems construction? Who does the construction, and to what effect? Bogard's answer to these questions is a book that can be read in two ways and on multiple levels. For those who are interested in the story of the career of homelessness as a social problem in America's two national cities, the book should be read from the beginning through the conclusion as a straight narrative. The technical matter in the appendix can be ignored. But for those readers with an interest in social problems constructionism, however, this book is meant as a cook book of sorts. Each chapter emphasizes a feature of constructionism, such as an important group of claims makers or an important aspect of the claims making process. The work highlights a major feature in advanced societies: the intersection of interests and claims. Social constructions may be real, but they are comprised of no less real social interests. The work marks a real departure and advance over the original formulations of construction theory in social research. Cynthia J. Bogard is associate professor of sociology at Hofstra University. *The American Gardener's Calendar: Adapted to the Climates and Seasons of the United States* Bernard M'Mahon, 2024-09-10. Young,2012-12-06 In this book I have tried to bring together the major developments in the study of insect populations in tropical environments In some ways this task has been a difficult one because conceptually it is virtually impossible to limit a discussion of insect ecology to the tropics since the same concepts theories and hypotheses concerning the mechanisms by which habitats support insect populations often apply both to temperate and to tropical regions Thus one might argue effectively that a book such as Peter Price s *Insect Ecology* represents a more comprehensive treatment of insect ecology including the tropical aspects Yet because there has been a tremendous amount of new study on insects in the tropics in recent years and because there has also been a strong historical interest in tropical insects judging from early museum expeditions and medically and agriculturally oriented studies of insects in the New and Old World tropics I believe there is a place for a book dealing almost exclusively with tropical insects But logically so such a book by necessity incorporates data and information from Temperate Zone studies if

for no other reason than because insights into the properties of tropical environments often emerge from comparisons of species communities or faunas between temperate and tropical regions. An understanding of insect populations in the tropics cannot be divorced from a consideration of Temperate Zone populations.
