The Shape of the Past Gordon Graham,1997 Can human history as a whole be interpreted in any meaningful way Has there been real progress between stone age and space age Does history repeat itself Is there evidence of divine providence Questions such as these have fascinated thinkers and some of the greatest philosophers notably Kant and Hegel have turned their minds to philosophical history As a branch of philosophy however it has received little attention in the analytical tradition This pioneering work aims to bring the methods of analytical philosophy to the critical examination of some of these questions In addition to Hegel and Kant the discussion ranges over the writings of Augustine Machiavelli and Alasdair MacIntyre The ideas of historical progress secularization and the decline of religion cultural cycles historical rupture and God in history are all subjected to careful analysis Gordon Graham argues that although unfashionable the claim that history is the story of progress under the guidance of providence is one of the most plausible accounts of the shape of the past
