particularity of the learner's experiences, histories, memories, and interpretations. Laidlaw offers new information about writing and literacy pedagogy linked to current research in the complexity sciences and cognition and considers the possibilities that might emerge for pedagogy when alternative metaphors, images, and structures are considered for writing and curriculum. The volume includes qualitative and narrative description of writing and literacy situations, events, and pedagogy and elaborates the historical, theoretical, and curricular background in which such instruction exists within contemporary schooling.

**Reinventing Curriculum: A Complex Perspective on Literacy and Writing** addresses literacy through a focus on writing rather than on reading, develops an approach to literacy and writing pedagogy that incorporates recent theories and research on learning and the complexity sciences, examines perspectives on writing from both a teaching perspective and that of the work of writers, makes connections between the acquisition of literacy to research in other domains, examines both the benefits and the costs of literacy, and challenges commonsense understandings within instruction, for example, that literacy teaching and learning can occur apart from other aspects of children's learning context and subjectivity or that learning occurs individually rather than collectively. This book is important reading for researchers, professionals, teacher educators, and students involved in literacy education and writing instruction and an excellent text for courses in these areas.

"Stretching" Exercises for Qualitative Researchers Valerie J. Janesick, 2015-08-25 In the new Fourth Edition of her inventive one-of-a-kind book *Stretching Exercises for Qualitative Researchers*, author Valerie J. Janesick uses dance, yoga, and meditation metaphors to help researchers tap into the intuitive and creative side of their research. In every chapter, stretching exercises help readers develop practice and hone fieldwork skills and vital habits of mind such as observation, interviewing, writing, creativity, technology, and analysis. While reading the book and working through the exercises, readers can complete a researcher's reflective journal, an invaluable tool that will remain useful throughout their careers.

Power and Portfolios Jim Mahoney, 2002 The author discusses his experiences teaching reading and writing and explains how to structure and run high school classrooms with portfolios as the centerpiece.
