1961-1981 Jane S. Bakerman,Mary Jean DeMarr,2019-10-01 Originally published in 1983 this title lists and annotates reference sources which will help readers select primary materials useful in studies of the literary portraits of women and their societal roles The years 1961 to 1981 were set as boundaries for this volume because the author s initial research revealed that a twenty year span was a manageable unit because the novels published between those dates yielded abundant materials for such a reference work and because significant changes in the way portraits of adolescent females were being drawn took place during the period for example sex role stereotyping became a shade less prevalent young women s sexuality was discussed more forthrightly and some topics such as single women s pregnancies and lesbianism were treated more overtly sometimes less judgementally **Gore Vidal** S. T. Joshi,2007 This comprehensive bibliography of Gore Vidal charts his career and covers the span of his sixty years of writing from his first novel Williwaw to his 2006 memoir Point to

Point Navigation **More Than Curious** William H. Press, 2023-11-10 The author found himself in places and times to closely observe significant events and noteworthy personalities in 20th century science. Various he interacted with such notables as Richard Feynman, S Chandrasekhar, Edward Teller, Y B Zel dovich, John Wheeler, James Watson, Julian Schwinger, Fred Hoyle, Martin Rees, Stephen Hawking, Freeman Dyson, Ed Witten and many others. His Ph D advisor Kip Thorne and his Ph D student Adam Riess each won Nobel Prizes for discoveries that he helped them start. Later he worked with or for not just scientists but also technology capitalists and billionaires, admirals and generals and political leaders including two U S presidents. His memoir is rich in stories about these people and events *The Publishers Weekly*, 1912 **Hound Dog: The Leiber and Stoller Autobiography** David Ritz, Jerry Leiber, Mike Stoller, 2010-10-18 Jerry Lieber and Mike Stoller shaped the rock and roll era; this is their story in their own words. In 1950 a couple of rhythm and blues loving teenagers named Jerry Leiber and Mike Stoller met for the first time. Leiber was looking for someone to help compose music for lyrics he'd written and a friend recommended a piano player named Mike Stoller. They discovered their mutual affection for R B and as Jerry and Mike put it in this fascinating autobiography it was the beginning of an argument that has been going on for more than fifty years with no resolution in sight. With the assistance of David Ritz they describe what it was like when Elvis was a fresh new face and when two young guys with tons of talent and an insatiable love of good old American R B could create the soundtrack for a generation and have a great time doing it. Jerry Leiber was born in Baltimore, Maryland on April 25th 1933 and Mike Stoller was born in Queens, New York on March 13th 1933. They first met in Los Angeles in 1950, moved to New York in 1957 and returned to L A in 1989 where they both still reside. They were inducted into the Songwriters Hall of Fame in 1985 and the Rock and Roll Hall of Fame in 1987 Focused Positivity John F. Tholen, 2021-10-11 For anyone who suffers more anxiety or sadness than is justified by healthy concern or normal grieving, "Sticks and stones can break my bones but words can never hurt me" is an adage we teach our children to insulate them from the cruel remarks of others. As adults, however, it's often the words that arise spontaneously from within—the self-disparagements, disturbing recollections and ominous forecasts—that cause us emotional pain and prevent us from living our fullest and most productive lives. The human brain has provided us with the technologies that allow us to dominate our planet, but it is also the source of much unnecessary emotional distress. Even when we have no good reason to be upset, our brains can spontaneously flood our minds with disturbing thoughts of past trauma or future disaster. Much of our unnecessary emotional distress occurs because our attention is involuntarily drawn to whatever most angers or frightens us, even when no immediate action is required and the risk is minimal. Our mood tends to be harmed much more by each negative thought than it is improved by each positive one. These two findings constitute what researchers call the negativity bias, and it's one of the reasons we often struggle to attain peace of mind, that mental equilibrium in which we accept both ourselves and our circumstances without experiencing distress about something from the past or that might happen in the future. By becoming more mindful of our thoughts, we can

learn to recognize those that distress and impede us unnecessarily We can then respond by identifying and focusing on more functional alternatives Reviewing discussing rehearsing and roleplaying functional self talk can strengthen our ability to reshape both our mood and our self image This focused positivity strategy can serve as the foundation of our efforts to become more assertive more relaxed healthier and more connected to the world around us Focused Positivity presents a comprehensive and accessible approach to positive thinking one that is independent of religious or political beliefs and consistent with what science has discovered about negativity bias automatic behavior the impact of self talk on mood and behavior habit change and even the competition that occurs between the two hemispheres of our brains Focused Positivity can provide us with an accessible strategy that anyone can employ to enhance both success and peace of mind **Tales**
