No Longer At Arms Length:

Report of Investigation of Enron Corporation and Related Entities Regarding Federal Tax and Compensation Issues, and Policy Recommendations: Appendices C & D, 2003 **Village of Unsettled Yearnings** Leonard Neufeldt, Lora Jean Sawatsky, Robert Martens, 2002

Consensus and dissent persistence and rapid change were at the heart of Yarrow's rich cultural life. These tensions especially the inevitability of assimilation walked hand in hand with the young pioneer settlers born in Russia and the next generation born in Canada. There was no possibility that the new generation would be absorbed into a Russian colony ethos or would move elsewhere in order to perpetuate it. Those who grew up in the early years of this community cannot go home again save in memory the memories of a way of life and its webs of relationships and their meanings will probably die with that generation or those just a few years younger. *Village of Unsettled Yearnings* harnesses these memories to the surviving records and gives words to them. *Canadian Income Tax Act* Canada, 19?? **Federal Register**, 2003-06-23 **The Code of Federal Regulations of the United States of America**, 1975

The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. *Code of Federal Regulations* United States. Internal Revenue Service, 2012

The Routledge Handbook of Heterodox Economics Tae-Hee Jo, Lynne Chester, Carlo D'Ippoliti, 2017-07-28

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a pluralistic heterodox perspective. Contributions throughout the Handbook explore different theoretical perspectives including Marxian radical political economics, Post Keynesian, Sraffian economics, institutionalist, evolutionary economics, feminist economics, social economics, Regulation theory, the Social Structure of Accumulation approach, and ecological economics. They explain the structural properties and dynamics of capitalism as well as propose economic and social policies for the benefit of the majority of the population. This book aims firstly to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward-looking manner. Secondly, it delineates the future directions as well as the current state of heterodox economics and then provides both heat and light on controversial issues, drawing out the commonalities and differences among different heterodox economic approaches. The volume also envisions transformative economic and social policies for the majority of the population and explains why economics is and

should be treated as a social science This Handbook will be of compelling interest to those including students who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media and to critical economists and other social scientists who are concerned with analyzing pressing socio economic issues

Selectivity in State Aid Law and the Methods for the Allocation of the Corporate Tax Base Jérôme Monsenego, 2018-06-05 High profile cases before the European Commission and the EU courts have intensified scrutiny of the link between State aid law and the taxation of multinational enterprises Certain decisions have raised questions about fiscal sovereignty and the interpretation of the rules on State aid in particular the notion of selectivity which have not been addressed in detail by existing research The combination of the evolution of the notion of selectivity in State aid law on the one hand and the need to adapt the rules for the taxation of the profits of multinational enterprises to the modern economy on the other hand makes it necessary to assess whether existing as well as alternative rules for the allocation of the corporate tax base might entail a selective treatment This book responds to the need of research in the area of State aid law applied to the taxation of the income of multinational enterprises focusing on the crucial concept of selectivity The analysis proceeds with a detailed investigation of the theoretical issues that arise when applying the selectivity test in State aid law to three methods for the allocation of the corporate tax base between the members of multinational enterprises the arm's length principle transfer pricing safe harbours and systems of formula apportionment This research project is conducted at a theoretical level without considering national provisions or particular tax treaties The author suggests an analytical framework on the application of the selectivity test to the three allocation methods It is concluded that these methods are likely to have certain selective features with varying possibilities to be justified by the inner logic of a corporate income tax system It is also demonstrated that selectivity occurs for different reasons due to the different rationales of the three allocation methods This book is intended at contributing to the academic literature on the impact of State aid law on the principles for the taxation of the income of multinational enterprises The outcome of this research project is also relevant for lawmakers who need to reconcile the imperatives of State aid law with the design of rules that match their tax policies as well as for judges or lawyers who apply the rules on State aid to tax provisions
