Original Papers on Literature, Science, Art, and National Interests**, 1856 **Wake Up and Die Right!"** Ben Foster, 2010-06 How might it happen that a boy of five or six would be tortured by the question of the existence of God How would this happen even if that boy were

raised to be an atheist by atheist parents If the boy was never baptized and never taken to church Was never told about any religion This book records the spiritual autobiography of a boy who raised in a household which discouraged belief in anything religious nevertheless came at a young age to worry about the place of God in his life and family and suffered from intense fears that he would be condemned to hell because he had not been baptized Looking back here is the way the author describes his early years I grew up in a household with no place for God or religion My mother and father were atheists They did not believe in any divinities and certainly not in the divinity of Jesus Perhaps like some of their intellectual friends they dismissed the idea that Jesus of Nazareth ever existed This was in America in the 1930 s and 40 s a time when scientists and intellectuals challenged the claims of Christianity For my parents the questions of who Jesus was and whether he had actually walked the earth were irrelevant Is there a God in heaven Is creation a gift to us from God Does God love and care for his children These were not questions my parents would entertain Such statements had been denounced as meaningless by the scientists and the rationalists who insisted that all discussions of God are pointless The author recalls his childhood swept by the cold winds of atheism as especially painful because his mother suffering from the loss of meaning of the atheist s vision sank into a deep depression and then into madness She suffered a series of nervous breakdowns and spent most of the author s early years in and out of mental hospitals As a child the author felt spiritually bankrupt He felt he counted for little in my parents world I counted for even less in the larger world I looked out at the vast universe that the scientists described and saw it as a frightening place Darkness and frozen space extended for millions of miles in all directions and there was nothing out there to comfort us or give our lives meaning The author was born into the Great Depression and went off to grammar school during World War II both events exerting a terrible impact on his family contributing to his mother s mental imbalance and his own feelings of insecurity I was four years old the author writes when World War II began As the war grew more widespread and destructive I watched with terror the newsreel reports of Nazi bombings I listened horrified to the newscasts on the radio Every week fresh issues of Time and Life magazines entered our house and they brought new images of cities in flames or bombed to smoking rubble There were close up photos of the dead on the battlefield of soldiers bleeding to death of bodies on a beach I recall in particular a photo of a boy my age standing in the ruins of his apartment building somewhere in Europe He looks lost frightened and utterly alone He wonders if his mother missing since the bombing is alive in the ruins Rubble and twisted metal are all that remain of the city street he had called his home Turning the pages of that Life magazine a terrible fear and sorrow seized me I identified with the boy I feared what had happened to him would happen to me The author speaks of how from a source he could not name powerful religious emotions primarily fear of a God of Wrath took hold of him and initiated me into a secretive life I kept hidden from my father The fears were brought into focus when I casually used words that had a religious meaning I didn t understand The words were these Cross my heart and hope to die I had heard other kids utter these words when they wanted to impress one another with the truth of

an assertion They often said them when it seemed fair! **I do and I understand - An Ebook Experiments & Demo in Physics and Computational Physics** Prof. KN Joshipura, Dr. Tarun Trivedi, Harshal A. Science, Religion, and the Human Experience James D. Proctor, 2005-04-21 The relationship between science and religion is generally depicted in one of two ways In one view they are locked in an inevitable eternal conflict in which one must choose a side In the other they are separate spheres in which the truth claims of one have little bearing on the other This collection of provocative essays by leading thinkers offers a new way of looking at this problematic relationship The authors begin from the premise that both science and religion operate in yet seek to reach beyond specific historical political ideological and psychological contexts How may we understand science and religion as arising from yet somehow transcending human experience Among the scholars who explore this question are Bruno Latour Hilary Putnam Jeffrey Burton Russell Daniel Matt Michael Ruse Ronald Numbers Pascal Boyer and Alan Wallace The volume is divided into four sections The first takes a fresh look at the relationship between science and religion in broad terms as spheres of knowledge or belief realms of experience and sources of authority The other three sections take on topics that have been focal points of conflict between science and religion the nature of the cosmos the origin of life and the workings of the mind Ultimately the authors argue by seeing science and religion as irrevocably tied to human experience we can move beyond simple either/or definitions of reality and arrive at a more rich and complex view of both science and religion **Practical experiments in school science lessons and science field trips** Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-09-14 Additional written evidence is contained in Volume 3 available on the Committee website at www.parliament.uk/science *The Philosophy of Social Science* Garry Potter, 2016-12-13 Now in its second edition this comprehensive textbook offers an exceptionally accessible yet in depth introduction to the philosophy of social science Students with no previous knowledge will find themselves taken on an engaging philosophical journey the book's unique dialogue format anticipates their most frequently asked questions and provides clear explanations of specialised terminology and essential contextualisation of contemporary debates Encompassing both traditional and contemporary perspectives the book explores the questions and debates raised by all the major theoretical positions in the philosophy of social science including positivism empiricism rationalism hermeneutics feminist epistemology postmodernism and critical realism The first edition of this book had a Eurocentric bias as does virtually all other textbooks covering this subject matter This has been

corrected in the second edition and includes a new chapter on the contributions of Islam to philosophy natural science social science including sociology The second edition also has a newly written chapter on pragmatism and neo pragmatism as well as strengthened coverage of hermeneutics postmodernism and critical realism The book s rich pedagogic support includes point by point summaries introducing the scope of every chapter discussion questions further reading lists and a glossary of key terminology This excellent textbook is designed to provide every student with a clear understanding of important and complex issues It is essential reading for all students of philosophy of social science whether at undergraduate or Masters level and regardless of their disciplinary background
