Physical Education In Schools:

Schoolwide Physical Activity Judith Rink, 2010 Audience Reference for K 12 PE and classroom teachers directors principals and administrators overseeing physical activity programs and wellness policy compliance Text for college PE majors and elementary classroom education majors Also a reference for community youth program leaders Physical activity doesn't have to be confined to physical education class Many schools are discovering the benefits of incorporating physical activity throughout the day In fact schools increasingly need to do so as requirements for weekly minutes of physical activity expand beyond the time available for physical education class With *Schoolwide Physical Activity A Comprehensive Guide to Designing and Conducting Programs* K 12 classroom teachers and administrators will learn how to design and conduct activity programs that not only meet wellness policy requirements and goals but also motivate and encourage all students to be physically active The premise of this innovative guide is that physical activity in schools is not the sole responsibility of the PE teacher It is the responsibility of all administrators and teachers and is most successful when it is integrated throughout the curriculum To that end *Schoolwide Physical Activity* highlights the role of elementary classroom teachers in providing opportunities for physical activity and it offers an array of tools and programs for teachers to incorporate in their classrooms At the secondary level the book creates a vision of a good physical activity program and then shows secondary teachers and administrators how to achieve that vision Through this text teachers and administrators receive a blueprint for building a comprehensive and coordinated K 12 physical activity program ready to use activities and forms and program ideas that address both the needs and desires of all children not just the small percentage who gravitate toward physical activity *Schoolwide Physical Activity* comes with a CD ROM that contains all the printable activities forms and tools from the book and over 200 activities for classroom teachers inclusive transitional activities integrated lessons and simple games and dances The comprehensive guide includes a Web site with an instructor guide presentation package and test package This resource will help teachers and administrators see their roles and responsibilities in a new light and gain stakeholder support for wellness and activity programs and it will assist in coordinating efforts among all involved in providing students with safe and appropriate programs that will transform their schools into more active places for learning

Education in the School Environment, Food and Nutrition Board, Institute of Medicine, 2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and other diseases. Emerging literature has suggested that in terms of mortality the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment including before, during and after school and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included recognizing the benefits of instilling life-long physical activity habits in children, the value of using systems thinking in improving physical activity and physical education in the school environment, the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education, the importance of considering all types of school environments, the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers and the education community, researchers, professional organizations and parents interested in physical activity, physical education and health for school-aged children and adolescents.
