Inventing Chemistry John C. Powers,2020-03-04 The story of this little known Dutch physician will interest students and practitioners of history chemistry and philosophy of science Choice In *Inventing Chemistry* historian John C Powers turns his attention to Herman Boerhaave 1668 1738 a Dutch medical and chemical professor whose work reached a wide educated audience and became the template for chemical knowledge in the eighteenth century The primary focus of this study is Boerhaave s educational philosophy and Powers traces its development from Boerhaave s early days as a student in Leiden through his publication of the *Elementa chemiae* in 1732 Powers reveals how Boerhaave restructured and reinterpreted

various practices from diverse chemical traditions including craft chemistry Paracelsian medical chemistry and alchemy shaping them into a chemical course that conformed to the pedagogical and philosophical norms of Leiden University's medical faculty In doing so Boerhaave gave his chemistry a coherent organizational structure and philosophical foundation and thus transformed an artisanal practice into an academic discipline Inventing Chemistry is essential reading for historians of chemistry medicine and academic life
