**Learning in Depth** Kieran Egan,2011-01-15 For generations schools have aimed to introduce students to a broad range of topics through curriculum that ensure that they will at least have some acquaintance with most areas of human knowledge by the time they graduate Yet such broad knowledge can t help but be somewhat superficial and as Kieran Egan argues it omits a crucial aspect of true education deep knowledge Real education Egan explains consists of both general knowledge and detailed understanding and in *Learning in Depth* he outlines an ambitious yet practical plan to incorporate deep knowledge into basic education Under Egan s program students will follow the usual curriculum but with one crucial addition beginning with their first days of school and continuing until graduation they will each also study one topic such as apples birds sacred buildings mollusks circuses or stars in depth Over the years with the help and guidance of their supervising teacher students will

expand their understanding of their one topic and build portfolios of knowledge that grow and change along with them By the time they graduate each student will know as much about his or her topic as almost anyone on earth and in the process will have learned important even life changing lessons about the meaning of expertise the value of dedication and the delight of knowing something in depth Though Egan s program may be radical in its effects it is strikingly simple to implement as a number of schools have already discovered and with Learning in Depth as a blueprint parents educators and administrators can instantly begin taking the first steps toward transforming our schools and fundamentally deepening their students minds

**Skin Game** Caroline Kettlewell,2013-06-04 There was very fine an elegant pain hardly a pain at all like the swift and fleeting burn of a drop of hot candle wax Then the blood welled up and began to distort the pure stark edges of my delicately wrought wound The chaos in my head spun itself into a silk of silence I had distilled myself to the immediacy of hand blade blood flesh There are an estimated two to three million cutters in America but experts warn that as with anorexia this could be just the tip of the iceberg of those affected by this little known disorder Cutting has only just begun to enter public consciousness as a dangerous affliction that tends to take hold of adolescent girls and can last hidden and untreated well into adulthood Caroline Kettlewell is an intelligent woman with a promising career and a family She is also a former cutter and the first person to tell her own story about living with and overcoming the disorder She grew up on the campus of a boys boarding school where her father taught As she entered adolescence the combination of a family where frank discussion was avoided and life in what seemed like a fishbowl where she and her sister were practically the only girls the students ever saw became unbearable for Caroline She discovered that the only way to find relief from overpowering feelings of self consciousness discomfort and alienation was to physically hurt herself She began cutting her arms and legs in the seventh grade and continued into her twenties Why would a rational person resort to such extreme measures How did she recognize and overcome her problem In a memoir startling for its honesty humor and poignancy Caroline Kettlewell offers a clear eyed account of her own struggle to survive this debilitating affliction
