Digital Visual Effects in Cinema Stephen Prince,2011-12-07 Avatar Inception Jurassic Park Lord of the Rings Ratatouille Not only are these some of the highest grossing films of all time they are also prime examples of how digital visual effects have transformed Hollywood filmmaking Some critics however fear that this digital revolution marks a radical break with cinematic tradition heralding the death of serious realistic movies in favor of computer generated pure spectacle Digital Visual Effects in Cinema counters this alarmist reading by showing how digital effects driven films should be understood as a continuation of the narrative and stylistic traditions that have defined American cinema for decades Stephen Prince argues for an understanding of digital technologies as an expanded toolbox available to enhance both realist films and cinematic fantasies He offers a detailed exploration of each of these tools from lighting technologies to image capture to stereoscopic 3D Integrating aesthetic historical and theoretical analyses of digital visual effects Digital Visual Effects in Cinema is an essential guide for understanding movie making today *Books In Print 2004-2005* Ed Bowker Staff,Staff

Bowker, Ed,2004 Light as Experience and Imagination from Medieval to Modern Times David S. Herrstrom,2022-11-21 In Light as Experience and Imagination from Medieval to Modern Times David S Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times The true subject of the book is making sense of the individual s relationship with light rather than the investigation of light s essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times Consequently it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light optical science but rather with subjective reactions as reflected in art architecture and literature Instead of its evolution this book celebrates the complexity of our relation to light s character No individual experience of light being truer than any other All Things Medieval Ruth A.
