Mediated Discourse As Social Interaction A Study Of News Discourse:

Mediated Discourse as Social Interaction Ronald Scollon, 1998 This text bridges the gap in research between media studies and sociolinguistics and presents a new study on the role of language in the news media **Mediated Discourse as Social Interaction** Ron Scollon, 2014-06-11 Mediated Discourse as Social Interaction makes an explicit link between media studies and social interactionist discursive research where previously the two fields of study have been treated as separate disciplines This text presents an integrated theory illustrated by ample concrete examples bringing together the latest research in these two fields It offers a critique to the sender receiver model implicit in media studies and argues for an analysis of media discourse as social interaction on the one hand among journalists and newsmakers as a community of practice and among readers and viewers as a spectating community of practice on the other The book also argues for a coherent and interdiscursive methodology for the ethnographic study of the role of the news media in the social construction of identity and is based on a considerable body of ethnographic and textual analysis of both print and television news media The theory of mediated discourse presented in this volume will be of great interest to advanced undergraduates and postgraduates studying media studies sociology of language discourse analysis interactional sociolinguistics ethnography of communication and applied linguistics It will also be welcomed by scholars and professionals involved in research in these areas **Mediated Discourse as Social Interaction** Ron Scollon, 2014-06-11 Mediated Discourse as Social Interaction makes an explicit link between media studies and social interactionist discursive research where previously the two fields of study have been treated as separate disciplines This text presents an integrated theory illustrated by ample concrete examples bringing together the latest research in these two fields It offers a critique to the sender receiver model implicit in media studies and argues for an analysis of media discourse as social interaction on the one hand among journalists and newsmakers as a community of practice and among readers and viewers as a spectating community of practice on the other The book also argues for a coherent and interdiscursive methodology for the ethnographic study of the role of the news media in the social construction of identity and is based on a considerable body of ethnographic and textual analysis of both print and television news media The theory of mediated discourse presented in this volume will be of great interest to advanced undergraduates and postgraduates studying media studies sociology of language discourse analysis interactional sociolinguistics ethnography of communication and applied linguistics It will also be welcomed by scholars and professionals involved in research in these areas Mediated Discourse Ron Scollon, 2002-09-26 Language and action are intimately related The difficult question to answer is how Looks at how use of language is both a form of action in itself and is also indirectly related to all other forms of human action *Methods of Critical Discourse Analysis* Ruth Wodak, Michael Meyer, 2001 This book is designed as an introduction to Critical Discourse Analysis CDA and gives an overview of the various theories and methods associated with this sociolinguistic approach It also introduces the reader to the leading figures in CDA
