cotidiana el familiar educativo y el de las relaciones personales y laborales fundamentalmente , **Investigacion en Administracion en America Latina** , Creativity and Time: A Sociological Exploration Juan A. Roche Cárcel, 2021-10-15 This book defends that the pursuit of originality constitutes one of the most important characteristics of creativity but that originality refers etymologically to both origin and originary Hence the book is structured into two parts dedicated respectively to the creative categories of origin and the creative categories of originary Within the former are creation myths games the origin of all cultural activity the dialectic chaos order axial civilizations the germ of our time and the struggle between generations a factor of social transformation and within the second creative capitalism creative work in the context of the global economy of risk and uncertainty and representative democracy However these two concepts are not isolated but deeply interrelated in a way that explains how creative originality builds a temporal narrative It has been dislocated in late modernity and with it creativity has been broken The Transformation of Learning Bert van Oers, Wim Wardekker, Ed Elbers, René van der Veer, 2008-03-03 The Transformation of Learning gives an overview of some significant advances of the cultural historical activity theory also known as CHAT in the educational domain Developments are described with respect to both the theoretical framework and research The book's main focus is on the evolution of the learning concept and school practices under the influence of cultural historical activity theory Activity theory has contributed to this transformation of views on learning both conceptually and practically It has provided us with a useful approach to the understanding of learning in cultural contexts **Reclaiming Archaeology** Alfredo González-Ruibal, 2013-08-21 Archaeology has been an important source of metaphors for some of the key intellectuals of the 20th century Sigmund Freud Walter Benjamin Alois Riegl and Michel Foucault amongst many others However this power has also turned against archaeology because the discipline has been dealt with perfunctorily as a mere provider of metaphors that other intellectuals have exploited Scholars from different fields continue to explore areas in which archaeologists have been working for over two centuries with little or no reference to the discipline It seems that excavation stratigraphy or ruins only become important at a trans disciplinary level when people from outside archaeology pay attention to them and somehow dematerialize them Meanwhile archaeologists have been usually more interested in borrowing theories from other fields rather than in developing the theoretical potential of the same concepts that other thinkers find so useful The time is ripe for archaeologists to address a wider audience and engage in theoretical debates from a position of equality not of subalternity Reclaiming Archaeology explores how archaeology can be useful to rethink modernity's big issues and more specifically late modernity broadly understood as the 20th and 21st centuries The book contains a series of original essays not necessarily following the conventional academic rules of archaeological writing or thinking allowing rhetoric to have its place in disclosing the archaeological In each of the four sections that constitute this book method time heritage and materiality the contributors deal with different archaeological tropes such as excavation surface depth genealogy ruins fragments repressed memories

and traces They criticize their modernist implications and rework them in creative ways in order to show the power of archaeology not just to understand the past but also the present Reclaiming Archaeology includes essays from a diverse array of archaeologists who have dealt in one way or another with modernity including scholars from non Anglophone countries who have approached the issue in original ways during recent years as well as contributors from other fields who engage in a creative dialogue with archaeology and the work of archaeologists

*Specialized Communication* Thorsten Roelcke, Ruth Breeze, Jan Engberg, 2025-06-02 Specialized communication in science technology or institutions is one of the most important and exciting fields of applied linguistics The handbook captures the current and relevant knowledge of specialized languages and professional communication It promotes international communication on central issues where dialogue is urgently needed concerning both their intellectual underpinning and the day to day practices associated with them

**Working with Adolescent Violence and Abuse Towards Parents** Amanda Holt, 2015-08-14 Adolescent violence and abuse towards parents is increasingly recognised as a global problem Inverting how we normally understand power to operate in abusive relationships it involves actors who cannot easily be categorised as victims or perpetrators and often impacts families who are experiencing multiple stressors and hardships and may be experiencing other forms of family abuse This unique book draws on an international selection of contributors to identify present and explore what we know about what works when supporting these families Exploring conceptual and theoretical challenges produced by this emerging social problem Part 1 discusses some well established intervention approaches and programmes looking at their theoretical base and relevant assessment delivery and evaluation issues It provides readers with a theoretical framework and toolkit for use in their own intervention work Part 2 presents examples of innovative practice with an emphasis on diverse institutional settings geographical locations and other important contexts that shape practice It provides readers with an understanding of some of the complexities involved in this kind of intervention work offering tools and strategies to be applied in their own work This interdisciplinary guide provides an essential resource for students and practitioners with an interest in domestic and family violence youth studies child protection drug and alcohol work and youth justice from a wide range of professional backgrounds

Internet and Society in Latin America and the Caribbean International Development Research Centre (Canada), 2004 This book presents pioneering research that is designed to show from a qualitative and ethnographic perspective how new information and communication technologies as applied to the school system and to local governance initiatives merely reproduce traditional pedagogical approaches and the dominant forms by which power is exercised at the local level The studies thus constitute points of departure for further thinking about the need to promote an Internet culture based on the social application of a OC right to communication and culture OCO and an OC Internet right OCO that will permit the establishment of true citizen participation and free access to knowledge with due regard to personal and individual rights such as those of privacy and intimacy
